

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

ACKNOWLEDGMENTS

The *Statistical Abstract of the United States* was prepared under the direction of Edwin D. Goldfield, Chief, Statistical Reports Division. Compilation was under the supervision of William Lerner, Chief, Statistical Abstract Branch, assisted by Dorothy M. Belzer for editorial supervision and Stanley Greene for planning and review.

The cooperation of the many contributors to this volume is gratefully acknowledged. The list of sources of tables (pp. XII-XV) and the source note below each table credit the various government and private agencies which have collaborated in furnishing information for the *Statistical Abstract*.

JUNE 1957.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, *Statistical Abstract of the United States: 1957*. (Seventy-eighth edition.) Washington, D. C., 1957.

P R E F A C E

The *Statistical Abstract of the United States*, published annually since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to fulfill two functions: First, to serve as a convenient volume for statistical reference; and second, to serve as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source notes appearing below each table, and the Bibliography of Sources (page 964).

This volume includes a selection of data from many important statistical publications, both governmental and private. The publications cited as sources usually contain additional statistical detail and a more complete discussion of relevant definitions and concepts than can be presented here. Where contributing agencies are cited as sources, without mention of publications, more detailed information frequently is available from their unpublished tabulations and records.

Emphasis in the *Statistical Abstract* is given primarily to national data. Data for regions and individual States are presented to a lesser extent. Statistics for Territories and possessions are included in the State tables whenever available and supplemented by specialized information for these areas in section 33. Statistics for cities or other relatively small geographic units appear only in a few instances. Unless otherwise noted, statistics for the United States relate to continental United States.

1957 edition.—This edition, the 78th annual issue, presents data for the most recent year or period available during the early part of 1957. The title year "1957" refers both to the year during which compilation of the book was made and the year of publication.

Each year, in addition to the normal bringing up to date of the over 1,100 tables and charts included, new tables containing pertinent data are introduced. Data that are less timely are eliminated and format and text changes are made where considered advisable.

Worthy of special mention in this edition is the presentation of summary statistics from the 1954 Censuses of Agriculture, Business, Manufactures, and Mineral Industries conducted by the Bureau of the Census. Availability of these data afforded an opportunity for important additions to several sections. Particularly affected were section 24, Agriculture—General Statistics; section 25, Agriculture—Production and Related Subjects; section 30, Manufactures; and section 31, Distribution and Services.

Another section which has undergone a significant change in this edition is section 16, Banking and Finance. A number of tables relating specifically to national banks and to gold stock and coinage were omitted in order to permit the inclusion of additional information for all banks and for commercial banks.

Of particular current interest among the new tables appearing in this edition are several which have been abstracted from recent special studies or compilations. These include tables relating to atomic energy programs and activities, investment in and capacity of Federal power projects, 1956 national election campaign expenditures, foreign travel by United States residents, and smoking behavior patterns of population groups.

A total of 92 new tables have been introduced in this edition. Following is a list of subjects covered by some of the new tables:

Summaries from the 1954 Censuses
of Agriculture, Business, Manu-
factures, and Mineral Industries
Atomic energy programs and activi-
ties

Federal power projects

Election campaign expenditures in
1956

Foreign travel by United States
residents

Smoking behavior patterns of popu-
lation groups

Components of change in population
and annual rates of increase, by
States

Illegitimate live births, by age of
mother

Average length of life

Marriages, by previous marital status
of bride and groom

Physicians and dentists, by States

Passports issued, by object of travel

Federal expenditures for education

Income of lawyers, by age and
number of years in practice

Projection of estimated water use to
1975

Land acreage and total cost of Fed-
eral real property

Projections of labor force rates to
1975

Fringe benefits of plant workers

Trade union membership, by States

Civil defense expenditures

Military pay rates

State expenditures for veterans'
benefits

Disabled veterans

Residential rents in large cities

Average costs of specified medical
services

Commercial-industrial activities of
the Federal Government

Stock ownership of individuals, by
sex, age, income, and education

Sales, assets, and profits of largest
corporations and merchandising
firms

Profits of all manufacturing concerns,
by asset size class

Corporate pension funds, assets, re-
ceipts, and expenditures

Bankruptcy cases filed, by type and
occupation of debtor

Newsprint consumption by news-
papers for advertising and editorial
content

Rental and home owner vacancy
rates

Among tables shown in the last edition, 83 were omitted from this issue. Major omissions occurred in the Banking and Finance section affecting figures on loans, securities, capitalization; assets and liabilities of national banks, and on gold stock, coinage, and bullion value; in the Distribution and Services section affecting 1948 Census of Business data; in the Construction and Housing section affecting 1950 Census of Housing data; in the Manufactures section affecting 1947 Census of Manufactures data; and in the Agriculture—General Statistics section affecting 1950 Census of Agriculture data. Some of the information in the omitted tables was absorbed in other tables still present.

Supplements to the *Abstract*.—The *Statistical Abstract*, as an annual one-volume publication, is of necessity limited in amount of detail shown. Businessmen, teachers, librarians, public officials, professional workers, market researchers, and others often require data for individual cities, counties, metropolitan areas, and other small areas as well as for States. Economists, teachers, social scientists, historians, students, and others frequently need more historical information. To meet such requests for more detail, a series of supplements to the *Abstract* have been issued.

The *County and City Data Book, 1956*, is designed to help satisfy the need for statistical information about counties and cities and other relatively small geographic areas. Conveniently assembled are 133 statistical items for each county in the United States and 130 statistical items for each of the 484 cities having 25,000 inhabitants or more in 1950. Information comparable to that for counties is also presented for

geographic regions and divisions, States, and standard metropolitan areas. A special feature is an appendix which presents selected data for Congressional Districts. Also included are descriptive text and source notes.

This edition is the fifth in the *County and City Data Book* series. Many of the statistics in this volume were obtained from the results of the 1954 Censuses of Agriculture, Business, and Manufactures. Other subjects covered include births, deaths, and marriages; population characteristics; dwelling units; city government finances and employment; hospitals; bank deposits; and other items of social and economic importance. This volume is on sale by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Historical Statistics of the United States, 1789-1945, a historical supplement, was published in July 1949. This volume presents, in compact form, approximately 3,000 statistical time series (mostly on an annual basis) which cover various periods from 1789 to 1945. These time series reflect economic, social, and political aspects of the development of the Nation since the Federal Government was formally established. In the preparation of this supplement the Bureau of the Census had the cooperation of a special committee of the Social Science Research Council set up to advise the Director of the Census on a source book of historical statistics and of the Committee on Research in Economic History under the auspices of the Social Science Research Council. This volume is on sale by the Superintendent of Documents, Government Printing Office, Washington 25, D. C., for \$3.25.

Continuation to 1952 of Historical Statistics of the United States, 1789-1945, issued in May 1954, presents data for 1946 to 1952 for the current series shown in *Historical Statistics*, mentioned above. It also contains the latest revisions for many of the series in *Historical Statistics*. This publication is also on sale by the Superintendent of Documents, Government Printing Office, Washington 25, D. C., for 55 cents.

Responsibility.—The contents of this volume are taken from a large number of sources, as indicated in the list of agencies furnishing material. (See pages XII-XV.) The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. However, the responsibility for selection of the material and for proper presentation rests with the Bureau.

Many persons have written offering suggestions for improving the presentation of the material. These letters have been most helpful and users are urged to continue to make their needs known. All suggestions will be carefully considered in planning future editions.

FOR ADDITIONAL INFORMATION ON DATA PRESENTED

write to the agency indicated in the source note to the table which covers the desired subject.

SUGGESTIONS AND COMMENTS

should be sent to
The Director
Bureau of the Census
Washington 25, D. C.

STATISTICAL ABSTRACT SUPPLEMENTS

County and City Data Book, 1956. A compact presentation of 133 items of statistical data for each county in the United States, and 130 items of statistical data for each of 484 cities having 25,000 inhabitants or more in 1950. Information comparable to that for counties is also presented for geographic regions and divisions, States, and standard metropolitan areas. Items included based largely on results of 1954 Censuses of Agriculture, Business, and Manufactures. Includes 51 maps, explanatory and definitive text, and source notes. Issued 1957 (Buckram).

Historical Statistics of the United States, 1789-1945. A supplement to the *Statistical Abstract*, prepared with the cooperation of the Social Science Research Council. A compilation of about 3,000 statistical time series, largely annual, extending back through time to the earliest year for which figures are available. Includes definitions of terms and descriptive text. Specific source notes provide a basic guide to original published sources for further reference and additional data. Detailed alphabetical subject index. 363 pages. Issued 1949. Fifth printing. Price \$3.25 (Buckram).

Continuation to 1952 of Historical Statistics of the United States, 1789-1945. Carries forward and presents revisions of the statistical time series contained in *Historical Statistics of the United States, 1789-1945*. Designed especially for use in conjunction with the *Historical Statistics* volume. 79 pages. Issued 1954. Price 55 cents.

Purchase orders should be addressed to the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

FIG. I.—MAP OF THE UNITED STATES, SHOWING CENSUS REGIONS AND DIVISIONS

Source: Department of Commerce, Bureau of the Census.

Section 1

Population

This section relates to the population of the United States, its distribution, and its characteristics. The principal source of these data is the Decennial Census of Population, a house-to-house enumeration made by the Bureau of the Census. In accordance with a Constitutional provision for a decennial canvass of the population, the first census enumeration was made in 1790. The primary reason for the Census of Population, as set forth in the Constitution, was to provide a basis for the apportionment of Members of the House of Representatives among the several States. From 1800 to 1900, the census was conducted by the Superintendent of the Census appointed for the duration of each decennial census. In 1902, the Bureau of the Census was established as a permanent agency of the Government charged with responsibility for the decennial census and for compiling statistics on other subjects as needed. Currently, this Bureau supplies intercensal data based on surveys and estimates in addition to making the comprehensive decennial census enumeration.

Related materials are presented in other sections of this volume. Thus, statistics of marriage and divorce are presented in section 2, Vital Statistics, Health, and Nutrition; statistics on family income are given in section 11, Income, Expenditures, and Wealth; and Census data on employment and occupations are given in section 8, Labor Force, Employment, and Earnings. Data on the population in institutions are given in this section, but additional data on persons in mental institutions are given in section 2 and on prisoners in section 5, Law Enforcement, Federal Courts, and Prisons. Tables on nativity and citizenship are included in this section, but related data are included in section 3, Immigration, Emigration, and Naturalization.

Decennial censuses.—In accordance with Census practice dating back to 1790, each person enumerated in the 1950 Census was counted as an inhabitant of his usual place of residence or usual place of abode, that is, the place where he lives and sleeps most of the time. This place is not necessarily the same as his legal residence, voting residence, or domicile, although, in the vast majority of cases, the use of these different bases of classification would produce identical results.

Most of the data which are presented are based on complete counts. However, certain of the 1950 data are indicated as being obtained from representative samples of 20 percent or 3½ percent of the population. A few tables also include 1940 data obtained on a sample basis.

Exact agreement is not to be expected among the various samples, nor between them and the complete census count, but the sample data may be used with confidence where large numbers are involved, and may be assumed to indicate patterns and relationships where small numbers are involved. Detailed statements regarding the sampling errors are given in the original sources. In addition, experience has shown that in mass operations two tabulations of a set of punch cards are not likely to yield identical results. These differences are caused by occasional errors in the tabulation processes—machine failure, loss of punch cards, and other types.

Current Population Survey.—Several tables present statistics based on the Current Population Survey, conducted monthly by the Bureau of the Census. Until May 1956, the Survey covered a sample of approximately 21,000 interviewed house-

Note.—This section presents data for the most recent year or period available on February 5, 1957, when the material was organized and sent to the printer. In a few instances, more recent data were added later.

holds spread over a sample of areas throughout the United States. Since the sample has been expanded to approximately 35,000 interviewed households in a number of areas. For a discussion of the reliability of estimates based on this see Technical Note, page 193.

Population estimates.—Population estimates for dates after April 1950, which are not the result of sample surveys, are based on data from the 1950 Census; statistics of births and deaths provided by the National Office of Vital Statistics, Public Health Service; statistics of immigration and emigration reported by the Immigration and Naturalization Service, Department of Justice; and statistics on the Armed Forces provided by the Department of Defense. Estimates of State population are based on the same types of data and also make use of school statistics provided by the Departments of Education and parochial school systems throughout the country.

Urban and rural areas.—In the course of its history, the Bureau of the Census has employed several definitions of urban area.

According to the new urban-rural definition adopted for the 1950 Census, the urban population comprises all persons living in (1) places of 2,500 inhabitants or more incorporated as cities, boroughs, and villages, (2) incorporated towns of 2,500 inhabitants or more except in New England, New York, and Wisconsin, where they are simply minor civil divisions of counties, (3) the densely settled urban fringe including both incorporated and unincorporated areas, around cities of 50,000 or more, and (4) unincorporated places of 2,500 inhabitants or more outside any urban fringe. The remaining population is classified as rural.

According to the definition used in 1940, the urban population had been limited to all persons living in incorporated places of 2,500 inhabitants or more and in places of 2,500 inhabitants or more classified as urban under special rules relating to population size and density. The remaining area of the country was classified as rural. The definition of urban area used in the 1940 Census was adopted substantially as stated above at the time of the 1910 Census.

In this edition, figures by urban and rural residence for all dates prior to the 1950 Census are in accordance with the old definition. Figures for 1950 and subsequent years are in accordance with the new definition unless otherwise stated.

Farm and nonfarm residence.—The rural population is divided into the rural-farm population, which comprises all rural residents living on farms, and the rural-nonfarm population, which comprises the remaining rural population. The definition of farm and nonfarm residents used in the 1950 Census differs somewhat from that used in earlier surveys and censuses. Persons on "farms" who were paying cash rent for a house and yard only were classified as nonfarm, as were persons in institutions, summer camps, motels, and tourist camps.

Household.—A "household," according to present usage of the Census Bureau, comprises all persons who occupy a dwelling unit, that is, a house, an apartment, or other group of rooms, or a room that constitutes "separate living quarters." A household includes the "related persons" (the head of the household and others in the dwelling unit who are related to the head) and also the lodgers and employee, if any, who regularly live in the house. The number of households, thus defined, is the same as the number of "private households" or "families" as used in 1940 Census reports, and approximately the same as the number of "occupied dwelling units" used in the 1950 Census of Housing. See section 29, Construction and Housing, for the definition of dwelling unit. A person living alone or a group of unrelated persons sharing the same dwelling unit as partners is counted as a household.

A quasi-household is a group of persons living in quarters not classified as a dwelling unit, for example, in a house with at least five lodgers, or in a hotel, institution, labor camp, or military barracks.

Family.—The term "family," as used here, refers to a group of two or more persons related by blood, marriage, or adoption and residing together, and differs from the meaning of the term as used in the 1930 and 1940 Censuses. A primary family consists of

its of the head of a household and all (one or more) other persons in the household related to the head. A secondary family comprises two or more persons such as guests, lodgers, or resident employees and their relatives, living in a household or quasi-household (other than the negligible number of such groups among inmates of institutions) and related to each other.

Subfamily.—A subfamily is a married couple with or without children, or one parent with one or more children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. Members of a subfamily are also members of the primary family with which they live. The number of subfamilies, therefore, is not included in the number of families.

Married couple.—A married couple is defined as a husband and his wife living together.

Unrelated individuals.—The term "unrelated individuals" as used here refers to persons (other than inmates of institutions) who are not living with any relatives. A primary individual is a household head living alone or with persons all of whom are unrelated to him. A secondary individual is a person in a household or a quasi-household such as a guest, lodger, or resident employee (excluding inmates of institutions) who is not related to the head or to any other person in the household or quasi-household.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series B 26-30") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

Areas for each census year represent all continental area under jurisdiction of United States on indicated date. In some cases considerable areas not then organized or settled, and not covered by the census, have been adjusted to bring them into agreement with remeasurements made in 1940.

¹ To include adjustments for under enumeration in Southern States; unrevised number is 38,558,371.

Department of Commerce, Bureau of the Census; Reports of Fourteenth, Fifteenth, Sixteenth, and Seventeenth Censuses, *Population*, Vol. I; and other reports and records. See also Sixteenth Census Reports, *United States, 1940*.

No. 2.—ESTIMATED POPULATION: 1900 TO 1957

^a As of July 1, except where noted. Estimates for 1900 to 1909 are sums of State estimates based on indicative of population change. Estimates for 1910 to 1957 are based on decennial censuses and of births, deaths, immigration, emigration, and Armed Forces. See also *Historical Statistics*, series

ulation, 1917, 102,796; 1918, 101,488; 1919, 104,158. ^b Provisional.

Department of Commerce, Bureau of the Census; *Current Population Reports*, Series P-25 and records on population estimates.

No. 3.—PROJECTIONS OF THE TOTAL POPULATION, BY AGE AND SEX, 1960 TO WITH ESTIMATES FOR 1955 AND 1956

[In thousands. As of July 1. Includes Armed Forces overseas. Series AA, A, B, and C imply the following assumptions as to fertility: AA—1964-65 level continues to 1975; A—1950-53 level continues to 1975; B—1950-53 level continues to 1965, then declines to about the "prewar" level by 1975; C—1950-53 level declines from to about the "prewar" level by 1975. Figures following the braces relate to persons born before July 1

YEAR AND SEX	Total, all ages	Under 5 years	5 to 9 years	10 to 14 years	15 to 19 years	20 to 24 years	25 to 34 years	35 to 44 years	45 to 54 years	55 to 64 years	65 and over	1955

¹ Figures represent survivors of births of the appropriate years and were used as the base for the projection 5-to-9-year-olds for later years. Figures in the second column (under 5 years) are comparable to 1960 Census of children under 5 years of age. They were obtained by subtracting approximately 802,000 (estimated "census undercount" of children under 5 years) from the "adjusted" figures in order to make them comparable 1960 Census counts. A more detailed discussion of this point is given in Bureau of the Census, *Current Population Reports*, Series P-25, No. 146.

Source: Department of Commerce, Bureau of the Census; *Current Population Reports*, Series P-25, Nos. 146 and 148.

estimated population of the Philippine Islands (1940: 16,356,000; 1930: 13,513,000), not shown separately by Spain in 1908, the Philippine Islands constituted a territorial possession of the United States in 1946. Granted independence as of July 4, 1946, they then became the Republic of the Philippines. Inhabitants (36) of Midway Islands which were enumerated with Hawaii in 1930.

Inhabitants (560) of Baker, Canton and Enderbury, Howland, Jarvis, Johnston and Sand, and Islands which were enumerated with Hawaii in 1940.

Shown as of Oct. 1 of preceding year.

Enumerated.

Uninhabited at time of enumeration.

Not uninhabited at time of enumeration.

0.5 square mile.

An Island uninhabited at time of enumeration.

Caroline, Christmas, Danger (Fukapuka), Flint, Funafuti, Kingman Reef, Malden, Manahiki, Kufetau, Nukulailai, Nurakita, Penrhyn, Quita Sueno Bank, Rakahanga, Roncador Cay, Serrana Bank, Vostok, Phoenix Group (except Canton and Enderbury), and Union (Tokelau) Group, not in decennial censuses; and Baker, Howland, and Jarvis Islands.

Enumerated or uninhabited at time of enumeration.

Not of Baker, Howland, and Jarvis Islands. Other islands not enumerated or uninhabited at time of

enumeration are for Navassa (area, 2 square miles), and Baker, Howland, and Jarvis (combined area 3 square miles). Kingman Reef, Quita Sueno Bank, Roncador Cay, and Serrana Bank (each less than 0.5 square mile) of other islands (listed in footnote 10) not available.

Population of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

1914) from the Republic of Nicaragua for 99 years.

are those of the 1950 and 1940 Censuses of the Republic of Nicaragua, May 1950 and 1940. Little Corn

Island inhabited at time of both enumerations.

Trusteeship with the United States as administering authority. See *Trusteeship Agreement for the*

Mandated Islands (Documentary Supplement No. 1) of the Security Council of the United

Nations, which became effective on July 18, 1947.

on 1930, 69,628 1940, 131,258 (Censuses of Japan).

Department of the Navy. *Report on the Administration of the Trust Territory of the Pacific Islands for*

July 1, 1949 to June 30, 1950. Washington, D. C., U. S. Government Printing Office, 1950.

Department of the Navy. *Handbook on the Trust Territory of the Pacific Islands.* Washington, D. C.,

Government Printing Office, 1948.

United States citizens abroad on private business, travel, etc. Many of these were enumerated in

States at their usual place of residence as absent members of households.

20-percent sample of reports received and consequently subject to sampling variability. Chances

out of 3 that the figure that would have been obtained from a complete count would have differed by

50 from figure shown here.

NO. 5.—POPULATION PER SQUARE MILE, BY STATES: 1800 TO 1950.

[For United States, population of continental U. S. has been divided by total land area. For each Territory, population at given census has been divided by land area as then constituted. However, 1950 are based on revised land areas used for 1940. Areas of Indian reservations, outside Indian Territory included in areas of States and Territories for all years; however, populations of reservations were not ascertained and therefore were not taken into account in computing densities prior to 1890.]

No. 6.—CENTER OF POPULATION: 1790 TO 1950

"of population" is that point which may be considered as center of population gravity of the U. S. or that upon which the U. S. would balance, if it were a rigid plane without weight and the population distributed with each individual being assumed to have equal weight and to exert an influence on a central proportional to his distance from the point]

YEAR	North latitude	West longitude	Approximate location
	° ' "	° ' "	
1790	39 16 30	76 11 12	23 miles east of Baltimore, Md.
1800	39 16 6	76 56 30	18 miles west of Baltimore, Md.
1810	39 11 30	77 37 12	40 miles northwest by west of Washington, D. C. (in Virginia).

¹ Includes 6,100 persons on public ships in service of the United States, not credited to any region, district or State.

² Revised; unrevised figure is 38,558,371. Census of Southern States considered incomplete but there has no revision of State figures, hence State and region figures do not add to total shown here.

³ Includes 325,464 persons in Indian Territory and Indian reservations, specially enumerated.

⁴ Territory Northwest of River Ohio.

⁵ 1800 includes 3,124 persons in those portions of Indiana Territory which were taken to form Michigan, Illinois Territories in 1800 and 1809, respectively, and that portion which was separated in 1816.

⁶ Michigan Territory as then constituted; boundaries changed in 1816, 1818, 1834, and 1836.

⁷ Includes that part of Minnesota northeast of Mississippi River.

is that part of Minnesota lying west of Mississippi River and a line drawn from its source northwards to the mouth of the river.

Territory. ¹⁰ Those parts of Mississippi Territory now in present State.

parts of present State included in Mississippi Territory as then constituted.

is area taken to form part of Arizona Territory in 1863.

Territory exclusive of that part of present State of Colorado taken to form Colorado Territory as organized in 1861.

is Censuses taken under direction of Hawaiian Government.

see taken under direction of Spanish Government.

Nov. 10, 1899. ¹² 1890 as of Oct. 1, 1929; 1940, as of Oct. 1, 1939.

Department of Commerce, Bureau of the Census; U. S. Census of Population: 1960, Vol. I.

NO. 10.—POPULATION OF STANDARD METROPOLITAN AREAS: 1940 AND 1950
 (Minus sign (—) denotes decrease. A standard metropolitan area is a county or group of contiguous (except in New England) which contains at least one city of 50,000 inhabitants or more in 1950 or subsequent in addition to the county, or counties, containing such a city, or cities, contiguous counties are included standard metropolitan area if according to certain criteria they are essentially metropolitan in character sufficiently integrated with the central city. In New England, standard metropolitan areas have been on a town rather than on a county basis. This list of areas is based on "Standard Metropolitan Area Definitions" issued by the Executive Office of the President, Bureau of the Budget, on June 8, 1954. For detailed definition of standard metropolitan area concept and data for geographic components of each area, see *Source: County and City Data Book, 1952*, a supplement to the *Statistical Abstract*.)

¹Computed by compound interest formula.

²Obtained by dividing total population by number of households; hence, not strictly average size of household because total population includes members of quasi-households.

³The number of households with a Negro as head was 1,410,769 in 1890; 1,833,759 in 1900; 2,173,018 in 1910; 2,430,828 in 1920; 2,803,756 in 1930; 3,141,883 in 1940.

⁴Based on 20-percent sample of 1950 Census returns.

⁵See Technical Note, p. 193.

Series imply the following assumptions: I—Rate of change for 10-year periods, 1955 to 1975, will be equal to rate of change for 8-year period, 1947-1955; II—Average annual rate of change between 1950 and 1955 will continue to 1975; III—Half the average annual rate of change between 1950 and 1955 will continue to 1975; IV—No change in relevant measures will occur after 1955.

⁶Population base from *Current Population Reports*, Series P-25, No. 78. Series A used for household population I and II; Series C used for household population III and IV.

¹ for juvenile delinquents included with institutions for juveniles.
² exclusively for dependent children included with institutions for juveniles.

Department of Commerce, Bureau of the Census; U. S. Census of Population: 1960, Vol. IV, Part 20.

No. 58.—RELIGIOUS BODIES—CHURCH MEMBERSHIP, NUMBER OF PASTORS, SUNDAY SCHOOL ENROLLMENT

[Represents latest information available from religious bodies; excludes a few groups giving no data, such as of Christ, Scientist. Totals include, substantially, those religious bodies reporting to Bureau of Census Census of Religious Bodies in 1936. Not all groups follow same calendar year nor count membership the way; some groups give only approximate figures. Roman Catholics count all baptized persons, had infants; Jews regard as members all Jews in communities having congregations; Eastern Orthodox Oh include all persons in their nationality or cultural groups; most Protestant bodies count only persons who attained full membership, and previous estimates have indicated that all but a small minority of the over 13 years of age; however, many Lutheran bodies and Protestant Episcopal Church now report all persons, and not only those confirmed]

RELIGIOUS BODY	Year	Number of churches reported	Church membership	Number of pastors with charges	Sum of Sabbath School enrollment

Section 2

Vital Statistics, Health, and Nutrition

This section presents vital statistics—data on births, deaths, fetal deaths (stillbirths), marriages, divorces—and data on communicable diseases, mental health, care, hospitals, and nutrition. Vital statistics are compiled and published by the National Office of Vital Statistics, Public Health Service, in its annual report, *Statistics of the U. S.*, and its *Monthly Vital Statistics Report*. Reports in this section are also issued by the individual State bureaus of vital statistics.

The collection of death statistics on an annual basis began in 1900. Then the registration States consisted of 10 States and the District of Columbia. In 1908 the collection of birth statistics began with 10 States and the District of Columbia. The changing composition of the two registration areas¹ makes it impossible to obtain geographically comparable birth and death data for the entire United States before 1933. However, the rates for the expanding groups of registration States are approximations of national rates, and general comparisons over a long period of years can be made. Beginning with 1933, the birth and death registration States have comprised the entire continental United States. National statistics on births were compiled for 1918 and annually since 1922.

Births, deaths, and fetal deaths are classified by place of occurrence and by place of birth² of the mother or of the decedent.

Birth statistics.—Birth statistics comprise only live births occurring in continental United States.

From 1951 to 1954, the data have been based on a systematic sample—50 percent—of all registered births. In prior years, they were based on a complete review of the records received in the National Office of Vital Statistics, and in 1955 all records were again included. Adjustments shown for underregistration of births are based, for the most part, on the results of nationwide tests of registration completeness in 1940 and 1950.³

Death statistics.—Death statistics comprise only deaths occurring in continental United States; deaths among Armed Forces overseas are excluded. Current figures are based on a 10-percent sample of death certificates filed in State vital statistics offices. Fetal deaths (stillbirths) are excluded from death statistics.

Fetal deaths.—Fetal death statistics shown here comprise only fetal deaths for which the period of gestation was 20 weeks or more, or was not stated, since many deaths do not require the registration of earlier fetal deaths.

Marriages and divorces.—National collections of statistics on marriages and divorces in the United States were made for the years 1867 to 1906, 1916, 1922 to 1932, 1937 to 1943, and 1944 to 1956. Estimates have been made for the intervening years as well as for years in which collections were not complete. At the present time, records of marriages are filed centrally in three-fourths of the States, and records of divorce in more than one-half of the States.

Statistics rates.—Vital statistics rates computed by the National Office of Vital Statistics are based upon the enumerated population figures as of April 1 for 1940 and 1950, and upon the estimated midyear population figures for other years,

¹ Coverage of these areas, see *Historical Statistics of the United States, 1789-1945*, series C 1-5.

² Discussion of methods of residence allocation and of significance of residence figures, see *Vital Statistics of the United States, 1960*.

³ Description of these tests and their findings see *Birth Registration Completeness in the United States and Puerto Rico, 1960, Part I, Data for each State*, Vital Statistics—Special Reports, Vol. 39, No. 2.

—This section presents data for the most recent year or period available on February 5, 1967, when the data were organized and sent to the printer. In a few instances, more recent data were added later.

provided by the Bureau of the Census. The special situation created by the change in size and disposition of the Armed Forces necessitated the use of different types of population bases during the war and postwar period.⁴ Birth and divorce rates for 1941 to 1946 for the United States are based on the total population including members of the Armed Forces overseas. Birth and divorce rates for 1940 and 1947 to 1949 and death and marriage rates for 1940 to 1956 for the United States and the individual States are based on total population present in the area, excluding Armed Forces overseas.

Morbidity.—Statistics on morbidity are compiled and published by the Public Health Service in its *Morbidity and Mortality Annual Supplement*. The type of diseases reported by individual States depends upon laws or regulations within the various States. However, most of the common communicable diseases are reportable in all States. Data on morbidity in the general population are also obtained occasionally by special surveys conducted in various communities or States. A clearing house of such surveys is maintained by the Public Health Service.

Morbidity statistics for members of the Armed Forces are prepared and published by the Departments of the Army, Navy, and Air Force. The Department of Labor compiles statistics of industrial injuries (see p. 230).

Medical care.—Statistics of hospitals are obtained from the annual survey of hospitals conducted by the American Hospital Association. These statistics are published annually by that organization in *Hospitals*, Guide Issue, and include only hospitals that meet American Hospital Association requirements for listing. A relatively large number of institutions that provide health care, such as nursing and convalescent homes, are not included in the survey. Practically all of the hospitals in the country that meet the following definition of a hospital are included. A hospital is any establishment offering services, facilities and beds for use beyond 24 hours by two or more nonrelated individuals requiring diagnosis, treatment or care for illness, injury, deformity, infirmity, abnormality or pregnancy, and regularly making available at least (1) clinical laboratory services, (2) diagnostic X-ray services, and (3) treatment facilities for (a) surgery, or (b) obstetrical care, or (c) other definitive medical treatment of similar extent. *Hospital Service in the United States*, a publication of the American Medical Association, discontinued in June 1954, presented data on hospital facilities for many years. Statistics supporting comprehensive, long-range plans for construction of hospital facilities authorized under Title VI of the Public Health Service Act are revised annually. Summary data on existing hospital beds from 1948 to 1955 appear in *Public Health Reports* (May 1955 issue, p. 484).

Statistics on institutional population based on the 1950 Census of Population include information on number and characteristics of persons in long-term hospitals in homes and schools for the mentally and physically handicapped, and in homes for the aged and dependent (*U. S. Census of Population, 1950*, Vol. IV, Part 2C).

Sample surveys are conducted occasionally to provide information on the medical care received by the population of various communities or States, and certain insurance organizations publish statistics on the medical care received by their beneficiaries.

The number of births and deaths occurring in hospitals and institutions may be found in the Public Health Service publications on vital statistics. Another aspect of medical care is provided by statistics on patients in hospitals for mental disease and in institutions for mental defectives and epileptics. From 1926 to 1946, such data were collected annually by the Bureau of the Census. Beginning with the 1947 report, the data appear in the annual report *Patients in Mental Institutions* issued by

⁴ For a discussion of the interpretation of crude rates during wartime, see *Summary of Natality and Mortality Statistics, United States, 1943*, Vital Statistics—Special Reports, Vol. 21, No. 1, and *Marriage and Divorce in the United States, 1937 to 1946*, Vital Statistics—Special Reports, Vol. 23, No. 9.

the National Institute of Mental Health, Public Health Service.

Nutrition.—Statistics on the apparent consumption of food per capita by civilians and on the nutritive value of the per capita food supply are estimated by the Department of Agriculture, and published quarterly and annually in the *National Food Situation*. Methodologies and detailed information back to 1909 are available in Agriculture Handbook No. 62, *Consumption of Food in the United States, 1909-52*.

Statistics on Federal food distribution programs, and data on the quantity and costs of the food commodities distributed and the number of persons participating in the programs are published annually in *Agricultural Statistics*.

Historical Statistics.—Tabular headnotes (as "See also *Historical Statistics*, series C 24, C 45, C 77-78") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

REGISTERED LIVE BIRTHS

59

No. 63.—REGISTERED LIVE BIRTHS, BY COLOR, FOR URBAN AND RURAL AREAS, BY STATES: 1954 AND 1955

[By place of residence. 1954 data based on a 50-percent sample. Tests made in 1950 indicate that for the country as a whole, errors in residence reporting result in a significant overstatement of births to residents of urban places, and a corresponding understatement in the number to residents of areas classified as rural.]

No. 65.—GROSS AND NET REPRODUCTION RATE, BY COLOR: 1905 TO 1955

[Statistics based on births reported by National Office of Vital Statistics, adjusted for underregistration, and on annual life tables and population estimates by age, except as noted. A net reproduction rate of 1,000 means that each generation would just replace itself, if birth and death rates of a specified period were to continue indefinitely, in the absence of net immigration. A rate above 1,000 implies a potentially gaining population, and a rate below 1,000, a potentially declining population. A gross reproduction rate of 1,000 means that if all women born at the beginning of a generation were to live through their reproductive period and continue birth rates existing at the time of their birth, they would barely reproduce themselves, assuming no migration from outside the area. Where gross reproduction rate is less than 1,000, an improvement in mortality alone would not prevent a potential decline in population. For earlier annual gross reproduction rates, see *Historical Statistics*, series C 37]

PERIOD OR YEAR	NET REPRODUCTION RATE			GROSS REPRODUCTION RATE		
	Total	White	Nonwhite	Total	White	Nonwhite

¹ Estimated; based on a 10-percent sample of death certificates.

² Includes deaths for which age was not stated.

³ Adjusted for age by the direct method using as the standard population the age distribution of the population of the United States as enumerated in 1940.

⁴ Based on enumerated population adjusted for age bias in nonwhite population at ages 55 to 69 years.

¹ Deaths from deliveries and complications of pregnancy, childbirth, and the puerperium. Beginning with 1949, deaths are classified according to sixth revision of *International Lists of Diseases and Causes of Death*. For deaths in United States as a whole, it is estimated that 9 percent fewer deaths were assigned to maternal causes under sixth revision than under fifth revision of *International List* (1939-48).

² Includes only fetal deaths (stillbirths) for which period of gestation was 20 weeks (or 5 months) or more, or was not stated. ³ Not available. ⁴ Estimated; based on a 10-percent sample of death certificates.

⁵ Provisional.

No. 79.—ESTIMATES OF MARRIAGES FOR THE UNITED STATES AND MARRIAGE LICENSES ISSUED IN MAJOR CITY AREAS, BY MONTH: 1950 TO 1956

[Provisional data. Figures for major-city areas represent licenses issued in 34 cities with population of 100,000 or more according to the 1950 Census, and in 69 counties containing the remaining 72 cities in that population size group. These areas contain nearly two-fifths of the total population of the United States]

No. 89.—HOSPITALS—TYPE OF CONTROL AND SERVICE: 1909 TO 1955

[For 1909-1953, covers hospitals and related institutions registered by the American Medical Association. Registration was a basic recognition extended to hospitals and related institutions in accordance with requirements outlined in *Essentials of a Registered Hospital*, officially adopted by the House of Delegates of the A. M. A. Hospital registration series was discontinued by the A. M. A. in 1954. Beginning 1954, represents new series covering hospitals accepted for listing by the American Hospital Association, and may not be entirely comparable. Listing is a basic recognition extended to hospitals and related institutions in accordance with requirements outlined in *Requirements for Accepting Hospitals for Listing*, officially adopted by the House of Delegates of the American Hospital Association. See also *Historical Statistics*, series C 92-117]

5-51, figures from Agricultural Research Service, Department of Agriculture.

(these cases fulfill the generally accepted criteria for a diagnosis of smallpox.

8-81, figures (civilian cases only) from the Division of Venereal Diseases, Public Health Service.

Department of Health, Education, and Welfare, Public Health Service, National Office of Vital Statistics and Mortality Weekly Report, Vols. 3 and 4, No. 53.

No. 98.—REPORTABLE DISEASES—CASES REPORTED, BY MONTH: 1955

[Figures in this and table 97 should be interpreted with caution. Reporting of most of these diseases is known to be seriously incomplete, with degree of completeness varying from State to State. However, these figures have proved valuable to health authorities by indicating significant changes in disease incidence. They should not be interpreted as measures of total amount of illness caused by the diseases concerned.]

ble.
anned food products containing small quantities of fish such as clam chowder, etc.
roducts from rural and urban home gardens.

1937-39. ¹ In terms of malt equivalent.
white, whole wheat, and semolina flour. ² Green bean basis.

Department of Agriculture, Agricultural Marketing Service; published quarterly in *National Food*

No. 100.—NUTRITION—NUTRIENTS AVAILABLE FOR CIVILIAN CONSUMPTION PER CAPITA PER DAY: 1935 TO 1956

[Computed on basis of estimates of apparent civilian consumption (retail basis) including consumption from rural and urban home gardens. No deductions have been made in nutrient estimates for loss or waste in home or for destruction or loss of nutrients during preparation of food. Deductions have been made for inedible refuse. Data for iron, thiamine, riboflavin, and niacin include amounts of these nutrients added to prepared cereals, bread, and white flour under enrichment program. See also *Historical Statistics*, series C 122-127]

Section 3

Immigration, Emigration, and Naturalization

This section presents statistics related to immigration, emigration, naturalization, and alien registration. The principal source of these data is the *Annual Report of the Immigration and Naturalization Service*. Statistics of immigration and emigration are prepared from passenger and crew lists or manifests, and land border station registrations. Statistics for naturalizations are compiled from periodic reports by courts conducting such proceedings, and those for alien registrations are compilations of data from alien address report cards.

Although the reporting of alien arrivals was required in certain of the colonies and original States, the continuous record begins in 1819. Under the Act of March 2, 1819, passenger lists for all vessels arriving from foreign places were to be delivered to the local collector of customs, copies transmitted to the Secretary of State, and the information reported to Congress. Immigration statistics were compiled by the Department of State from 1820 to 1874 and by the Bureau of Statistics of the Treasury Department from 1867 to 1895. Since 1892 there has been a separate office or bureau of immigration, now a part of the Immigration and Naturalization Service. Annual reports were issued by this bureau from 1892 to 1932. From 1933 to 1940, a summary of the work of the Immigration and Naturalization Service was given in the *Annual Reports of the Secretary of Labor*. For 1941, the *Annual Report of the Attorney General* contained a report on immigration and naturalization. For subsequent fiscal years, *Annual Reports of the Immigration and Naturalization Service* (submitted by the Commissioner to the Attorney General) were published in mimeographed form.

Immigration.—Since 1820 the official immigration statistics (see table 105) have changed considerably in coverage. The early figures were for arrivals at Atlantic and Gulf coast seaports of the United States. Pacific coast arrivals were first reported in 1850. Aliens arriving at Canadian seaports en route to the United States were included after 1893. The reporting of arrivals over the land borders began in 1904 and was gradually extended up to 1908. For reporting purposes, Hawaii in 1901, Puerto Rico in 1902, and Alaska in 1904 were treated as integral parts of the United States. Travel between the Philippine Islands and the United States was not treated as immigration or emigration between July 1, 1898 and May 1, 1934. Prior to 1868 arriving alien passengers were recorded; thereafter aliens coming for temporary stay were omitted. The passage of the Act of 1891 increased the number of excludable classes. The basis of reporting was then changed from arrivals to admissions, omitting aliens not permitted to enter the United States, except for the period 1895 to 1897 when the reporting of arrivals was resumed. Two classes of alien admissions are now reported, immigrant under either quota or nonquota status, and nonimmigrant.

Immigrant.—An immigrant is defined as an alien, other than a returning resident, admitted for permanent residence.

Quota immigrant.—Quotas limit immigration from countries other than those of the Western Hemisphere. Until 1920 there was only a qualitative limitation on immigration into this country. The 1921 Act placed the first numerical ceiling upon immigration. Each country's quota was to be 3 percent of the number of people born in that

Notes.—This section presents data for the most recent year or period available on February 5, 1957, when the material was organized and sent to the printer. In a few instances, more recent data were added later.

country who were residing in the United States as reported by the 1910 Census of Population. In 1924, a new formula was enacted for computing a country's quota, based on 2 percent of the number of people born in that country who were residing in the United States as determined by the 1890 Census of Population. The 1924 Act also provided that beginning July 1, 1929, the quota of any country shall have the same ratio to 150,000 as the number of persons of that national origin living in the United States had to the total population living in the United States, as determined from the 1920 Census of Population. This Act also established minimum quotas of 100 for all quota areas and thereby raised the total quota authorized to 153,714. By 1952, this figure had become 154,277 by virtue of minor changes. The most recent step in legislation was in the Immigration and Nationality Act of 1952, which simplified the national origins formula of the 1924 Act by basing the annual quota on a flat one-sixth of 1 percent of the population in the 1920 Census. By Presidential Proclamation No. 2980, which became effective on January 1, 1953, new quotas were established for each quota area, totaling 154,657.

Nonquota immigrant.—Nonquota immigrants comprise immigrants born in Canada, Mexico, Cuba, Haiti, the Dominican Republic, the Canal Zone, and countries of Central and South America, and their spouses and children under age 21 if accompanying or following to join such immigrants; spouses and children of citizens of the United States; ministers of religious denominations, their spouses and children, if accompanying or following to join such ministers; refugees; and others.

Nonimmigrant.—Nonimmigrants are aliens who enter the United States for temporary periods or resident aliens returning from a temporary stay abroad. Included in the nonimmigrant class are foreign government officials, their families, attendants, servants and employees; temporary visitors for business or pleasure; aliens in continuous transit through the United States; returning resident aliens; students; and others. Certain temporary admissions such as of persons in possession of border-crossing identification cards are not included in the nonimmigrant totals.

Displaced persons and refugees.—The Displaced Persons Act of 1948, as amended, authorized the entry of certain displaced persons and other refugees without regard to the current availability of quotas, but subject to charges made against future annual quotas. The major provisions of the Displaced Persons Program expired in December 1951, and the program was nearly completed by June 30, 1952.

The Refugee Relief Act of 1953 authorizes the issuance of 214,000 special nonquota visas until the end of 1956 to German, Italian, Greek, Far-Eastern, and other refugees and expellees from the Soviet and other Communist-dominated countries.

Alien registration.—The Immigration and Nationality Act provides that each alien required to be registered under the Alien Registration Act of 1940, who is in the United States on January 1, must report to the Attorney General his current address during the month of January. Alien address report cards are distributed through the Post Offices of the United States or the local offices of the Immigration and Naturalization Service.

Emigration.—No official record of emigration was kept prior to July 1, 1907. Alien departures are classified as emigrant and nonemigrant (see table 106). For statistical purposes an emigrant is an alien resident of the United States departing with the declared intention of residing permanently in a foreign country. The nonemigrant category includes both alien residents of the United States departing for a temporary sojourn abroad, and aliens leaving the United States after a temporary stay.

Naturalization.—Naturalization statistics for the United States began with the fiscal year 1907. Prior to this time each court kept records of naturalizations but no national data were compiled. The Act of June 29, 1906, effective September 27, 1906, provided for periodic returns by all courts conducting naturalization proceedings, and for the filing with a central Federal agency of a duplicate copy of each declaration of intention and petition for naturalization filed, and of each certificate of naturalization

Naturalization statistics were originally compiled by the Bureau of Immigration and Naturalization of the Department of Commerce and Labor, now the Immigration and Naturalization Service of the Department of Justice.

ical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

¹ Quota was 153,774 from 1934 to February 8, 1944, when quota of 106 Chinese, authorized by Act of Dec. 17, 1943, increased the maximum quota to 153,879. On July 4, 1946, quota for Philippine Islands was increased from 50 to 100, thereby raising total quota to 153,929. Quota was increased to 154,206 on July 27, 1949, by establishment of separate quotas of 100 each for Israel, Syria, and Lebanon, and abolishment of combined quota of 123 established for Syria and Lebanon. Quota was increased to 154,277 on Oct. 31, 1950, when quota for Italy was reduced to 5,677, quota for Yugoslavia was increased to 938, and a separate quota of 100 was established for Trieste. Quota was changed to 154,657, effective January 1, 1953, in accordance with the Immigration and Nationality Act.

² For 1936 to 1945, Austrian quota included with German.

³ Philippines included in Asia beginning 1952; previously included in Oceania (Pacific).

FIG. IX.—CURRENT EXPENDITURE PER PUPIL IN AVERAGE DAILY ATTENDANCE
PUBLIC ELEMENTARY AND SECONDARY DAY SCHOOLS: 1954

[See table 143]

Source: Chart prepared by Department of Commerce, Bureau of the Census. Data are from Department of Health, Education, and Welfare, Office of Education.

Section 4

Education

Statistics in this section relate to the level, extent, personnel, and finances of formal education in the United States. The principal sources of these data are the Decennial Census of Population (see text, p. 1) and the Biennial Survey of Education conducted by the U. S. Office of Education. Other statistical studies of the U. S. Office of Education, publications of the National Education Association, annual or biennial reports of the individual State agencies which have jurisdiction over education, and the Current Population Survey conducted by the Bureau of the Census (see text, p. 2) are the additional regular sources of data in the field of education.

State laws vary concerning the compulsory school attendance of children. However, most State laws require that formal schooling begin at 7 years of age and extend until 16 years of age.

Data on school enrollment are available from the Decennial Census of Population for 1920, 1930, 1940, and 1950 and on educational attainment from the same source for 1940 and 1950. The Current Population Survey of the Bureau of the Census has reported on school enrollment annually beginning in 1945, and on educational attainment and illiteracy for 1947 and 1952. The reports of the Biennial Survey of Education include a greater variety of school information presented in much detail for each school level (kindergarten, elementary, secondary, and college). The Office of Education also issues annually the *Digest of Annual Reports of State Boards for Vocational Education*.

Student statistics.—Student enrollment and attainment statistics, particularly those of the Bureau of the Census, are based on attendance or enrollment in any school (or college) within a given period, and the last full grade completed by a student. A school as defined in this respect by the Bureau of the Census is any public, private, or parochial school, college or university, but excludes nursery schools or, generally, vocational, trade, business, or correspondence schools; kindergartens were also excluded until October 1950.

Median year of school completed.—The median year of school completed is defined as the year which divides the population into equal parts—one-half completing more, the other half completing less, schooling than the median. In the presentation of median year of school completed, the completion of the first year of high school is uniformly indicated by 9 and of the first year of college by 13, although some areas have only 7 years of elementary school.

School statistics.—The school data shown here from the Biennial Survey of Education are reasonably complete for the types of education covered, but do not include figures for private schools of art, music, drama, etc., for private, commercial, trade, and vocational schools, or private correspondence schools.

The comparability of elementary school or secondary school data over a period of years was invalidated by the introduction of the junior high school which includes the 7th and 8th grades of the traditional elementary school and the 9th grade of regular high school. A comparable time series utilizing these data is possible only on the strict basis of grade enrollment, 8 grades as elementary and 4 grades as secondary.

Office of Education data in this section relate to school terms or academic years; except as noted, the year shown refers to the period beginning in September of the prior year and extending to June of the year indicated.

Note.—This section presents data for the most recent year or period available on February 10, 1957, when the material was organized and sent to the printer.

No. 125.—SCHOOL ENROLLMENT BY SINGLE YEARS OF AGE FROM 5 TO 20, BY SEX: 1920 TO 1950

[Statistics for 1940 and 1950 are based on attendance at or enrollment in any regular school or college, including night schools, extension schools, or vocational schools, if part of regular school system. Excludes correspondence schools. In the 2 prior censuses, school enrollment question not restricted as to type of school or college. In 1920, question referred to period between Feb. 1 and Apr. 1, 1920; in 1930, to period between Mar. 1 and Apr. 1, 1930; in 1940, to period between Sept. 1, 1939, and Apr. 1, 1940; and in 1950, to period between preceding Sept. 1 and Jan. 1. Figures for 1950 based on 20-percent sample]

No. 128.—ESTIMATES AND PROJECTIONS OF ELEMENTARY AND HIGH SCHOOL ENROLLMENTS, BY GRADE: 1952 TO 1965

[In thousands. As of October 1. Data based on projected age-grade specific enrollment rates from the 1950 Census. Series A and B, and C imply the following assumptions regarding the projected number of births between 1952 and 1959: A—1950-53 reproductive level continues to at least 1960; B—1950-53 level declines to about the 1940 level by 1975; C—1950-53 level declines to about the 1940 level by 1975. High school enrollment figures are based on projections of the population already born by July 1953; thus only one series is shown for all years. These estimates were prepared in 1953 and differ somewhat from data for current years based on Current Population Survey shown in other tables.]

¹ According to the 1950 Census of Population.

² Includes lawyers not reporting and an estimated adjustment (subtraction) to account for duplications.

³ Includes 4,440 duplications.

⁴ If more than one subentry was applicable the individual was tabulated in each.

Section 6

Area, Geography, and Climate

Section 6 presents data on geographical characteristics, area, climatological, hydrologic, and hydrologic measurements of the United States. The Geological Survey, working with State agencies, is responsible for topographic and geologic maps and basic data concerning the quantity, quality, and movement of surface and subsurface water; the Bureau of Land Management conducts the cadastral surveys and the Coast and Geodetic Survey has responsibility for coastal and geodetic surveys and measurement of certain physical phenomena; the United States Lake Survey makes surveys and studies of the Great Lakes; the Weather Bureau is responsible for all meteorologic data.

A few authoritative publications presenting physical geography statistics are available. However, much data are compiled by the aforementioned governmental agencies which are primarily for particular regions or are collected for internal administrative purposes.

-Area measurements in the United States began with measurements for the States as a whole and developed, as mapping progressed, to measurements for the

annual report of the U. S. General Land Office for 1850 contained the first reference to the areas of the several States and Territories, although there was no indication of the method used in obtaining these measurements. The General Land Office has since been the sole source of information concerning the areas of the States and Territories until 1881.

The Bureau of the Census in 1881, as a part of the 1880 Census of Population, laid the basis for accurate and detailed area measurement in the United States. For the first time an account was given of the method and maps employed, the water bodies and the outer limits of the United States used as a basis for measurement. The Census Bureau, in 1940 in its publication *Areas of the United States: 1940* presented the first basic measurement of the United States since its work in 1880. The data presented in that study cover the total land and water areas of the States, counties, and minor civil divisions.

Coast and Geodetic Survey.—Authorized in 1807, the Coast and Geodetic Survey's original function was to survey and chart the coast of the United States and the outlying islands and reefs. In 1871, Congress authorized an extension of the geodetic surveys from the coast to provide the States with reference markers for the control of their hydrographic and geologic mapping and their boundary surveys.

United States Lake Survey.—The mapping activity of the Corps of Engineers, the United States Lake Survey, was established in 1841. Its primary function is to furnish Great Lakes navigators with reliable charts and information regarding harbor facilities. It also maintains records of fluctuating levels of the lakes, the flow through connecting rivers, the precipitation over the lakes, and reports on all hydraulic problems relating to the Great Lakes.

Weather Bureau.—The Weather Bureau collects, processes, and publishes climatological data. This Bureau maintains about 11,000 weather stations. Of this number nearly 6,000 produce autographic precipitation records, about 600 take automatic

This section presents data for the most recent year or period available on February 19, 1957, when the data were organized and sent to the printer.

or hourly readings of a series of weather elements, and the remainder record one observation a day. There are few records in existence for stations before 1871 although some earlier and less detailed records began in the 18th century.

Nearly all weather stations have been moved several times in their history. Consequently, the Weather Bureau has adopted the practice of using "normal" values of temperature and precipitation for comparative purposes rather than long-term means which are derived from records taken at the several different locations the station may have had over the years.

Normal values of temperature and precipitation are based on records for the 30-year period 1921 to 1950, inclusive. Where a station had a record for the entire 30 years from the same instrument site, monthly precipitation normals are the mean of the monthly values for the 30 years. For such stations, the temperature normals are obtained in a similar manner, using normal maximum and normal minimum values to obtain monthly normals. The annual normal temperature is obtained by dividing the sum of the annual normal maximum value and the annual normal minimum value for temperature by 2.

For stations that did not have continuous records from the same instrument for the entire 30 years, 1921 to 1950, the means have been adjusted to the record for the present site. In these adjustments, a "difference factor" was used for temperature and a "ratio factor" for precipitation. These factors were determined by parallel comparison, either between records at the actual station sites or through a second station that had a continuous record to compare against both sites for obtaining resultant adjusting factors. Normals were thereafter obtained as outlined above.

This system of normals has three characteristics: (1) The 30-year period (1921 to 1950) adopted for the computations is consistent with the term of years accepted by the World Meteorological Organization for climatic normals; (2) where the station exposure for records in a given locality have been changed, the whole record has been carefully studied and adjusted to the latest source of records and reports; (3) normals for maximum and minimum temperatures are separately tabulated and made available for the first time.

The degree-day normals are derived from the values for the monthly normal maximum and minimum temperatures, and are computed on the standard basis of 65° F. The degree day has been defined as follows: "A unit, based upon temperature difference and time, used in estimating fuel consumption and specifying nominal heating load in winter. For any one day, when the mean temperature is less than 65° F., there exist as many degree days as there are Fahrenheit degrees difference in the temperature between the average temperature for the day and 65° F."

No. 193.—TERRITORIAL EXPANSION OF CONTINENTAL UNITED STATES AND ACQUISITIONS OF PRINCIPAL TERRITORIES, POSSESSIONS, ETC.

[Boundaries of all territories listed under "Continental United States" were indefinite, at least in part, at time of acquisition. Area figures shown here represent precise determinations of specific territories which have been marked upon maps, based upon interpretations of the several treaties of cession which are necessarily debatable. These determinations were made by a committee consisting of representatives of various governmental agencies in 1912. Subsequently these figures were adjusted to bring them into agreement with remeasurements made in 1940. See also *Historical Statistics*, series B 24-25]

ACCESSION	Date	Gross area (land and water)	ACCESSION	Date	Gross area (land and water)

¹Figures are lengths of general outline of seacoast. Measurements made with unit measure of 30 minutes of latitude on charts as near scale of 1:1,200,000 as possible. Shoreline of bays and sounds is included to point where they narrow to width of unit measure, and distance across at such point is included.

²Measurements made with unit measure of 3 statute miles on charts of 1:200,000 and 1:400,000 scale when available. Shoreline of bays, sounds, and other bodies of water included to point where they narrow to width of 3 statute miles, and distance across at such point is included.

³Figures obtained in 1939-1940 with recording measure on largest scale maps and charts then available. Shoreline of bays, sounds, and other bodies of water included to head of tide-water, or to point where they narrow to width of 100 feet.

FIG. XII.—ACQUISITION OF THE TERRITORY OF CONTINENTAL UNITED STATES AND ORIGIN OF THE PUBLIC DOMAIN
[See table 218]

Section 7

Public Lands and Park Systems

relating to the public domain and the national parks appear principally in the reports of the Department of the Interior: The *Annual Report of the Secretary*, and the *Annual Report of the Director*, Bureau of Land Management. Federally owned land and real property are also collected by the General Land Administration and presented in the *Inventory Report on Federal Real Property in the United States*. The Agricultural Research Service of the Department of Agriculture compiles and issues statistics on land use and land ownership.

Original and acquired lands.—Sovereignty over its present continental land area was acquired by the United States Government through a series of international treaties and treaties. The United States, however, did not gain title to all of the land by such agreements. At the time of acquisition of United States sovereignty over the areas involved (now 1,905 million acres) title to about 463 million acres was in individual States and their political subdivisions or in private owners, and was not relinquished to the Federal Government. Title to the remaining 1,442 million acres of land area passed to the United States Government. This area, except for lands in the District of Columbia, is known as the original public domain.

In addition to the original public domain, the Federal Government has from time to time acquired, by purchase, condemnation, and gift, tracts of land needed for various purposes. Such lands are referred to as acquired lands, to distinguish them from public-domain lands.

Public-domain lands or public lands refer to those Federally owned lands to which the public land laws apply. In general, these lands include that part of the original public domain not disposed of under the public land laws, and other lands declared by the Congress specifically to be public lands, and acquired lands, as defined above.

Indian lands.—Indian lands refer to public-domain lands ceded to the Government by Indian tribes on condition that proceeds from their sale or other disposition would be paid into the Treasury in trust for the Indians.

Entries, selections, patents, and certifications.—The data on entries, selections, and certifications refer to transactions which involve the disposal, under the public land laws (including the homestead laws), of Federal public lands to non-Federal persons. In general, original entries and selections are applications to secure title to public lands which have been accepted as properly filed. Some types of applications, however, are not reported until the final certificate is issued. Applications become perfected entries upon issuance of a final certificate which is given to the applicant after he has complied fully with the requirements of the laws relating to public land location. A final certificate passes equitable title to the land to the applicant. Patents are instruments which pass legal title to the land to the applicant. Certifications are issued in lieu of patents in connection with certain State selections. **Statistical data.**—Tabular headnotes (as "See also *Historical Statistics*, series 1000-1009) provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

This section presents data for the most recent year or period available on February 19, 1967, when the report was organized and sent to the printer. In a few instances, more recent data were added later.

No. 218.—ACQUISITION AND EXTENT OF PUBLIC DOMAIN, CONTINENTAL U STATES: 1781 TO 1956

[Areas are as computed in 1912, hence do not agree with figures (in square miles) shown in table 193, which later adjustments and reflects subsequent remeasurement. See also *Historical Statistics*, series F 1.]

1781-1802 (State Cessions).....	236,826,600	233,415,680	3,409,920	—

¹ Estimated from imperfect data available for indicated years.

² Data for Louisiana Purchase exclude area eliminated by Treaty of 1819 with Spain. Such areas are in figures for Mexican Cession.

³ Includes 33,920 acres subsequently recognized as part of State of Texas which is not a public domain.

⁴ Represents drainage basin of Red River of the North, south of 49th parallel. Authorities differ as to exact date of its acquisition. Some hold it as part of Louisiana Purchase, others maintain it was from Great Britain.

¹ Comprises receipts from such sources as following: Sales of public and ceded Indian lands; fees and commissions; mineral rentals, royalties, and bonuses; sales of timber; grazing fees and rentals; and land rentals. For period prior to 1861, receipts were \$177,230,000.

² As of June 30, 1956, process of legal adjudication had not yet been completed for all grants and small changes in data for certain years may occur. For period 1802-60, total land granted to States was 96,977,000 acres. Includes grants for such public purposes as following: Educational, penal, and other public institutions and buildings; bridges, reservoirs, and other internal improvements; reclamation of swamp and arid lands; experiment stations; recreation areas; wildlife and forestry areas; military camps; and payments of bonds issued by local governments. Excludes grants to aid in construction of railroads, wagon roads, canals, and river improvements, or acreage of swamplands lost to States, for which States received indemnity in cash. Excludes data for Alaska and also 10,000 acres because of the rounding process.

³ Includes homesteads. ⁴ Includes some classes of final entries and patents prior to 1911.

⁵ Excludes commuted homesteads. ⁶ 1868-1870 only. ⁷ 1920 only.

Source: Department of Interior, Bureau of Land Management; annual report of the Director, and records.

No. 226.—VACANT PUBLIC LANDS—ACREAGE, BY STATES: 1900 TO 1956

[As of June 30. Vacant public lands are those which are unappropriated and unreserved. The former represent lands not covered by an entry, the latter, lands not reserved for some public purpose, i. e., available for entry or selection under appropriate laws. Data cover vacant public lands outside Alaska withdrawn for classification in furtherance of Taylor Grazing Act and for conservation and development of natural resources. Figures exclude vacant public lands in Alaska estimated at 270,000,000 acres on June 30, 1956. For U. S. totals, see *Historical Statistics*, series F 8.]

¹ Excludes 495,578 acres of land in litigation apparently lost to A. T. & S. Fe Railroad.

² Dakota Territory.

³ Excludes ceded lands amounting to 1,472,000 acres. All other years include ceded land.

⁴ Excludes public domain lands outside reservation boundaries permitted to Indians.

⁵ Taxable land per act of June 10, 1896 (29 Stat. 321, 331).

⁶ For 1955, excludes an estimated 40,000 acres of trust allotted land subject to taxation under act of December 30 1916 (39 Stat. 865-866).

⁷ For 1956, includes item excluded in 1955 (see footnote 6 above).

⁸ Includes 947,115 acres of trust allotted land part of which is taxable.

Section 8

Labor Force, Employment, and Earnings

ction presents statistics dealing with the characteristics of the economically ment of the population, the labor force; its distribution by occupation and affiliation; and the supply of, demand for, and conditions of labor.

ief sources of these data are the Bureau of the Census' Decennial Census of n (see text, p. 1), and Current Population Survey (see text, p. 2); the Bureau Statistics' *Monthly Labor Review*; and the Agricultural Marketing Service's report, *Farm Labor*.

cs shown in this section are of two types. One type is obtained by the on approach" represented by the Census of Population and the Current n Survey of the Bureau of the Census. This approach involves direct enumer- interrogation of individuals to obtain information on employment activity ers or members of workers' households. Each employed worker is counted , even though he may have held two or more jobs during a given period. roach encompasses direct enumeration of all employed and unemployed eluding the self-employed, unpaid family workers, domestic servants, and o do not ordinarily appear on the payrolls of any establishment.

ond type of data is obtained by the "establishment approach" represented by ys of the Bureau of Labor Statistics and the Agricultural Marketing Service. a are based on reports from employers, i. e., farms, businesses, or industrial ents. Such data as wages, hours worked, labor turnover, and industry of employees can be more accurately obtained from employers' records than e to inquiries directed to a worker or a member of his household. Workers on more than one payroll for the same time period are counted more than blishment statistics.

ecennial Census of Population provides detailed data for the United States, ach State, city, and other area, including personal characteristics (sex, age, of the numbers employed and unemployed, the number reported in each n and in each industry, and other items. The Census Bureau's Current n Survey provides current data published in *Current Population Reports*, ' Report on the Labor Force" and related publications series. Data pre- lude national totals, by sex and age, of the number of persons in the civilian e, the number employed in nonagricultural industries and agriculture, the nemployed, and the number of nonworkers. Also provided are data on hours d major occupation group of those employed and duration of unemployment nemployed.

reau of Labor Statistics in the *Monthly Labor Review* provides monthly data yment, unemployment, and payrolls; labor turnover; earnings, hours, and s; industrial relations; and output per man-hour. Although for the most are presented for the United States only, certain of these data are also shown and large cities.

orce.—The labor force as defined by the Bureau of the Census includes years old and over who were employed, unemployed, or in the Armed Forces

is section presents data for the most recent year or period available on March 7, 1967, when the ma- nualised and sent to the printer. In some instances, more recent data were added later.

during a specified week. Employed persons are those who did any work for pay or profit during the week, or who worked without pay for 15 hours or more in a family enterprise (farm or business); also included are persons who did not work or look for work but who had a job or business from which they were temporarily absent during the week. Unemployed persons comprise those who did not work at all during the week but were looking for work.

In the 1950 Census, the labor force data relate to the first or second week of April for the majority of the population. The "experienced civilian labor force" consists of all employed workers and unemployed workers with previous work experience. Population censuses earlier than 1940 used a concept of "gainful workers." This concept included all persons 10 years old and over who reported a gainful occupation, without regard to their work or work-seeking status, and, in general, excluded new job seekers without previous experience in a gainful occupation.

Employment and earnings.—The monthly estimates of nonagricultural employment prepared by the Bureau of Labor Statistics are based on voluntary reports for about 41,000 establishments in manufacturing industries and for about 117,000 establishments in selected nonmanufacturing industries, supplemented by data from other Government agencies and adjusted at intervals to data from tabulations of reports under Government social insurance programs. These estimates exclude proprietors of unincorporated businesses, self-employed persons, domestic servants, unpaid family workers, agricultural workers, and persons in the Armed Forces. The employment data are for all full- and part-time employees who worked or received pay for any part of the period reported.

Estimates are available for total employment for 8 major industry divisions, and for selected nonmanufacturing industries. Both total employment and production-worker estimates are published for 21 major manufacturing groups, 137 manufacturing subgroups, and for mining industries.

Average weekly hours and average weekly and hourly earnings are available for production and related workers for over 300 series in manufacturing; in mining, laundries, and cleaning and dyeing industries; and for nonsupervisory employees and working supervisors in other selected nonmanufacturing industries. The earnings data are gross (before payroll deductions) and include overtime premiums; they exclude irregular bonuses and value of payments in kind. Hours are those actually worked or paid for.

Agricultural employment estimates and wage rates, obtained by means of monthly mail returns, have been issued since 1909 by the Department of Agriculture and appear monthly in *Farm Labor*.

Output per man-hour.—The Bureau of Labor Statistics prepares and publishes annual measures of output per man-hour according to two broad concepts. The first, physical output per man-hour, deals with the relationship between production in physical units and man-hours used in production. The indexes measure the relationships between the volume of goods produced and one factor of input—labor time. They do not measure the specific contribution of labor or capital nor do they reflect increased efficiency resulting from more economical use of fuels and materials or more efficient integration of industries.

The other concept of productivity measurement, net output per man-hour, deals with the relationship between value added by manufacture (at fixed prices) and man-hours. Indexes reflect not only average productivity change of industry components, but shifts among industries, and savings in materials consumption.

Labor turnover.—Labor turnover rates are published monthly in the *Monthly Labor Review* for approximately 100 industries on the basis of about 10,000 reports from cooperating establishments. Labor turnover data are available on a monthly basis from January 1930 for manufacturing as a whole. Because of the adoption of the

Standard Industrial Classification system beginning with data for January 1950, labor turnover rates for many industries and industry groups are available on a continuous basis only from that date.

Work stoppages.—The basic measures of strike statistics compiled by the Bureau of Labor Statistics are the number of stoppages, of workers involved, and of unions involved. Basic statistical data are obtained from the employers and unions involved. Knowledge of strikes come from a variety of sources, including newspapers, State employment services, and State and Federal mediation services. The Bureau prepares annual reports published in the *May Monthly Labor Review* and later in bulletin form, which give the total figures for each month of the year, and also analyses of strikes by industry, State, city, and by causes, labor organizations involved, and other pertinent classifications.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series 1-10") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

Technical Note—Current Population Survey

Source of data.—The Current Population Survey is a monthly sample survey of the Bureau of the Census. The current sample design, instituted in May 1956, is spread over 330 areas comprising 638 counties and independent cities, with coverage of each of the 48 States and the District of Columbia. Approximately 35,000 households are interviewed each month. Another 1,500 occupied dwelling units, on the same basis, are visited but interviews are not obtained because the occupants are not at home after repeated calls or are unavailable for some other reason. There are also about 5,500 sample units in an average month which are visited but are found to be vacant or otherwise not to be enumerated. The previous sample design, in effect from January 1954 through April 1956, was spread over 230 sample areas comprising 453 counties and independent cities. Data on the Armed Forces are obtained from the Department of Defense.

Reliability of the estimates.—According to rough computations from the 1956 survey, the relative sampling error during 1956 for summary estimates such as civilian labor force, total employment, and nonagricultural employment is about 0.4 percent; agricultural employment and for unemployment it is roughly 3 to 4 percent. In earlier years the sampling error was somewhat higher. The chances are about 2 out of 3 that an estimate from the sample would differ from a complete census by less than the percentage estimated above for the particular item. The chances are about 1 out of 20 that the difference would be less than twice the specified percentage and about 99 out of 100 that it would be less than $2\frac{1}{2}$ times the percentage.

The sampling variability indicated above is illustrative of the variability of data obtained on the Current Population Survey. For specific evaluation of the sampling variability, see the original releases of the Bureau of the Census.

Comparability with Decennial Population Census data.—Statistics obtained from the Current Population Survey may differ from Decennial Census data because of sampling variability, as described above. In addition, comparability between the two sets of data may be affected by other factors, such as differences in the training and experience of enumerators and in the enumeration procedures. For further information, see *U. S. Census of Population: 1950*, Vol. II, Part 1.

Includes inmates of penal and mental institutions and homes for the aged, infirm, and needy. Based on slightly modified definitions of employment and unemployment; see *Current Population Reports*, P-57, No. 176.

Source: 1929-39, Department of Labor, Bureau of Labor Statistics; *Handbook of Labor Statistics*, 1947 edition. 1940-57, Department of Commerce, Bureau of the Census; *Current Population Reports*, Series P-50 and P-57.

NO. 240.—PROJECTIONS OF TOTAL LABOR FORCE AND OF LABOR FORCE PARTICIPATION RATES, BY AGE AND SEX: 1955 TO 1975

[Annual averages. Rate represents the proportion of each age group in the labor force (employed, unemployed, or in the Armed Forces). Series A—Projection of average annual rates of change in labor force participation rates between 1920 and the average of April 1954, 1955, and 1956. Series B—Projection of average annual rates of change between 1950 and 1955. Series C—Use of Series B rates for men 14 to 24 years and for women 14 to 34 years; use of Series A rates for other age groups. For underlying total population projections, see Series A of table 3, p. 6.]

1 Persons who had a job or business, but who did not work at all during entire survey week because of illness, bad weather, vacation, industrial dispute, and various personal reasons. Prior to 1957, also included persons on temporary layoff with definite instructions to return to work within 30 days of layoff and persons scheduled to report within 30 days to new job.

2 Survey week contains holiday.

No. 247.—EMPLOYEES IN NONAGRICULTURAL ESTABLISHMENTS (ANNUAL AVERAGE), BY INDUSTRY GROUP: 1919 TO 1957

[In thousands. Includes all full- and part-time employees who worked during, or received pay for, any part of the pay period reported. Excludes proprietors, self-employed persons, farm workers, unpaid family workers, domestic servants, and personnel of Armed Forces. Data for the two latest years are adjusted to 1st quarter 1955 benchmark levels indicated by data from Government social insurance programs, and are comparable with the series for earlier years]

1957, March.....	6,400	5,148	1,252	128.00	159.00	5.20	5.60	

¹ Data are arithmetic means of monthly estimates of persons employed during last complete calendar week each month ending at least one day before last of month.² Weighted averages of wage rates as reported quarterly by crop reporters. U. S. estimates affected by portance of rates in particular regions; see table 256.³ Includes farm operators doing one or more hours of farm work and members of their families doing 15 hours or more of unpaid farm work during survey week.⁴ Includes all persons doing one or more hours of farm work for pay during survey week. Members of operators families doing any farm work for cash wages are counted as hired workers.⁵ New series of wage rates began in 1948; for description of series, see *Farm Labor*, Dec. 1949.Source: Department of Agriculture, Agricultural Marketing Service; monthly report, *Farm Labor*.

No. 262.—DETAILED OCCUPATION OF EMPLOYED PERSONS, BY SEX: 1950—Contd

OCCUPATION	Male	Female	OCCUPATION	Male	Female
Craftsmen, etc.—Con.			Operatives, etc.—Con.		
Millers, grain, flour, feed, etc.	9,534	67	Mine operatives and laborers (n. e. c.)—Continued		
Millwrights	57,705	241	Mining and quarrying, except fuel	105,736	
Molders, metal	59,879	667	Motormen, mine, factory, logging camp, etc.	23,637	
Motion picture projectionists	25,625	482	Motormen, street, subway, and elevated railway	26,190	
Opticians, and lens grinders and polishers	16,643	2,518	Oilers and greasers, except auto.	57,842	
Painters, construction and maintenance	381,994	8,091	Painters, except construction and maintenance	103,325	
Paperhangers	17,994	2,941	Photographic process workers	15,556	
Pattern and model makers, except paper	34,663	1,204	Power station operators	20,642	
Photoengravers and lithographers	27,449	1,062	Sailors and deck hands	39,533	
Piano and organ tuners and repairmen	7,478	266	Sawyers	91,835	
Plasterers	59,819	492	Spinners, textile	20,239	
Plumbers and pipe fitters	275,892	1,972	Stationary firemen	120,742	
Pressmen and plate printers, printing	46,998	2,126	Switchmen, railroad	60,837	
Rollers and roll hands, metal	29,700	659	Taxicab drivers and chauffeurs	198,681	
Roofers and slaters	44,126	237	Truck and tractor drivers	1,321,131	
Shoemakers and repairers, except factory	54,969	2,149	Weavers, textile	59,316	
Stationary engineers	212,504	1,434	Welders and flame-cutters	250,890	
Stone cutters and stone carvers	8,477	226	Operatives and kindred workers (n. e. c.)	3,741,370	2,141
Structural metal workers	48,963	267	Manufacturing	3,190,517	2,141
Tailors and tailresses	66,435	16,048	Durable goods	1,773,109	
Tinsmiths, coppermiths, and sheet metal workers	121,660	1,163	Sawmills, planing mills, and misc. wood products	169,200	
Toolmakers, and die makers and setters	151,587	1,059	Sawmills, planing mills, and mill work	137,605	
Upholsterers	55,942	5,219	Misc. wood products	31,593	
Craftsmen and kindred workers (n. e. c.)	68,385	1,124	Furniture and fixtures	97,561	
Members of the Armed Forces			Stone, clay, and glass products	135,397	
Operatives and kindred workers	8,127,433	3,018,787	Glass and glass products	50,563	
Apprentices	112,053	3,168	Cement, and concrete, gypsum, and plaster products	27,511	
Auto mechanics	3,546	147	Structural clay products	17,198	
Bricklayers and masons	6,122	22	Pottery and related products	19,157	
Carpenters	9,890	82	Misc. nonmetallic mineral and stone products	20,968	
Electricians	8,776	78	Metal industries	431,352	
Machinists and toolmakers	15,126	159	Primary metal industries	239,586	
Mechanics, except auto	5,822	460	Blast furnaces, steel works, and rolling mills	120,723	
Plumbers and pipe fitters	11,387	533	Other primary iron and steel industries	65,530	
Building trades (n. e. c.)	3,967	30	Primary nonferrous industries	53,333	
Metalworking trades (n. e. c.)	6,551	71	Fabricated metal industries (incl. not spec. metal)	191,766	
Printing trades	14,817	393	Fabricated steel products	171,238	
Other specified trades	12,130	472	Fabricated nonferrous metal products	17,871	
Trade not specified	13,919	721	Not spec. metal industries	2,657	
Asbestos and insulation workers	14,791	405	Machinery, exc. electrical	282,084	
Attendants, auto service and parking	229,381	6,633	Agricultural machinery and tractors	46,746	
Blasters and powdermen	10,818	91	Office and store machines and devices	24,607	
Boatmen, canalmen, and lock keepers	7,901	203	Misc. machinery	210,731	
Brakemen, railroad	78,123	304	Electrical machinery, equipment, and supplies	154,615	1
Bus drivers	150,058	4,951	Transportation equipment	361,247	
Chainmen, rodmen, and axmen, surveying	6,789	163	Motor vehicles and motor vehicle equipment	280,218	
Conductors, bus and street railway	11,073	208	Aircraft and parts	54,464	
Deliverymen and routemen	234,281	4,270	Ship and boat building and repairing	12,260	
Dressmakers and seamstresses, except factory	3,809	134,310			
Dyers	23,167	1,043			
Files, grinders, and polishers, metal	141,021	6,703			
Fruit, nut, and vegetable graders and packers, excl. factory	11,451	17,294			
Furnacemen, smeltermen, and pourers	54,153	1,239			
Heaters, metal	8,854	416			
Laundry and dry cleaning operatives	140,802	287,533			
Meat cutters, except slaughter and packing house	167,153	3,471			
Milliners	1,305	11,034			
Mine operatives and laborers (n. e. c.)	568,684	4,713			
Coal mining	360,789	1,313			
Crude petroleum and natural gas extraction	102,159	452

No. 262.—DETAILED OCCUPATION OF EMPLOYED PERSONS, BY SEX: 1950—Conti

OCCUPATION	Male	Female	OCCUPATION	Male	Fe
Laborers, except farm and mine	3,290,253	126,979	Laborers, etc.—Con.		
Fishermen and oystermen	66,572	969	Laborers (n. e. c.)—Continued		
Garage laborers, car washers and greasers	62,859	2,223	Manufacturing—Nondurable goods—Continued		
Gardeners, except farm, and groundskeepers	142,227	3,292	Food and kindred products—Continued		
Longshoremen and stevedores	62,003	666	Canning and preserving fruits, vegetables, and sea foods	16,211	
Lumbermen, raftsmen, and wood choppers	170,495	1,580	Grain-mill products	17,940	
Teamsters	20,851	314	Bakery products	7,582	
Laborers (n. e. c.)	2,765,246	117,935	Confectionery and related products	3,073	
Manufacturing	1,023,986	67,454	Beverage industries	21,976	
Durable goods	656,618	20,621	Misc. food preparations and kindred products	16,876	
Sawmills, planing mills, and misc. wood products	152,276	3,905	Not specified food industries	2,402	
Sawmills, planing mills, and mill work	137,582	2,316	Tobacco manufactures	5,417	
Misc. wood products	14,694	1,589	Textile mill products	51,813	
Furniture and fixtures	18,331	1,405	Knitting mills	1,956	
Stone, clay, and glass products	74,662	3,047	Dyeing and finishing textiles, excl. knit goods	2,870	
Glass and glass prod.	13,019	1,252	Carpets, rugs, and other floor coverings	5,292	
Cement, and concrete, gypsum, and plaster products	21,611	183	Yarn, thread, and fabric mills	38,682	
Structural clay prod.	25,977	656	Misc. textile mill products	3,013	
Pottery and related products	5,621	706	Apparel and other fabricated textile products	6,510	
Misc. nonmetallic mineral and stone prod.	8,434	250	Apparel and accessories	4,562	
Metal industries	255,548	8,017	Misc. fabricated textile products	1,948	
Primary metal industries	204,266	2,834	Paper and allied products	40,946	
Blast furnaces, steel works, and rolling mills	131,043	1,481	Pulp, paper, and paperboard mills	26,412	
Other primary iron and steel industries	47,859	762	Paperboard containers and boxes	7,599	
Primary nonferrous industries	25,364	591	Misc. paper and pulp products	6,935	
Fabricated metal industries (incl. not spec. metal)	51,282	5,183	Printing, publishing, and allied industries	9,963	
Fabricated steel prod.	46,346	4,648	Chemical and allied prod.	60,526	
Fabricated nonferrous metal products	4,131	479	Synthetic fibers	2,848	
Not specified metal industries	805	56	Drugs and medicines	1,568	
Machinery, exc. electrical	51,416	1,979	Paints, varnishes, and related products	4,259	
Agricultural machinery and tractors	12,432	387	Misc. chemicals and allied products	51,851	
Office and store machines and devices	1,482	136	Petroleum and coal products	28,677	
Misc. machinery	37,502	1,456	Petroleum refining	23,174	
Electrical machinery, equipment, and supplies	24,640	4,901	Misc. petroleum and coal products	5,503	
Transportation equip.	63,481	2,659	Rubber products	13,893	
Motor vehicles and motor vehicle equip.	43,629	2,188	Leather and leather products	10,976	
Aircraft and parts	3,359	192	Leather: tanned, curried, and finished	5,959	
Ship and boat building and repairing	11,873	141	Footwear, except rubber	3,655	
Railroad and misc. transportation equip.	4,620	138	Leather products, except footwear	1,362	
Professional and photographic equipment and watches	3,622	755	Not specified manufacturing industries	8,031	
Professional equipment and supplies	2,057	443	Nonmanufacturing industries (incl. not reported)	1,741,260	
Photographic equipment and supplies	925	125	Construction	649,341	
Watches, clocks, and clockwork-operated devices	640	187	Railroads and railway express service	256,389	
Misc. manufacturing industries	12,642	2,953	Transportation, except railroad	102,188	
Nondurable goods	359,337	36,812	Telecommunications, and utilities and sanitary services	124,132	
Food and kindred prod.	130,616	10,836	Wholesale and retail trade	295,363	
Meat products	31,033	3,125	Business and repair services	12,864	
Dairy products	13,523	682	Personal services	65,528	
			Public administration	95,693	
			All other industries (incl. not reported)	139,762	
			Occupation not reported	458,229

No. 264.—INDEXES OF OUTPUT PER MAN-HOUR FOR MANUFACTURING: 1939 TO 1953

1947=100. Physical output per man-hour is the relationship between production in physical units and man-hours used in production. Indexes of output per man-hour are obtained by dividing indexes of production by indexes of man-hours. Net output per man-hour is the relationship between value added by manufacture (at fixed prices) and man-hours. For the method of computing the indexes and base weight determinations, see Bureau of Labor Statistics Report No. 100]

ITEM	1939	1949	1950	1951	1952	1953
Physical output per man-hour:						
Current-year weights:						
Manufacturing, total.....	96.0	108.6	117.7	117.5	119.1	122.7
Nondurable goods.....	98.8	105.9	112.5	114.7	116.9	120.1
Durable goods.....	92.9	111.0	122.0	119.6	120.6	124.5
Base-year weights:						
Manufacturing, total.....	93.2	107.2	114.3	115.2	116.3	119.6
Nondurable goods.....	97.8	105.4	111.5	113.2	115.4	118.3
Durable goods.....	90.1	108.5	116.8	117.0	117.2	120.7
Net output per man-hour:						
Manufacturing, total.....	88.7	105.5	119.9	116.2	117.7	122.4
Current-year prices.....		106.3	114.1	117.3	119.1	122.5

¹ For 1929 and 1933, covers almost all industries; for 1935 to 1950, represents 6 principal industries (bituminous coal; anthracite; crude petroleum, natural gas and natural gasoline; iron; copper; and lead and zinc), representing 99 percent of total employment.

² Refers to Class I line-haul railroads.

³ Output per employee. Covers principal wire-telephone and ocean-cable carriers.

⁴ Refers to Class A telephone carriers.

⁵ In general, changes for 1949 and later years from those shown in 1955 *Abstract* result from substitution of Census of Manufactures annual man hour data for Bureau of Labor Statistics man-hour data previously used. No changes occur for years prior to 1949.

⁶ Significantly changed from series previously shown as a result of introduction of new products (non-cellulosic fibers other than nylon).

No. 266.—HOURLY AND WEEKLY EARNINGS AND WEEKLY HOURS OF PRODUCTION WORKERS IN MANUFACTURING INDUSTRIES: 1940 TO 1957

[Net spendable average weekly earnings represent average gross earnings less social security and income taxes for which specified worker is liable. These net spendable earnings are then divided by the BLS consumers' price index adjusted to an average 1947-49 base, to obtain net spendable earnings in 1947-49 dollars. Overtime is defined as work in excess of 40 hours per week and paid for at time and one-half. Computation of average hourly earnings exclusive of overtime makes no allowance for special rates of pay for work done on holidays. See also *Historical Statistics*, series D 117-119]

YEAR	GROSS AVERAGE WEEKLY EARN- INGS		NET SPENDABLE AVERAGE WEEKLY EARNINGS				Average weekly hours	AVERAGE HOURLY EARNINGS		
			Worker with no dependents		Worker with 3 dependents			Gross amount	Excluding overtime

—HOURS AND GROSS EARNINGS OF PRODUCTION WORKERS OR NONSUPERVISORY EMPLOYEES, BY INDUSTRY 1950, 1955, AND 1956

Based upon reports from cooperating establishments covering both full- and part-time employees who are, or received pay for, any part of the pay period ending nearest the 15th of the month. For manufacturing, laundries, and cleaning and dyeing plants, data refer to production and related workers. For contract construction industries, data relate to employees engaged in actual construction work. For other industries, data relate to nonsupervisory employees and working supervisors.]

NO. 272.—INDEXES OF UNION WAGE RATES AND WEEKLY HOURS IN SELECTED TRADES: 1945 TO 1956

[1947-49 average=100, except for printing where 1948-49 average=100. Data for 1953 to 1956 were collected as of July 1 and cover 53 cities in printing and 52 in the other trades. From 1948 to 1952, however, data were collected as of October 1 for streetcar and bus operators; printing data for 1948 were collected as of January 2. Relative rates are percentages which indicate changes in minimum hourly wage scales. Relative hours are percentages showing changes in straight-time weekly hours, account not being taken of loss of time from slack work or other causes, nor of overtime work. Year-to-year changes in union scales are based on comparable quotations for each trade weighted by membership for current year. For indexes based on 1939=100, see *Historical Statistics*, series D 152-163.]

No. 273.—MONTHLY LABOR TURNOVER RATES (PER 100 EMPLOYEES) IN MANUFACTURING INDUSTRIES: 1945 TO 1956

[Month-to-month employment changes as indicated by labor turnover rates are not precisely comparable to those in table 246, as the former are based on data for entire month while the latter refer to a one-week period ending nearest middle of month. Data refer to wage and salary workers. The turnover sample is not so extensive as that of the employment survey—proportionately fewer small plants are included; printing and publishing, canning and preserving, and several other industries are not covered]

1953	3,825	18.9	1,900	4.3	33,100	0.29	17.4

Workers counted more than once if involved in more than one stoppage during year.

¹ Employed workers for 1933-1950 refers to all workers except those in occupations and professions in which little if any union organization or in which stoppages rarely if ever occur. In 1951, concept was changed side with the Bureau's figures for nonagricultural employment, excluding Government but including in all occupational groups. Tests show that percentage of total idleness computed on basis of these new usually differs by less than one-tenth of a point while percentage of workers idle differs by about 0.5 or point.

² Estimated working time computed by multiplying average number of employed workers (see footnote 2) by number of days worked by most employees.

281.—WORK STOPPAGES—MAJOR ISSUES INVOLVED AND DURATION: 1954 TO 1956

Footnote, table 280. Data by issues based on stoppages beginning in year; duration data based on stoppages ending in year. See also *Historical Statistics*, series D 230-238]

FIG. XIV.—FEDERAL GOVERNMENT EXPENDITURES FOR MAJOR NATIONAL SECURITY FUNCTIONS AND VETERANS' SERVICES AND BENEFITS, IN RELATION TO TOTAL FEDERAL BUDGET EXPENDITURES: 1941 TO 1958

[See table 284]

Source: Chart prepared by Department of Commerce, Bureau of the Census. Data are from Bureau of the Budget.

Section 9

Military Services and Veterans Affairs

This section presents statistics relating to national defense, several measures of its human and financial costs, and indicators of military personnel, ships, aircraft, and Selective Service operations. Also included are statistics on the various programs and benefits sponsored by the Federal Government for veterans. The principal sources of these data are the Department of Defense, Office of Secretary of Defense; annual reports of the separate Departments of the Army, Navy, and Air Force; the Selective Service System; the *Annual Report of the Administrator of Veterans Affairs*, Veterans Administration; the *Budget of the United States Government* issued by the Bureau of the Budget; and *Health of the Army* issued monthly by the Office of the Surgeon General.

Department of Defense.—Until 1947 the Army, Navy, and Air Force operated under independent jurisdiction answering only to the Commander-in-Chief, the President of the United States. In 1947, as a result of the passage of the National Security Act, a new executive department was established, the National Military Establishment. This department was organized to provide for the coordination and unified direction of the Army, Navy, and Air Force under a civilian Secretary of Defense. The Army, Navy, and Air Force, however, were not merged. Each remained separately administered and retained its individual Department status. Amendments to the National Security Act in 1949 added new powers to the Secretary of Defense and redesignated the National Military Establishment as the Department of Defense.

Selective Service.—The Selective Service System is responsible for the registration, examination, classification, selection, and delivery for induction into the Armed Forces of all men required to register under the Universal Military and Training Act, as amended. The act requires the registration of all men who are in the United States between the ages of 18 and 26, and makes those between 18½ and 26 years old liable for service in the Armed Forces. Aliens admitted for temporary residence, however, are not liable for service until they have remained in this country for a period exceeding one year. Deferred persons remain liable for service until they attain 35 years of age. Conscientious objectors who are found to be opposed to any service in the Armed Forces are required to perform civilian work in lieu of induction into the Armed Forces. The act also provides exemptions or deferments from service for many persons for reasons of previous service, essential occupation, etc.

Veterans Administration.—The Veterans Administration administers laws authorizing benefits for eligible former and present members of the Armed Forces and for the dependents and other beneficiaries of deceased former members of such forces. Veterans' benefits available under various acts of Congress include: Compensation for service-connected disability or death; pension for nonservice-connected disability or death; vocational rehabilitation for service-connected disability; education and training; guaranty or insurance of home, farm, and business loans; readjustment allowances for unemployment or self-employment; U. S. Government and National Service Life Insurance; servicemen's indemnity in lieu of insurance; hospitalization; domiciliary care; outpatient medical and dental care for service-connected disability; prosthetic and other appliances; special housing for certain seriously disabled veterans; automobiles or other conveyances for certain disabled veterans; and burial allowances.

Note.—This section presents data for the most recent year or period available on March 7, 1957, when the material was organized and sent to the printer. In a few instances more recent data were added later.

NO. 284.—FEDERAL GOVERNMENT EXPENDITURES FOR MAJOR NATIONAL SECURITY FUNCTIONS AND VETERANS' SERVICES AND BENEFITS, IN RELATION TO TOTAL FEDERAL BUDGET EXPENDITURES: 1915 TO 1958

[In millions of dollars. For years ending June 30. Includes expenditures of agencies other than the Department of Defense and Veterans Administration, for activities primarily related to major national security and veterans' programs. Excludes expenditures for programs which, though closely related to major national security or veterans' services, have a primary relationship to other categories of the functional classification (see table 440). Total budget expenditures have been revised to exclude payments to the railroad retirement trust account other than military service credits. Functional classification revisions for major national security have been carried back through 1939. For further detail as to classification of particular items in 1956, 1957, and 1958, see Special Analysis C of the *Budget of the United States, 1958*, pp. 1076-1084.]

No. 288.—CIVIL DEFENSE—FEDERAL FUNDS OBLIGATED IN THE FEDERAL CONTRIBUTIONS PROGRAM, BY PROGRAM: 1952 TO 1957

(In thousands of dollars. Represents funds obligated against a specified appropriation, not necessarily in a given fiscal year. In later years, the funds are obligated against a given appropriation over a 2-year period. Federal funds are obligated to help the State and local governments acquire civil defense materials and equipment. Federal contributions are made on the basis of project applications submitted by the States and approved by the Civil Defense Administration. States and territories generally are required to match Federal funds on an equal basis. For Alaska the matching ratio is 70 percent Federal and 30 percent local)

1 Includes Philippine Scouts; excludes contract surgeons. Data for 1930-47 include personnel in Army Air Forces and its predecessors (Air Service and Air Corps). For 1948 includes 5,419, and for 1949 includes 119, Air Force personnel assigned to Army command; excludes Army personnel assigned to Air Force command. Beginning 1950, commands entirely of Army Department personnel, since Air Force Department personnel no longer assigned to U. S. Army organizations.

2 Nurse Corps included with officers.

3 Includes Army personnel assigned to Air Force command; excludes Air Force personnel assigned to Army command.

4 Includes 9,787 Army personnel in training for subsequent assignment to Air Force commands.

5 Number of women in services 1925 to 1940 relatively small.

¹ Union forces only. Estimates of the number serving in the Confederate forces range from 600,000 to 1,500,000.

² Covers period Dec. 1, 1941 to Dec. 31, 1946.

³ Based upon information available as of Sept. 30, 1954.

⁴ Covers period Apr. 21 to Aug. 13, 1898.

⁵ Includes Air service.

⁶ Includes Army Air Corps.

⁷ Not available.

⁸ Based on Army and Marines only.

⁹ Excludes Navy. See footnote 10.

¹⁰ Covers period July 1950 through January 1955. Represents Far East area only.

¹¹ During hostilities only.

¹² Covers war personnel who departed from continental U. S. through December 1898.

¹³ For periods covered, see footnotes 2, 3, 4, and 10.

¹⁴ Includes gassed in action; Army data includes casualties in northern Russia to Aug. 25, 1919, and in Siberia to Apr. 1, 1920. Marine data represent casualties in Europe only.

¹⁵ Excludes personnel lost in sinking of the *Maine*, which occurred 2 months before hostilities.

¹⁶ Includes casualties incurred in October 1941, due to hostile action.

¹⁷ Covers only Army personnel base of 1,908,800.

¹⁸ Covers only Army personnel base of 246,410.

¹⁹ Covers only Army personnel base of 3,665,000.

²⁰ Covers all services base of 9,370,966.

²¹ Covers all services base of 4,428,939.

¹ Under amendments of June 19, 1951, to Universal Military Training and Service Act, age of military liability was extended to 35 years for certain specified kinds of registrants.

² Legally exempted registrants; no longer liable for service because of age. See also footnote 1.

³ Cumulative since inception of Universal Military Training and Service Act, as amended, September 1948.

⁴ Includes enlistments and deferments between time of preinduction examination and notice of induction.

⁵ Cumulative net credits resulting from inductions plus home address reports minus separation reports, as reported by the Armed Forces September 1948 through June 1956. Each State is credited with its inductions as well as its enlistments and reserves called to active duty. Because of time lag in reporting to local boards, credits given for each State are not necessarily in complete accord with present strength of Armed Forces contributed by that State.

Other wars and Regular Establishment ⁵	167	159	152	143	135	128

¹ Excludes persons who served in the Armed Forces only in peacetime (Regular Establishment) unless they were receiving Veterans Administration compensation for service-connected disability. A small but unknown number of persons with service in two or more periods prior to the Korean Conflict are included more than once. Veterans with service both in World War II and the Korean Conflict are counted only once.

² Estimated cumulative returns to civil life since June 27, 1950, of all persons who served in the Armed Forces of the United States between that date and January 31, 1955 (including persons who had also served in World War II), less estimated deaths out of service and less estimated returns to active duty from civil life.

³ Estimated cumulative returns to civil life since September 16, 1940, of all persons who served in the Armed Forces of the United States between that date and July 25, 1947 (including persons who also served in the Korean Conflict), less estimated deaths out of service and less estimated returns to active duty from civil life.

⁴ Estimated by application of appropriate survival rates to the 1918 age distribution of World War I participants. ⁵ Includes veterans of Civil War, Indian Wars, Spanish-American War. Only former members of Regular Establishment (peacetime service only) who are receiving Veterans Administration compensation for service-connected disability are included. Spanish-American War totals estimated by application of appropriate survival rates to the 1902 age distribution of living Spanish-American War participants.

¹ \$53,935,556,396 was paid from appropriations and \$15,318,338,934 from trust and working funds.

² War of the Revolution, \$70,000,000; War of 1812, \$46,218,391; Indian Wars, \$112,285,583; Mexican Wars, \$61,794,591; unclassified, \$16,513,426; Korean Conflict, \$540,832,243; \$274,639 for participants in yellow fever experiments, 1932-54.

³ Includes a cumulative adjustment for prior years of \$225,715,729.

⁴ Amount transferred by voucher to NSLI trust fund for payment of claims traceable to extra hazards of military or naval service and certain direct payments. ⁵ Includes special dividend, 1950 to 1956.

⁶ Includes amounts reimbursed to U. S. Government Life Insurance fund on account loans made from that fund.

⁷ Includes \$3,804,866,799 in readjustment allowances for unemployment and self-employment.

⁸ Includes expenditures from funds allotted under National Recovery Act of 1933, Public Works Administration Act of 1938 and Grants to Republic of Philippines for construction and equipping of hospitals for fiscal years 1952 to 1956. Also includes amounts transferred to the Department of the Army, Corps of Engineers, for the construction of hospitals for the years 1946 to 1953.

⁹ Includes salaries and other administrative costs. Also includes fees for counseling of veterans; partial benefit payments made under Public Laws 16 and 346 for fiscal years 1944-47; reimbursement to States for administrative expenses, and expenditures under Federal Tort Claims Act. Medical, hospital, and domiciliary services costs included beginning 1932; expenditures for State and Territorial Homes included beginning 1934.

¹⁰ Comprises expenditures for medical, hospital, and domiciliary services prior to 1932; National Home for Disabled Volunteer Soldiers and State and Territorial Homes prior to 1934; payments for subsistence, tuition, supplies, and equipment under Public Laws 16 and 346; burial allowances; homes for paraplegics; automobiles and other conveyances for disabled veterans; vocational training (World War I); allotments and allowances; marine and seamen's allowances; operation of Civil Service and Canal Zone retirements and disability systems to August 31, 1934; Servicemen's Indemnities; Veterans' Special Term Insurance; Service Disabled Veterans' Insurance; education and training allowance under Public Law 50 (see table 304); direct loans to veterans' supply fund; and other miscellaneous expenditures.

¹¹ Include adjustment for prior years of \$69,935,268. ¹² Includes adjustment for prior years of \$27,409.

¹ Deceased veterans whose dependents were receiving compensation or pension benefits.

² Beginning 1944, excludes any increased compensation for vocational rehabilitation subsistence allowance under Public Laws 16 and 894. ³ For expenditures by wars, see table 303.

⁴ Averages calculated by dividing total annual value of benefits, as of June 30, by number on rolls.

⁵ Veterans with service during period June 27, 1950-Jan. 31, 1955.

¹ Fund is administered as a trust fund for benefit of policyholders and their beneficiaries. All premiums collected on insurance issued and all interest earned thereon are paid into the fund; disbursements are made from the fund for death claims, dividends, and other benefits. Government, however, bears cost of administration of this fund in addition to expenses for certain types of losses.

² Nonparticipating insurance for disabled veterans for whom good health provisions are waived because of disabilities resulting from active service between October 8, 1940, and September 2, 1945.

³ For veterans discharged on or after April 25, 1951, with service-connected disability which would be compensable, if 10 percent or more in degree.

⁴ For veterans who were entitled to indemnity protection under the Servicemen's Indemnity Act of 1951 and who were ordered to active service for a period in excess of 30 days; no medical examination required. Issued only on the 5-year renewable nonconvertible term plan.

No. 309.—VETERANS RECEIVING HOSPITAL OR DOMICILIARY CARE AUTHORIZED BY VETERANS ADMINISTRATION: 1932 TO 1956

[For years ending June 30. During 1956, 3,916,000 visits were made by veterans to staff or fee physicians for outpatient medical care and a daily average of 8,700 veterans were domiciled in State and Territorial homes. For each person, Federal Government reimbursed these States at rate of \$120 per year through August 1939, \$240 per year through December 17, 1943, \$300 per year through May 31, 1948, and \$500 per year thereafter]

Section 10

Social Insurance and Welfare Services

This section presents data related to governmental programs for old-age and survivors insurance, public and railroad employee retirement, unemployment and disability insurance, aid to the needy, and maternal, child, and other welfare services. Also included here are financial data relating to the American Red Cross, the Community Chest, and philanthropic trusts and foundations.

There are several principal sources for these data. The *Social Security Bulletin*, an official monthly publication of the Department of Health, Education, and Welfare, presents current data on many of these programs and summarizes annual data for them in a statistical supplement published each year. A large volume of statistics flows from employers' wage reports submitted under the Social Security Act and used in the accounting operations of the Bureau of Old-Age and Survivors Insurance. Information on workers and beneficiaries and on establishments, employment, and payrolls covered by this Act is published in detail in the Social Security Administration's *Handbook of Old-Age and Survivors Insurance Statistics*. Establishment data showing employment and payrolls, by industry, for counties, are also available in the cooperative report of the Bureau of the Census and the Social Security Administration, *County Business Patterns*. Current data on employment security activities are published monthly in the Department of Labor's *Labor Market and Employment Security* and its supplements. Data on retirement and other benefits for railroad workers are published by the Railroad Retirement Board in its *Monthly Review and Annual Report*.

Social insurance for industrial and commercial workers.—Social insurance programs established by the Social Security Act provide protection against wage loss resulting from old age, prolonged disability, death, or unemployment. Beginning 1957, under old age, survivors, and disability insurance, protection against wage loss due to old age, disability, or death is available to nearly all the gainfully employed (excluding chiefly self-employed doctors of medicine and most civilian employees of the Federal Government).

Old-age, survivors, and disability insurance provides monthly retirement benefits to fully insured workers at 65 or over (or, for women workers, at age 62 if they elect to receive a reduced benefit) and supplementary benefits to their wives, if they are aged or have a child of the earner in their care, to aged dependent husbands, and to dependent children under age 18, or older, if the child has a disability that began before 18. Monthly survivor benefits are payable to certain dependents of fully or currently insured workers. Monthly disability benefits are payable to fully and currently insured workers between the ages of 50 and 65 with a disability that meets the definition in the Act. A lump-sum death payment is made in the case of all insured deaths.

Covered workers and their employers each pay contributions of 2½ percent on the worker's wages, not counting amounts above the first \$4,200 in a year. The rate is scheduled to rise by steps until it reaches 4¼ percent each in 1975. Self-employed persons pay 1.5 times the employee rate. An amount equal to the contributions collected is appropriated for deposit in the old-age and survivors insurance trust fund, from

Note.—This section presents data for the most recent year or period available on March 7, 1957, when the material was organized and sent to the printer.

which benefits and administrative costs are paid. One-fourth of 1 percent of the contributions collected from employees and employers and $\frac{1}{4}$ of 1 percent of the contributions from the self-employed are allocated to a separate disability trust fund, from which the costs of the disability benefits are paid.

Both unemployment insurance and the public employment (placement) service are administered through the Bureau of Employment Security of the Department of Labor and a State employment security agency in each State or Territory. Under agreements with the Secretary of Labor, the State agencies also administer unemployment compensation for eligible veterans and for Federal employees.

State unemployment insurance laws pay benefits to unemployed covered workers who meet the qualifying conditions specified in the State law. In most States, a waiting period of 1 week must be served before payments begin. Benefits are payable for a maximum number of weeks, ranging from 16 to 30 weeks among the States; maximum weekly benefits without dependents' allowances range from \$25 to \$45 under the several State laws. In 11 States maximum allowances for dependents ranging from \$3 to \$25 raise the range of maximum augmented benefits to \$30 to \$70.

Under the Federal Unemployment Tax Act, a 3-percent tax is levied on the payroll of employers of 4 or more workers in industries covered by the Act, although smaller employers are also covered by some State laws. Principal industries excluded from coverage, as of January 1956, are agriculture, State and local government, domestic service, nonprofit organizations, and railroads (see below). Employers subject to the Federal law are allowed a credit offset of 90 percent of the Federal tax, or 2.7 percent of taxable payrolls, for contributions paid to State agencies under State unemployment insurance laws. The Federal Government, therefore, collects only 0.3 percent. The Congress appropriates funds each year to cover administrative costs of the employment security system.

The standard rate of contributions payable by employers in all States is 2.7 percent of the first \$3,000 a year paid to an employee (except in Alaska, Delaware, Nevada, Oregon, and Rhode Island, where the 2.7 percent applies to the first \$3,600). All States may adjust employer contribution rates according to individual employer experience with the risk of unemployment. Contributions collected by States are deposited to State accounts in the Federal Unemployment Trust Fund, from which States withdraw amounts needed for benefit payments.

Social insurance for railroad workers.—The social insurance programs administered by the Railroad Retirement Board under the Railroad Retirement Act and Railroad Unemployment Insurance Act cover employees of railroads or companies and organizations affiliated with railroad transportation, including the Railway Express Agency and the Pullman Company.

The Railroad Retirement Act provides retirement annuities for aged and disabled workers and for wives of retired employees, and benefits to survivors of deceased workers. The credits of employees who die or retire with less than 10 years of railroad service are transferred to old-age and survivors insurance under the Social Security Act. Funds for the retirement and survivor system come from a tax on earnings up to \$350 a month under the Railroad Retirement Tax Act. The tax, divided equally between the employer and employee, is now at the maximum rate of $12\frac{1}{4}$ percent.

The Railroad Unemployment Insurance Act provides benefits for unemployment and sickness, including maternity. The unemployment insurance program is financed entirely by contributions from covered employers, paid directly to the Board. The contribution rate for any year depends upon the balance in the unemployment insurance account and may vary from $\frac{1}{2}$ to 3 percent of payrolls (exclusive of individual earnings in excess of \$350 a month). At the present time, the contribution rate is $1\frac{1}{2}$ percent.

Social insurance for Federal Government employees.—One contributory retirement system for Federal civilian employees and two noncontributory systems for special classes of employees are administered by the Civil Service Commission. In addition, there are separate retirement systems in operation for the uniformed services (supplementing old-age and survivors insurance under which they are covered on a contributory basis) and for special classes of Federal employees.

The Civil Service Retirement Act provides for age, optional, disability, and discontinued service annuities for employees in the executive, judicial, and legislative branches of the United States Government and in the municipal government of the District of Columbia if not subject to another retirement system or excluded by executive order. It also provides annuities for the widows and minor children of deceased employees, and under certain conditions to the survivors of deceased annuitants. The employee contribution rate, computed on base pay, was increased from 6 percent to 6½ percent in October 1956, at which time liberalized benefit provisions became effective. Beginning in July 1957, employing agencies pay into the Retirement Fund amounts equal to the contributions of their employees.

Workmen's compensation.—All States now have programs providing protection against work-connected injuries and deaths. In addition to the State laws, there are Federal workmen's compensation laws covering employees of the Federal Government, private employees in the District of Columbia, and longshoremen and harbor workers. Most of the State workmen's compensation laws exempt such employments as agriculture, domestic service, and casual labor; the majority exempt employers who have fewer than a specified number of employees. Occupational diseases, or at least specified diseases, are compensable under most laws.

In most States total payments to injured workers or to survivor families are limited as to time, amount, or both. All compensation acts require that medical aid be furnished to injured employees; in about one-third of the laws there are either duration or cost limitations—or both—on the amount of medical benefits provided.

Public assistance.—Public assistance is provided through five major programs, all administered by the States and localities. Payments to four groups of needy persons—the aged, the blind, the permanently and totally disabled, and children whose need arises from certain causes—are financed in part from Federal funds granted to States under the Social Security Act. The Federal aspects of these programs are the responsibility of the Bureau of Public Assistance of the Social Security Administration. Aid to other needy persons is furnished for the most part through general assistance, toward which the Federal Government makes no contribution.

To receive a Federal grant for assistance payments and administrative expenses under any of the four programs established by the Social Security Act a State must have a plan approved as meeting the requirements of the Federal act. Each State establishes the conditions under which needy people may receive assistance and determines how much they shall receive.

Health and welfare service.—Programs providing health and welfare services are aided through Federal grants to States for maternal and child-health services, services for crippled children, child-welfare services, vocational rehabilitation, and public health services (including water-pollution control, hospital survey and construction, and control of specific diseases). The Children's Bureau, a part of the Social Security Administration, administers the first three of these programs; the others are administered by the Office of Vocational Rehabilitation and the Public Health Service; all are units of the Department of Health, Education, and Welfare.

No. 314.—SOCIAL WELFARE EXPENDITURES UNDER CIVILIAN PUBLIC PROGRAMS 1935 TO 1955

[In millions. Represents expenditures under public law and from trust accounts. Includes administrative expenses and capital outlay for hospitals, public elementary and secondary schools, and publicly owned higher education. Years ending June 30 for Federal Government, most States, and some localities; for States and localities, years cover various 12-month periods ending within year. Data for education and workmen's compensation relate to continental U. S. only; for other programs include some payments for expenditures outside continental U. S. Corrected to October 1956]

YEAR	Total	Social insurance ¹	Public aid	Health and medical services ²	Other welfare services ³	Veterans' programs ⁴	Education	Public housing	Total as percent of gross national product	Total per of gov't exp'ts
1935	\$7,872.0	\$383.7	\$4,057.9	\$641.8	\$113.9	\$449.8	\$2,224.9	-----	11.5

Includes retirement pay of military personnel. Data for administrative expenditures not available for all programs.

Includes unemployment insurance and employment service programs, Federal unemployment compensation and, in 1955, for Federal civilian employees.

Includes benefits and hospitalization and medical benefits, including those under private plans, in the 4 States of New York, California, and administrative expenditures of State agencies. Data on administrative expenditures of private not available.

Includes annuities, burial awards, readjustment allowances, and estimated administrative expenditures.

Expenditures from Government Life Insurance fund.

Includes payments by private insurance carriers, State funds, and self-insurers of benefits payable under State law and State administrative costs.

Includes all medical expenditures of Military Establishment and Atomic Energy Commission; health services for primary and secondary public education; hospital and medical payments and services included in veterans' compensation, State temporary disability insurance, and vocational rehabilitation, and vendor services for medical care included under public aid programs; international health activities; and expenditures for medical services and research subordinate to performance of other functions.

Includes hospital and outpatient care in public institutions and expenditures for maintaining existing facilities.

Veterans Administration expenditures for domiciliary care included under veterans' welfare services.

Includes costs of hospital planning and surveys, new construction, and major repairs; State and local are for construction only.

Includes care for maternal and child health services and services for crippled children.

Includes those made by the U. S. Public Health Service for community health programs, medical research, and in special public health fields and by the Food and Drug Administration. State and local represent community health and sanitation operating expenditures of public agencies, including those for medical and training but excluding those in connection with schools and public welfare, and those classified as medical care.

Includes care for Veterans Administration programs for vocational rehabilitation, automobiles and other for disabled veterans, housing for paraplegic veterans, domiciliary care, beneficiaries' travel, counseling, and guarantees. State and local represent State expenditures for bonus payments and veterans' services; not available.

Includes care for education of the blind and the deaf, the U. S. Soldiers' Home, the U. S. Naval Home, and funds for State soldiers' homes. State and local represent estimated costs of care in welfare institutions, for the handicapped and for long-term chronic care (other than mental and tuberculosis) and other welfare expenditures; local data not fully available, so estimates may be understated.

Includes cash apportionment, value of commodities purchased and distributed under the National School Lunch Act and of surplus commodities distributed under other agricultural programs and, in 1955, \$17.2 for the special school milk program.

Based on the basis of reports from 42 States in 1954 and 43 States in 1955. Includes expenditures for child welfare homes and institutions.

Department of Health, Education, and Welfare, Social Security Administration; *Social Security Bulletin*, Annual Supplement.

¹ Data from Department of Commerce, Office of Business Economics. Total earnings include earnings of self-employed; civilian and military wages and salaries (disbursements) paid in cash and in kind in continental U. S. and pay of Federal civilian and military personnel in all areas.

² Beginning 1954, adjusted for duplication of payrolls covered by old age and survivors insurance and State and local retirement systems.

³ Taxable plus estimated nontaxable wages and salaries. Continental U. S. only, except that railroad payroll includes Alaska and Hawaii. ⁴ Preliminary.

⁵ For 1955, includes payrolls for Federal civilian employees in all areas. ⁶ Not available.

⁷ Payrolls of employers insuring with private carriers, State funds, or self-insured, and Federal programs; excludes railroads.

Self-employment allowances to veterans.....		1.5	(12)	(12)		1.7	(12)	(12)

¹ Average monthly number, except as otherwise noted.

² Includes benefits paid to dependents of retired-worker beneficiaries.

³ For 1940, includes small but unknown number of disability and survivor benefits. Beginning 1954, represents old-age retirement benefits only. In addition to amounts shown, about \$500,000 was paid in disability and survivor benefits to some 370 beneficiaries in 1954 and about \$570,000 to more than 400 beneficiaries in 1955.

⁴ Old-age retirement data include small number and amount of survivor benefits (unknown for 1940 and 1950, less than \$1 million in 1954 to beneficiaries numbering about 1,000 as of June 30, and about \$1.6 million to beneficiaries totaling about 1,500 as of June 30). Includes for 1940, a significant amount of disability payments.

⁵ Benefits for fiscal year (usually ending June 30). Data for 1954 and 1955 preliminary. For survivorship, number represents families.

⁶ Under Veterans Administration. Old-age retirement data are for veterans of Spanish-American War, Boxer Rebellion, and Philippine Insurrection; for 1954 and 1955, all service pensions for this group included. Disability data include pensions and compensation, and subsistence payments to disabled veterans undergoing training. Lump-sum payments are for burials of deceased veterans.

⁷ Not available.

⁸ Monthly survivor payments include a small but unknown amount of lump-sum death payments. Disability benefits exclude payments for medical care. Data for 1954 and 1955 preliminary.

⁹ Benefits payable in only 4 States—in Rhode Island beginning April 1943; in California, December 1946; in New Jersey, January 1949; and in New York, July 1950. Includes maternity data for Rhode Island. Excludes hospital benefits in California and hospital, surgical, and medical care benefits paid under approved plans in New York. Number represents average weekly number of beneficiaries; excludes private-plan beneficiaries in California and New Jersey.

¹⁰ Number represents average number of beneficiaries during 14-day registration period.

¹¹ Average weekly number. Beginning 1955, State unemployment insurance includes payments to unemployed Federal workers made by the States as agents of the Federal Government.

¹² Small number and amount of self-employment allowances included with unemployment allowances.

¹ Total population 65 and over is less than sum of the first 4 major classifications by the number in the fifth: persons with more than 1 major source of income were counted under each appropriate classification and then classified separately. Persons with income from sources specified may also have income from other sources (for example, private pensions or interest, dividends, and other returns on investment).

² Persons with income from more than one program counted only once.

³ Provision for direct payment of benefits to wives of retired employees under the Railroad Retirement Act became effective Nov. 1, 1951.

⁴ Old-age assistance recipients and persons aged 65 and over receiving aid to the blind. Includes small number receiving vendor payments for medical care but no direct cash payment.

¹ Includes insurance contributions, adjusted for refunds, and transfers from general funds equivalent to additional payments arising from extension of survivor insurance protection to certain veterans of World War II.

² Includes profits on marketable investments amounting to \$133,668 in 1949, and \$8,934 in 1950, and beginning 1954, interest transferred from railroad retirement account.

³ Includes administrative expenses, less receipts for sale of surplus material, services, etc. For 1944 and 1945, represents charges against trust fund; administrative expenses, after adjustment for bookkeeping transfers, were about \$30 million in 1944 and \$29 million in 1945. Beginning 1954, includes cost of construction of an office building for Bureau of Old-Age and Survivors Insurance.

⁴ Excludes net adjustment of approximately \$0.8 million which was allocable to prior years.

¹ Distribution by State and type of benefit estimated. Supplementary benefits paid to aged wives, wives under age 65 with child beneficiaries in their care, dependent aged husbands, and children of old-age beneficiaries. Survivor benefits paid to following survivors of deceased insured workers: aged widows, dependent aged widowers, children, widowed mothers or divorced wives with child beneficiaries in their care, or dependent aged parents.

² Distribution by State based on 10-percent sample.

³ Distribution by State based on 10-percent sample; exceeds number of deceased workers with respect to whose earnings records lump-sum death payments were paid. ⁴ Less than 50.

¹ Until January 1945, represents covered employment on last payroll ending in month; thereafter, employment on payroll ending nearest fifteenth of month. Annual figures represent averages of 12 monthly figures.

² Total wages in covered employment for all pay periods ending within period.

³ Wages subject to contributions under State unemployment insurance laws.

⁴ Contributions, penalties, and interest from employers, and contributions from employees. Adjusted for refunds of contributions and for dishonored contribution checks.

⁵ Includes effect of war-risk contributions. ⁶ Not available. ⁷ Represents first payments.

⁸ Data for 1955 and 1956 include program for Federal employees effective January 1, 1955; prior years are for State programs only.

⁹ Annual figures are adjusted, but quarterly figures are not adjusted, for voided benefit checks. For 1947-50 includes small amounts paid to seamen under the Reconversion Unemployment Benefits for Seamen program. Program expired June 30, 1950.

¹⁰ Sum of balances in State clearing account and benefit-payment account, and in State unemployment trust fund account in U. S. Treasury. State unemployment trust fund accounts include interest credited.

¹ Employer becomes subject to State unemployment insurance law when he has employed specified minimum number of workers on at least 1 day in each of specified number of weeks within current or preceding calendar year; coverage provisions shown are in effect for 1954 and 1955.

² Average of 12 monthly figures, each of which is total number of workers in covered employment in pay periods ending nearest 15th of month. ³ Total wages in covered employment for all pay periods ending in year.

⁴ Wages subject to unemployment insurance tax; only the first \$3,000 of an employee's wages from a single employer in a calendar year are taxable. ⁵ And wages of \$100 in any calendar quarter.

⁶ Or 8 in 8 weeks and payroll in excess of \$12,000 in any quarter.

⁷ And wages of \$75 in a calendar quarter. ⁸ Or 25 in 1 week.

⁹ Or 4 in 3 quarters of preceding year with wages of at least \$50 to each of at least 4 workers during each of 3 calendar quarters. ¹⁰ But 8 in 20 weeks for employers located outside the corporate limits of a city, village, or borough of 10,000 or more population. ¹¹ Or wages of \$500 in a calendar year.

¹² Or wages of \$10,000 in any calendar quarter. ¹³ And wages of \$225 in any calendar quarter.

¹⁴ Or 1 at any time and wages of \$450 in a calendar quarter. ¹⁵ And wages of \$500 in same calendar quarter.

¹⁶ Or \$24,000 in a year. ¹⁷ And wages of \$140 in any calendar quarter.

¹⁸ Or wages of \$9,000 in preceding calendar year. Includes employers with wages of \$10,000 in a calendar quarter toward which not more than \$1,000 per employee need be counted.

¹⁹ And wages of \$500 in a calendar year.

¹ Comprises insured unemployment under: (a) State programs; (b) veterans' program exclusive of vet filing at same time under State programs; (c) Federal employee program; and (d) railroad unemployment insurance program, not distributed by State.

² Excludes transitional initial claims; Puerto Rico and Virgin Islands take claims as agents for some States.

³ Represents number of first payments during year; Wisconsin figure represents first payments on "pe employer" basis.

⁴ Includes data for beneficiaries receiving part of their benefits from UCFE programs; not segregable by State.

⁵ Adjusted for voided benefit checks and transfers under interstate combined wage plan.

⁶ For total unemployment.

⁷ Cumulative Oct. 15, 1952, through Dec. 31, 1956.

⁸ Comprises data for beneficiaries receiving all or part of their benefits from Federal employee programs.

⁹ For 2,646,000 compensated weeks; also includes payments to veterans supplementing railroad unemployment program, not distributed by State—2 beneficiaries, 57 compensated weeks, and \$137 (gross) paid in benefit.

¹⁰ For 1,071,000 compensated weeks. ¹¹ Less than 500. ¹² Not applicable.

Source: Department of Labor, Bureau of Employment Security.

¹ Through June 30, 1940, data relate entirely to employees retired voluntarily or involuntarily under various annuity and length-of-service requirements and to employees with at least 5 years of service who became totally disabled for the position occupied prior to eligibility for retirement. Beginning Jan. 1, 1940, certain employees may elect a joint and survivor annuity, and beginning Feb. 29, 1948, widows and minor children of deceased employees and annuitants are eligible for survivor annuities under certain conditions; number of survivor annuities in force as of June 30 increased from 26 in 1941 to 80,749 in 1956. Beginning Jan. 24, 1942, employees with at least 5 years service who separate voluntarily or involuntarily prior to eligibility for retirement may obtain deferred annuity at age 62. Prior to 1952, excludes annuities purchased by voluntary contributions.

² Due to adjustments, number in force at end of fiscal year does not in all cases equal number certified less number terminated in that year, plus number in force at end of preceding fiscal year.

³ Refunds of amounts to employees' credit in fund paid to employees not eligible for an annuity or who, if eligible, elected to take a refund.

⁴ Refunds of amounts to employees' credit paid to designated or other beneficiaries of employees who died in service or after separation.

⁵ Refunds of balance of amount to annuitants' credit at time of death paid to designated or other beneficiaries of annuitants. Includes refunds to disability annuitants, whose entitlement to an annuity was terminated, and unexpended balances paid upon termination of survivor annuities.

No. 340.—WORKMEN'S COMPENSATION PAYMENTS, BY STATES: 1940 TO 1955

[In thousands of dollars. Estimated by Social Security Administration. Payments represent cash and medical benefits and include insurance losses paid by private insurance carriers (compiled from the *Spectator*), net disbursements of State funds (from *Spectator*, *Argus Casualty* and *Surety Chart*, and State reports; estimated for some States), and self-insurance payments (estimated from available State data). Calendar year data, except fiscal year data for Federal employees and for a few States with State funds. Includes benefit payments under Longshoremen's and Harbor Workers' Compensation Act and Defense Base Compensation Act for States in which such payments are made]

¹ Net cash and medical benefits paid during calendar year by private insurance carriers under standard workmen's compensation policies. Data from *Spectator* (*Premiums and Losses by States of Casualty, Surety and Miscellaneous Lines*, 1940 to 1949; thereafter, *Insurance by States of Fire, Marine, Casualty, Surety and Miscellaneous Lines*).

² Net cash and medical benefits paid by competitive and exclusive State funds, and Federal system for Government employees. Compiled from State reports (published and unpublished) and from *Spectator* or other insurance publications; data for fiscal years for some funds.

³ Cash and medical benefits paid by self-insurers, plus value of medical benefits paid by employers carrying workmen's compensation policies that exclude standard medical coverage. Estimated from available State data.

¹ Includes children and 1 parent or other adult in families in which adult was considered in determining amount of assistance.

² Includes 4,311 recipients under 65 in Colorado.

³ Includes 360 recipients of payments made without Federal participation in California, 609 in Missouri, 9,910 in Pennsylvania, and 2 in Washington.

⁴ Partly estimated; total not as large as sum of State figures because of adjustment. See footnote 8.

⁵ Excludes some cases for program not administered by State agency. ⁶ Estimated.

⁷ Excludes cases receiving assistance in kind only and, for a few counties, cases receiving cash payments.

⁸ Includes unknown number of cases receiving medical care, hospitalization, or burial only.

⁹ Data as of November; December data not available.

¹ Includes 35,162 children reported as living in institutions and 10,006 as living elsewhere. Children reported in institutions represent only those children served by workers attached to State or local public welfare agencies and not all children receiving institutional care.

² Includes a number of children for whom whereabouts is unknown. For total, this is less than 1 percent.

³ Report incomplete; includes only counties in which Federal funds for child welfare services are expended.

¹ Estimated.

² Excludes income of chapters.

³ Data for chapter budgets not included; additional expenditures by chapters estimated at approximately \$48,218,000 for year ending June 30, 1956. Activities common to all services, such as stenographic section, files, etc., previously prorated to the various services, are included with "Operating facilities" beginning 1947. Beginning 1950, applicable proportion of cost of telecommunications, duplicating service, insurance, and retirement charged directly to program services.

No. 357.—FOUNDATIONS—DECADE ESTABLISHED AND LATEST RESOURCE CLASS

[Excludes those which have ceased functioning. A foundation is a non-profit legal entity having a principal fund of its own, or receiving charitable contributions of a living founder or founders, which is governed by its own trustees or directors, and which has been established to serve the welfare of mankind. Excludes endowed religious and educational institutions, those which solicit or appeal for endowment or operating funds, and those which conduct a clinical or other local program or benefit solely a single institution or group. Data are admittedly incomplete in coverage with respect to foundations which meet the above specifications. It is estimated that approximately 7,300 are in existence which would qualify for inclusion under these standards.]

¹ Comprises administrative expenses and grants. In those instances where foundations reported grants made and did not report expenditures, the figures were included only in the totals for grants. As a result, total grants for certain States are greater than total expenditures.

Source of tables 357 and 358: Wilmer Shields Rich, *American Foundations and Their Fields* (Seventh Edition) (Copyright 1965 by American Foundations Information Service.)

Section 11

Income, Expenditures, and Wealth

This section presents statistics relating to two different aspects of income and expenditures: Those which in aggregate reflect the entire complex of the Nation's economic activities and the interaction of its major components (the national income and product system and the flow-of-funds system); and those showing the distribution of families and individuals by income size-classes or type of expenditure. It also includes statistics on net worth of families and individuals and on national wealth.

The primary source for national income and product information is the Department of Commerce, Office of Business Economics' monthly *Survey of Current Business*. Each July issue of the *Survey* is identified as the *National Income Number* and contains the most recent and detailed statistics on this subject. Historical data for 1929 to 1953 appear in the 1954 *National Income Supplement to the Survey*.

A further development of the general body of national income data appears in *Income Distribution in the United States, 1944-50*, a supplement to the *Survey*, which presents personal income data classified by income size-groups. More recent data are presented in the *Survey of Current Business* for March 1955 and June 1956.

The primary source for flow-of-funds data is the Board of Governors of the Federal Reserve System; the *Federal Reserve Bulletin* from time to time presents summarized versions of the system. Detailed historical data appear in *Flow of Funds in the United States, 1939-53*.

A primary source for data on distribution of income by size-class is the Bureau of the Census, *Current Population Reports—Consumer Income*, Series P-60. A brief discussion of the Current Population Survey which is the basis for the data in the above report appears in the Technical Note on-page 193 and also on page 2. Another primary source for information in this field is the national Survey of Consumer Finances conducted annually since 1946 for the Board of Governors of the Federal Reserve System by the Survey Research Center of the University of Michigan. This survey consists of a sample of approximately 2,700 family units or 3,000 spending units located in 66 sampling areas. Survey findings are published in the *Federal Reserve Bulletin* and include information regarding debts, instalment credit, purchases, liquid assets, and other financial matters, in addition to income of families.

A national survey of family income, expenditures, and savings was made by the Bureau of Labor Statistics for 1950. Preliminary data for families of two persons or more, showing by cities the average income, family size, and other characteristics, have been published in BLS Bulletin 1097 (Revised), *Family Income, Expenditures, and Savings in 1950*. Final data for this survey appear in *Study of Consumer Expenditures, Income, and Savings* (18 volumes), issued by the Wharton School of Finance and Commerce of the University of Pennsylvania. (See table 373 for selected data from this study.) Family expenditures data for selected cities from 1946 to 1949 have been published in BLS Bulletin No. 1065, *Family Income, Expenditures, and Savings in 10 Cities*.

National income and product.—A synoptic view of the economy is provided by the summary of the Nation's income, expenditure, and saving shown in the form of a balancing set of accounts for the major economic categories—consumers, business, and government. (See table 359.) These statistics assembled by the Council of

Note.—This section presents data for the most recent year or period available on March 19, 1957, when the material was organized and sent to the printer.

Economic Advisers are based on the "national income and product" accounts of the Department of Commerce. An explanation of the items included in this summation may be found in the 1955 *Historical and Descriptive Supplement to Economic Indicators*, 84th Congress, 1st Session.

Gross national product.—Gross national product (called GNP) represents the total national output of goods and services at market prices. It measures this output in terms of the expenditures by which these goods are acquired. These expenditures comprise the purchases of goods and services by consumers and government, gross private domestic investment, and net foreign investment. The goods and services included in GNP are, for the most part, those actually bought for final use (excluding illegal transactions) in the markets. There are a number of inclusions, however, which represent imputed values, the most important of which is the rental value of owner-occupied dwellings. GNP, the total national output, also measures the product attributable to the factors of production—labor and property—supplied by residents of continental United States. GNP differs from "national income," described below, mainly in that GNP includes allowances for depreciation and similar capital consumption and for indirect taxes (such as sales and excise taxes).

National income.—National income is the aggregate of earnings by labor and property from the current production of goods and services by the Nation's economy. It is the sum represented by compensation of employees, proprietors' income, rental income, net interest, and corporate profits. Thus, it measures the total factor costs of the goods and services produced by the economy. Earnings are inclusive of taxes on those earnings.

Personal income.—Personal income is the current income received by individuals, by unincorporated businesses, and by nonprofit institutions (including pension, trust, and welfare funds) from all sources. It includes transfers (payments not resulting from current production) from government and business such as social-security benefits, military pensions, etc., but excludes transfers among persons. Although most of the income is in monetary form, there are important nonmonetary inclusions—chiefly, estimated net rental value to owner-occupants of their homes and the value of food consumed on farms.

Disposable personal income is equal to personal income less taxes on individuals (including income, property, and other taxes not deductible as business expense), and other general Government revenues (e. g., fines, penalties, etc.) received from individuals as individuals.

Flow of funds accounts.—Another synoptic view of the economy is provided by a summary of the flow-of-funds accounts. This system of national accounts presents a record designed to picture the flow of funds through the major sectors of the national economy. The system records all transactions that involve at least two separate economic units (e. g., persons, firms) and that are effected through the use of credit or money. The transactions covered include transactions in financial instruments, existing assets, and transfers of various kinds, as well as transactions involving currently produced goods and services. The purpose of the system is to provide an aid in analyzing the flows of funds through the economy and in relating financial developments in the economy to the flows of income and expenditures.

Distribution of income by size-class.—These statistics are based on data collected in various field surveys of income conducted since 1936. In each of these field surveys trained enumerators interview representative samples of the population with respect to income received during the previous year. The income here referred to is consumer money income for the calendar year and is before deduction of income taxes or social security taxes. Nonmoney items of income are not covered. None of the aggregate income concepts (gross national product, national income, or personal income) is exactly comparable with consumer money income. The nearest approximation is "personal income."

A size distribution of family "personal income" (less amounts received by institutional residents or retained by private trust, pension, health, and welfare funds) is prepared by the Office of Business Economics based on data from consolidated Federal individual income tax returns and the sample data from the surveys mentioned above. These are described in *Income Distribution in the United States, 1944-1950* mentioned above. Detailed statistics, including information on Federal individual income tax liabilities, are available in the March 1955 and June 1956 issues of the *Survey of Current Business*.

Family expenditures and savings.—The Survey of Consumer Expenditures for 1950 was conducted by the Bureau of Labor Statistics in 91 cities and yielded 12,500 usable schedules from families and single consumers. A family was defined by this Survey as a group of persons dependent on a common or pooled income for the major items of expense and usually living in the same household. For field methods and purposes and for selection of cities, see *Monthly Labor Review*, issues of January and April 1951.

National wealth.—National wealth data are not currently compiled by any Federal government agency. The Bureau of the Census prepared estimates of national wealth for selected years from 1850 to 1922. Figures for various dates covering the period 1880 to 1922, based on the Census Bureau reports, are shown in *Historical Statistics of the United States, 1789-1945*. For the same period, 1880-1922, estimates for certain components of wealth (land, real-estate improvements, and equipment), also largely based on Census Bureau figures, appear in *National Product Since 1869*, by Simon Kuznets, issued by the National Bureau of Economic Research in 1946. More recent data on wealth for the period 1922 to 1938 were compiled by the National Industrial Conference Board and published in *Enterprise and Social Progress*, and in the *Economic Record*. Both the Kuznets estimates and the NICB estimates also appear in *Historical Statistics*.

The wealth data shown here (tables 393 and 394) represent the most recent attempt to derive a consistent and comprehensive series in this field. They were compiled by Dr. Raymond W. Goldsmith. As is the case in all national wealth estimates, the figures are intended chiefly to indicate the order of magnitudes involved and to permit rough comparisons among types of wealth and of the growth of wealth over long periods. Careful examination of the methods and sources of the estimates, as they are described in the source, *A Study of Saving in the United States*, is therefore advisable before use is made of the figures.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series A 101-116") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

No. 367.—PERSONAL CONSUMPTION EXPENDITURES, BY TYPE OF PRODUCT: 1929 TO 1956

[In millions of dollars. Represents market value of purchases of goods and services by individuals and nonprofit institutions, and value of food, clothing, housing, and financial services received by them as income in kind. Includes rental value of owner-occupied houses, but not purchases of dwellings (which are classified as capital goods).]

**NO. 376.—INCOME SHARES OF UPPER AND LOWER GROUPS OF TOTAL POPULATION:
1919 TO 1948**

[Data are based on comparisons between Federal tax data and countrywide totals of income receipts by individuals. Individuals' incomes underlying the basic and economic income variants are defined as receipts for the participation of individuals or of their property in the production process; include employee compensation and other payments to labor, entrepreneurial income, rent, interest, dividends; exclude capital gains and other transfers and do not allow deductions except of business expenses. The basic variant is a first approximation to shares in income thus defined. The economic income variant represents an adjustment of the basic variant to take account of some items omitted from the tax data (compensation of nonfederal government employees and imputed rent on owner-occupied houses), to allow for a finer division of tax returns by distinguishing between head of family and nonhead returns, and to allow for the effect of classifying returns by net income, as defined for tax purposes, instead of by economic income. The disposable income variant measures shares in individuals' incomes after deducting Federal income taxes and including gains and losses from sales of assets. See also *Historical Statistics*, series A 195-197]

NO. 380.—MEAN AND MEDIAN INCOMES WITHIN OCCUPATIONAL GROUPS: 1947 TO 1955

[In dollars. See text, p. 291. For definition of spending unit, see headnote, table 378. Mean income is the average obtained by dividing aggregate money income before taxes by number of spending units. Median income is that of middle spending unit when units are ranked by size of money income before taxes. Figures beginning 1953 are high relative to prior years owing largely to a change in 1954 questionnaire that improved the reporting of income]

Other ³	(1)	(1)	(1)	(1)	(1)	(1)	(1)	(1)	(1)

¹ Not available.

² Beginning 1953, not exactly comparable; changes in 1954 questionnaire resulted in overestimates of farm and nonfarm business incomes relative to earlier years. The effect is thought to have been much greater on the mean than on the median.

³ Comprises spending units headed by housewives, protective service workers, unemployed persons, and students.

**No. 381.—NET WORTH OF SPENDING UNITS HAVING SPECIFIED CHARACTERISTICS—
PERCENT DISTRIBUTION OF SPENDING UNITS BY NET WORTH IN 1950 AND 1953,
AND MEDIAN NET WORTH IN 1953**

[Net worth is defined as difference between total selected assets and total debt reported in interviews during January-March 1950 and 1953. Selected assets include liquid assets (U. S. Government securities, checking accounts, savings accounts in banks, postal savings, and shares in savings and loan associations and credit unions), owner-occupied homes and farms, other real estate, farm machinery, crops and livestock, automobiles, interests in unincorporated nonfarm businesses and privately held corporations, and common and preferred stock in corporations open to investment by the general public. Liabilities include all forms of debt other than charge accounts. For method of computing net worth, see *Federal Reserve Bulletin*, September 1953, pp. 946-947. Net worth figures should be considered as minimum estimates because of omission of assets such as currency, corporate bonds, reserve value of life insurance policies, consumer durable goods other than automobiles, jewelry, etc., and because of under-reporting of assets covered.]

NO. 382.—MONEY INCOME OF FAMILIES AND UNRELATED INDIVIDUALS—PERCENT DISTRIBUTION BY INCOME LEVEL, AND FARM AND NONFARM MEDIAN INCOME: 1950 TO 1955

[Based on samples of population residing in households only. Includes small number of families and unrelated individuals with no money income. Excludes small number of families and individuals residing in quasi-households (hotels, large rooming houses, etc.). "Family" refers to a group of 2 or more related persons residing in same household. "Unrelated individual" is used to refer to a person living alone or with persons not related to him. See Technical Note, p. 193. For explanation of urban and rural areas, see p. 2]

No. 389.—MEDIAN WAGE OR SALARY INCOME OF ALL PERSONS WITH WAGE OR SALARY INCOME AND OF YEAR-ROUND FULL-TIME WORKERS, BY COLOR, MAJOR INDUSTRY GROUP, AND MAJOR OCCUPATION GROUP, BY SEX: 1939, 1950, AND 1955

[Persons 14 years old and over. Based on sample. See Technical Note, p. 193. Wage or salary income includes all money received in compensation for work or services performed as employees including commissions, tips, piece-rate payments, bonuses, Armed Forces pay, etc., as well as receipts commonly referred to as wages or salaries. Excludes value of income in kind, such as living quarters, meals, clothing, etc. Median wage or salary income based on number of persons reporting \$1 or more of wage or salary income, except where otherwise specified. For definition of median, see headnote, table 24, p. 28]

No. 892.—INCOME OF NONSALARIED PHYSICIANS, LAWYERS, AND DENTISTS: 1929 TO 1954

[Data are based on mail questionnaire surveys of the 3 professions, usually in cooperation with the professional associations. At intervals, large-scale surveys have been conducted to establish benchmark data, most recently in 1949 (dentists), 1950 (physicians), and 1955 (lawyers). For later years, smaller, interim surveys are conducted to obtain indexes for extending the benchmark data forward]

¹ Estimates obtained by multiplying the *constant dollar* figures shown in table 394 by the appropriate price index for current year. See also footnote 1 in that table.

² Estimates are based on book values.

³ Estimates for farm land are based on Census or similar data. For other private land, estimates are derived by application of rough ratios of land to structure values for different types of real estate.

⁴ 1945 estimates differ from one another not only because of changes in base period (1929 vs. 1947-49) of deflator used but also because of minor changes in sources of data and methods of estimation used.

¹ Estimates derived by "perpetual inventory" method which is intended to reflect reproduction cost of different types of assets. Estimates are obtained by: (1) Reducing each year's gross capital expenditures in current prices to 1929 (or 1947-49) price level by means of appropriate construction cost or wholesale price indices; (2) depreciating gross capital expenditures in accordance with an assumed length of life for different types of assets, thus obtaining net capital expenditures for each year in 1929 (or 1947-49) prices; (3) cumulating net capital expenditures for as many years backwards as corresponds to the assumed length of life of the type of asset involved.

² Estimates reflect book values reduced by means of wholesale price indices.

³ 1945 estimates differ from one another not only because of changes in base period (1929 vs. 1947-49) of deflator used but also because of minor changes in sources of data and methods of estimation used.

Source: For 1900 to 1945 (1929 prices), R. W. Goldsmith, *A Study of Saving in the United States*, Princeton University Press, 1956, Vol. III, Table W-1; for 1945 (1947-49 prices) to 1955, National Bureau of Economic Research, preliminary estimates by Raymond W. Goldsmith.

Section 12

Prices

This section presents indexes of wholesale, retail, and consumer prices. Average prices are also shown for selected commodities. The primary sources of these data are the publications of the Department of Labor, Bureau of Labor Statistics, which include: *Monthly Labor Review*; *Handbook of Labor Statistics*; *Consumer Price Index* (monthly); *Retail Prices and Indexes of Fuels and Electricity* (monthly); *Wholesale (Primary Market) Price Index* (monthly); and *Wholesale Prices* (annually). The Agricultural Marketing Service prepares indexes of prices received and prices paid by farmers (see text, p. 614).

The Bureau of Labor Statistics prepares weekly and monthly indexes of wholesale prices, a daily index based on spot market prices of 22 commodities; and indexes of consumer prices for urban wage-earner and clerical-worker families for the United States, based on 46 cities, and individually for 20 large cities, as well as component indexes for food and other groups.

Wholesale price index.—The wholesale price series on the base 1926=100 has been carried back to 1890. Indexes for dates prior to 1890 have been computed using data available from other sources. Separate monthly indexes are available for major groups of commodities from January 1890, and for subgroups of commodities beginning with 1913. This index, 1926=100, is the official index for December 1951 and all earlier dates.

A revised index, based on 1947-49=100, is the official index for January 1952 and all subsequent months. For the 1947-54 period, the weights used in the revised index represent all sales at the primary market level during 1947-49 period. Beginning in January 1955, the weights used are based on the average dollar value of transactions in 1952 and 1953. The revised index beginning with data for 1947 is based on some 2,000 commodity series instead of the 900 included in the earlier index. For a detailed description of the revised index, see the *Monthly Labor Review*, February 1952.

The index provides measures of average changes in prices of commodities at the primary market level—usually the level at which the commodity is first sold commercially in substantial volume. The prices are ordinarily those charged by representative manufacturers or producers to the types of distributors or industrial consumers who are characteristic buyers of the product. The prices are f. o. b. point of production or sale, if possible. In the case of some commodities, prices quoted in organized commodity markets are used. The index measures the price changes of only the commodities which are specifically defined for pricing both physically and in terms of market structure. It is not a measure of the "general price level" or of "the purchasing power of the dollar" since it excludes some classes of commodities, i. e., real estate, securities, services, etc., which are factors in the "general price level."

Consumer price index.—This index measures the average change in prices of goods and services purchased by city wage-earner and clerical-worker families. The weights used in calculating the index are based on studies of actual expenditures by families of wage earners and clerical workers. The quantities and qualities of the items in the "market basket" remain the same between consecutive pricing periods, so that the index measures the effect of price change only on the cost of living of these families.

Note.—This section presents data for the most recent year or period available on March 19, 1957, when the material was organized and sent to the printer. In a few instances, more recent data were added later.

The index does not measure changes in the total amount families spend for living; city indexes do not measure relative differences in prices or living costs between cities.

A study conducted during 1917-19 provided the weights used from 1913 to 1935. Since then, there have been three major revisions of this index, which involved bringing the "market basket" of goods and services up to date and improving the sample and methodology. From 1935 to January 1950, time-to-time changes in retail prices were weighted by 1934-36 average expenditures except for certain temporary wartime adjustments. Weights used from January 1950 to December 1952 represented estimated 1949-50 spending patterns. Beginning January 1953, the weights represent average purchases of urban wage-earner and clerical-worker families in fiscal year 1952, derived from a study of family expenditures in 1950 by estimating the effects of changes in income and prices between 1950 and fiscal 1952.

The list of items currently priced for the index includes approximately 300 goods and services. For some items, a number of different qualities are priced. The items priced are described by detailed specifications to insure that, as far as possible, the same quality is priced each time, and that differences in reported prices are measures of price change only. Sales taxes are reflected wherever applicable.

Beginning January 1953, prices are obtained in a sample of 46 cities. Foods, fuels, and a few other items are priced monthly in all cities. Prices of most other goods and services are obtained on a regular rotating cycle—monthly in the 5 largest cities and every 3 months in other cities. Rents are surveyed bimonthly in the 5 largest cities and every 3 months in other cities. Estimates are made for unpriced cities each month. Prior to January 1953, indexes were based on food prices in 56 cities monthly, and prices of other commodities in 34 cities quarterly or monthly.

Price changes for the 46 cities are combined for the United States with weights based on 1950 population of cities represented by each sample city. City indexes are compiled for the 20 largest of the 46 cities.

Indexes currently computed on the 1947-49=100 base have been converted from previous indexes on the 1935-39=100 base, after a reclassification of components.

Retail food price index.—Retail food price indexes are one component of the consumer price index. Weights used at various times are consistent with those for the index as a whole. In March 1943, the weights for the food index were revised to take account of changes in food purchases due to wartime shortages and rationing. In January 1946, these wartime weight adjustments were eliminated and certain other revisions made in the calculating procedures. In January 1950 and again in January 1953 the weights were revised as described above for the total consumer price index.

The indexes were computed from prices of 54 foods for the period from January 1935 to March 1943, 61 foods for the period March 1943 to June 1947, 50 foods from June 1947 to January 1950, 60 foods from January 1950 to December 1952, and 90 foods beginning January 1953.

Comparability with other indexes.—The National Industrial Conference Board prepares a monthly Consumer Price Index based on 1953=100 (see table 404) for the United States and for selected cities. This index is not fully comparable with that of the Bureau of Labor Statistics.

In comparing the movement of the indexes of consumer prices and of the prices paid by farmers for commodities bought for family living (table 801), it should be noted that the consumer price index includes rents and other services and the farm index does not, and that the list of commodities included in the two indexes and their geographic coverage differ because farm family buying differs considerably from that of city families, and farm and city workers are located in different parts of the country.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, Series L 50-51") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

No. 396.—WHOLESALE PRICE INDEXES, BY COMMODITIES: 1950 TO 1957

[1947-49=100. See headnote, table 395]

COMMODITY GROUP	1950	1951	1952	1953	1954	1955	1956		1957, March (prel.)
							Average	March	
All commodities.....	103.1	114.8	111.6	110.1	110.3	110.7	114.3	112.8	116.9
All commodities other than farm products and foods....	105.0	115.9	113.2	114.0	114.5	117.0	122.2	121.0	125.4
Special groups:									
All foods.....	98.5	110.3	108.8	104.4	103.6	101.0	100.8	99.0	101.0
Special metals and metal products.....	109.7	120.7	122.2	125.0	125.9	132.9	143.3	141.6	146.6
Building materials.....	109.5	119.6	118.2	119.9	120.2	125.5	130.6	130.5	130.5
Farm products.....	97.5	113.4	107.0	97.0	95.6	89.6	88.4	86.6	88.8
Fresh and dried produce.....	91.4	97.2	120.3	100.4	99.2	104.1	104.2	106.5	94.1
Grains.....	89.7	99.3	98.2	90.1	91.5	87.0	87.0	84.5	87.5
Livestock and poultry.....	90.0	116.9	102.4	88.4	85.5	75.8	87.0	67.5	76.6
Plant and animal fibers.....	116.2	143.9	115.1	103.5	106.2	102.4	102.8	105.5	104.0
Fluid milk.....	88.7	104.8	109.6	98.9	91.1	91.5	94.5	90.5	95.6
Eggs.....	84.9	108.0	95.9	105.7	79.9	85.7	81.9	85.0	63.8
Hay and seeds.....	89.8	102.7	98.3	90.2	93.1	84.9	82.6	82.5	85.1
Other farm products.....	127.8	138.5	136.7	141.2	131.2	142.5	146.9	143.7	146.0
Processed foods.....	99.8	111.4	108.8	104.6	105.3	101.7	101.7	99.2	103.7
Cereal and bakery products.....	99.0	106.9	106.9	109.5	113.9	116.2	115.2	115.4	111.3
Meats, poultry, fish.....	101.5	116.7	108.3	93.0	91.9	84.8	81.6	74.6	84.6
Dairy products and ice cream.....	94.8	107.7	113.6	110.6	106.1	106.1	108.6	106.1	106.7
Canned, frozen, fruits and vegetables.....	99.8	105.5	105.0	104.7	104.5	105.5	107.9	108.6	105.9
Sugar and confectionery.....	98.4	106.4	109.2	109.4	112.4	110.5	109.8	109.6	112.3
Packaged beverage materials.....	148.3	161.3	162.2	167.7	212.0	180.1	192.7	192.8	190.9
Animal fats and oils.....	71.6	93.5	64.2	73.8	93.0	67.7	69.8	63.1	78.9
Crude vegetable oils.....	75.6	88.6	60.6	69.2	68.7	62.2	68.5	74.1	67.7
Refined vegetable oils.....	75.1	89.9	66.2	75.6	75.4	71.2	73.4	80.4	78.2
Vegetable oil end products.....	82.4	97.1	79.9	83.7	85.0	81.4	85.3	84.8	89.2
Other processed foods.....	118.1	123.0	119.0	116.9	103.2	99.6	96.8	97.4	95.1
Textile products and apparel.....	99.2	110.6	99.8	97.3	95.2	93.3	95.3	95.9	95.4
Cotton products.....	99.5	111.5	98.5	93.5	89.2	91.5	93.0	94.1	91.2
Wool products.....	112.9	144.6	113.0	111.8	109.1	104.7	103.7	102.1	109.0
Synthetic textiles.....	95.3	97.0	88.9	87.1	85.7	86.6	81.4	84.5	81.7
Silk products.....	99.7	128.8	133.7	136.6	129.8	123.8	121.9	119.5	123.0
Apparel.....	96.3	103.8	100.0	99.3	98.5	98.5	99.6	99.7	99.6
Other textile products.....	110.5	141.6	101.7	83.7	79.8	74.5	72.8	72.0	76.1
Hides, skins, and leather products.....	104.6	120.3	97.2	98.5	94.2	93.8	99.3	97.7	98.3
Hides and skins.....	103.0	119.0	63.0	68.3	55.2	56.6	59.2	58.3	51.0
Leather.....	107.0	124.7	89.4	93.4	85.2	84.6	91.2	90.9	88.6
Footwear.....	106.5	121.6	112.4	111.8	111.8	112.3	119.3	116.5	120.9
Other leather products.....	98.2	112.3	100.8	99.3	97.0	95.9	98.6	98.3	97.5
Fuel, power, and lighting materials.....	103.0	106.7	105.6	109.5	108.1	107.9	111.2	110.9	119.4
Coal.....	106.2	108.4	108.7	112.8	106.3	104.8	114.5	110.1	123.6
Coke.....	116.1	124.0	124.7	132.0	132.5	135.2	149.7	145.4	161.9
Gas.....	98.2	100.7	103.7	107.8	108.8	111.6	115.1	122.7	122.3
Electricity.....	100.1	98.1	98.9	99.1	101.8	97.0	94.2	94.3	94.3
Petroleum and products.....	103.7	110.5	109.3	112.7	110.8	112.7	118.2	116.8	130.7
Chemicals and allied products.....	96.3	110.0	104.5	105.7	107.0	106.6	107.2	106.5	108.8
Industrial chemicals.....	101.1	120.7	115.2	117.6	117.6	118.1	121.4	120.0	122.9
Prepared paint.....	96.8	108.9	107.3	106.7	112.8	114.5	120.0	119.1	124.1
Paint materials.....					96.3	96.8	99.6	101.4	100.1
Drugs and pharmaceuticals.....	92.5	95.6	92.5	92.9	93.9	92.8	92.1	91.9	93.2
Fats and oils, inedible.....	68.7	88.8	50.0	52.7	57.8	56.6	56.2	55.0	58.0
Mixed fertilizer.....	101.3	107.3	109.3	111.1	109.7	108.7	108.7	107.9	108.6
Fertilizer materials.....	101.7	106.3	110.6	112.9	113.0	112.6	108.4	112.8	106.8
Other chemicals and products.....	94.6	108.4	103.3	103.3	107.5	106.0	103.2	102.3	105.2
Rubber and products.....	120.5	148.0	134.0	125.0	126.9	143.8	145.8	146.2	144.3
Crude rubber.....	157.3	215.1	157.8	121.6	123.1	156.8	146.7	149.4	142.0
Tires and tubes.....	113.6	133.9	129.8	127.2	130.6	144.9	152.2	151.8	149.0
Other rubber products.....	109.9	130.9	126.7	123.8	124.1	134.4	138.0	137.9	140.0
Lumber and wood products.....	113.9	123.9	120.3	120.2	118.0	123.6	125.4	128.6	120.1
Lumber.....	114.5	123.6	120.5	119.3	117.3	124.4	127.2	129.9	121.1
Millwork.....	114.6	130.1	127.0	131.5	130.6	128.7	129.1	128.9	128.7
Plywood.....	106.5	115.1	105.0	109.3	103.1	105.4	101.7	107.5	96.2
Pulp, paper and allied products.....	100.9	119.6	116.5	116.1	116.3	119.3	127.2	126.8	128.7
Woodpulp.....	95.6	114.4	111.5	109.0	109.6	112.9	117.7	116.8	118.0
Wastepaper.....	119.5	188.3	70.1	90.7	80.4	110.7	112.3	142.6	75.4
Paper.....	106.5	119.1	124.0	125.6	126.6	129.8	137.3	136.2	140.1
Paperboard.....	105.0	131.8	127.4	124.3	124.5	127.1	134.8	130.6	136.2

No. 397.—INDEXES OF SPOT PRIMARY MARKET PRICES OF 22 COMMODITIES: 1939 TO 1957

[1947-49=100. Figures in column heads represent number of commodities. Index is computed daily; represents unweighted geometric average of daily price quotations of 22 commodities, traded on organized exchanges. The index is much more sensitive to changes in market conditions than is monthly or weekly wholesale price index]

DATE	All commodities (22)	Foodstuffs (9)	Raw industrials (13)	Livestock and products (5)	Metals (5)	Textiles and fibers (4)	Fats and oils (4)
1939—Aug. 15.....	33.6	26.9	39.2	31.9	43.1	31.2	28.6
1941—Dec. 6.....	53.0	46.1	58.3	53.0	54.6	56.3	55.6
1945—Aug. 17.....	61.7	57.5	64.6	62.6	55.8	62.6	62.4
1950—June 20.....	83.4	85.1	90.7	71.4	98.8	96.3	89.4
1951—June 19.....	123.3	102.3	140.0	107.8	129.4	140.4	92.8
1952—June 17.....	96.9	93.5	99.3	71.3	113.2	95.4	65.0
1953—June 16.....	86.4	85.9	86.6	59.3	96.4	90.0	54.6
1954—June 15.....	91.6	97.7	87.4	72.2	96.8	87.7	69.5
1955—June 14.....	90.4	87.8	92.1	65.0	107.0	83.7	66.6

No. 398.—WHOLESALE PRICE INDEXES, BY STAGE OF PRODUCTION: 1948 TO 1956

[1947-49=100. These indexes are a regrouping of the regular Wholesale Price Index Series to show price movements at various levels of production and in the various sectors of the economy. The new series comprise three major categories: (a) raw or crude materials; (b) intermediate materials for further processing, components, and supplies; (c) finished goods. Each of these three is further divided in accordance with end-use and durability.]

STAGE OF PRODUCTION	1948	1949	1950	1951	1952	1953	1954	1955	1956
All commodities.....	104.4	99.2	103.1	114.8	111.6	110.1	110.3	110.7	114.3
Crude materials for further processing.....	108.0	93.4	101.8	116.9	107.4	99.2	98.3	94.5	95.0
Foodstuffs and feedstuffs.....	108.8	90.5	97.0	112.3	105.7	94.6	94.7	85.7	84.0
Nonfood materials, except fuel.....	106.8	87.2	111.0	128.1	110.9	106.2	104.2	110.1	114.2
For manufacturing.....	107.0	96.9	111.2	128.6	110.8	105.8	103.6	109.6	113.6
For construction.....	101.9	105.2	106.8	113.0	113.0	117.4	121.0	124.9	130.6

No. 400.—CONSUMER PRICE INDEX—ALL ITEMS AND COMMODITY GROUPS: 1913 TO 1957

[1947-49=100. The Consumer Price Index from 1913 to December 1952 is rebased according to new groupings from adjusted series indexes on 1935-39=100 formerly published. For detailed explanation, see text, p. 321. These indexes include a correction of new unit bias in the rent index from 1940 to December 1949 and adjusted population and commodity weights beginning with indexes for January 1950. These adjustments make a continuous comparable series]

YEAR	All items	Food ¹	Rent	Ap-parel	YEAR	All items	Food ¹	Rent	Ap-parel	YEAR	All items	Food ¹	Rent	Ap-parel

No. 405.—AVERAGE RETAIL PRICES OF SELECTED FOODS: 1913 TO 1957

[Mid-month prices in cents per pound except for milk (cents per quart), eggs and oranges (cents per dozen), and tomatoes (cents per No. 2 can through September 1954, No. 303 can thereafter). Data are averages of prices reported by retail dealers in cities included in the Retail Food Index. (See headnote, table 407.) Number of cities also varies slightly according to availability of prices for each item. Sales taxes not included after 1945. Prices for individual cities combined with use of population weights]

No. 414.—ANNUAL AVERAGE UNIT VALUES OF IMPORTANT ARTICLES IMPORTED AND EXPORTED: 1925 TO 1955

[Values of goods imported represent values in foreign markets whence exported to United States. Values of goods exported represent value at time and place of exportation. "Ton" signifies long ton of 2,240 pounds except where otherwise specified. Averages obtained by dividing total value of imports (for consumption) and exports of specified article by total quantity. Where, as in some commodities, considerable price variations may exist between different grades, methods of packing, etc., and proportions of grades, etc., may vary from year to year, such averages may show actual price movements only roughly]

Section 13

Elections

This section relates to popular participation in, and results of, Presidential, Congressional, and gubernatorial elections. Also presented are several tables concerning Congressional legislation.

Official statistics on Federal elections are collected by the Clerk of the House of Representatives and published biennially in *Statistics of the Presidential and Congressional Election* and *Statistics of the Congressional Election*. Data on Federal elections also appear in the United States Congress, *Congressional Directory*, and in the official State documents (Registers, Manuals, Reports of the Secretary of State, etc.) of the separate States. Data on campaign expenditures for Federal offices and expenditures by lobbying organizations affecting national legislation are compiled by Congressional Quarterly News Features and published in its *Congressional Quarterly Almanac*.

Almost all Federal, State, and local governmental units in the United States conduct elections at various intervals—annual, biennial, quadrennial, or longer—for different types of offices and other purposes. No regular and complete system exists for reporting either the number of elections held or the numbers of votes cast for candidates, except for Federal offices, and, in most States, for State offices.

The conduct of elections in the United States for Federal, State, and local offices and on State and local issues is regulated by State laws or, in some cities and a few counties, by local charters. An important exception is that the United States Constitution prescribes the basis of representation in Congress and the manner of electing the President of the United States and grants to Congress the right to regulate the times, places, and manner of electing Federal officers.

The election of the President of the United States is provided for in the Constitution, article II, section 1, through the establishment of an electoral college in each State, for each Presidential election. The method of casting the electoral vote was modified in 1804 by the adoption of the 12th Amendment to the Constitution. The number of electors, and therefore of electoral votes, is "equal to the whole number of Senators and Representatives to which the State may be entitled in Congress." The electors are elected by popular vote in all States.

The number of members in the House of Representatives is fixed by the Congress at the time of each apportionment; since 1912 it has remained constant at 435. The 14th Amendment to the Constitution provides that "Representatives shall be apportioned among the several States according to their respective numbers * * *." The Constitution also requires that each State have at least one Representative. Members are elected for 2-year terms, all terms covering the same period.

The Senate is composed of 96 members, 2 from each State, who are elected to serve for a term of 6 years. One-third of the Senate is elected every 2 years. Senators were originally chosen by the State legislatures. Subsequently, the 17th Amendment to the Constitution, adopted in 1913, prescribed that Senators be elected by popular vote.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series P 27-31") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

Note.—This section presents data for the most recent year or period available on April 2, 1957, when the material was organized and sent to the printer. In some instances more recent data were added later.

¹ Totals for years prior to 1928 exclude votes cast for names not appearing on electoral tickets for parties specified. Totals for 1928-44 exclude void and blank ballots. ² Democrat-Populist.

³ Includes scattering votes; 445 in Iowa; 633 in New Jersey; and 131 in Pennsylvania.

⁴ Included with Miscellaneous are 798 Union votes cast in endorsement of Republican candidate.

⁵ Included with Miscellaneous are 417,418 American Labor votes cast in endorsement of Democratic candidate.

⁶ Included with Miscellaneous are 496,405 American Labor and 329,236 Liberal votes cast in endorsement of Democratic candidate.

⁷ Included with Miscellaneous are 1,169,021 votes for Thurmond (States' Rights Democrats) and 1,156,103 votes cast for Wallace (Progressives, etc.); Included with Democratic are 222,562 Liberal votes cast for Democratic nominees.

⁸ Included with Democratic are 416,711 Liberal Party votes cast for democratic candidate.

⁹ For 1888, Union Labor Party; 1892, 1900, and 1904, Populist; 1896, National Democrat; 1908, Populist and Independent; 1912, Progressive; 1916 to 1952, miscellaneous. ¹⁰ Socialist-Labor only.

¹¹ Includes 4,822,856 votes cast for La Follette and Wheeler, official candidates of both Socialist and Independent Progressive parties. ¹² Workers Party. ¹³ See also tables 421 and 422.

¹⁴ Includes minor party votes; and for certain years scattering, void, and blank votes.

¹⁵ Excludes votes for Georgia; statistics not furnished by State authorities.

¹⁶ Although the Republican Party received 50.6 percent of the total vote cast, the Democratic Party won a greater number of individual contests for Representatives (221 as against 210 for the Republicans) and thereby retained control of the House of Representatives.

No. 420.—APPORTIONMENT OF MEMBERSHIP IN HOUSE OF REPRESENTATIVES, BY STATES, FROM ADOPTION OF CONSTITUTION TO 1950

[Population figures used for apportionment purposes are those determined for States by each decennial census. Until 1940, population for apportionment purposes excluded Indians not taxed and until 1870, excluded two-fifths of slaves. Until 1850, apportionment ratios were chosen arbitrarily; 1850 to 1900, ratios were apportionment population of U. S. divided by predetermined number of Representatives; from 1910 on, apportionment ratios shown were computed by dividing fixed number (435) of Representatives into apportionment population but were not used in the original calculations, which were based on priority lists. No reapportionment based on 1920 Population Census. For discussion of apportionment methods, see S. Doc. No. 304, 76th Cong., 3d sess., *A Survey of Methods of Apportionment in Congress*, by Edward V. Huntington. See also *Historical Statistics*, series P 57-61, which shows apportionment totals under Apportionment Act, *excluding* Representatives assigned after apportionment (footnote 6 below)]

* Number of Representatives not to exceed 1 for each 30,000 inhabitants.

* See headnote.

* Membership increased from 233 to 234 by act of July 30, 1852 (10 Stat. L. 25). See footnote 6.

* Membership increased from 233 to 241 by act of Mar. 4, 1862 (12 Stat. L. 353). See footnote 6.

* Membership originally fixed at 283 but increased to 292 by act of May 30, 1872 (17 Stat. L. 192). One Member assigned to Colorado after apportionment.

* Assigned after apportionment.

* Included in apportionment act in anticipation of Statehood.

* Included in the 20 Members originally assigned to Massachusetts but credited to Maine after its admission as a State, Mar. 15, 1820 (3 Stat. L. 555).

¹ See footnote 16, table 415.

² Percentage was 48.9 for each major party.

³ For 1942-1946, no Representatives were elected from districts, but more than one was elected from the State-at-large.

⁴ In California, a person may become a candidate of one or more parties for the same office. Inasmuch as votes cast by voters of various parties for the same candidate are not segregable, the vote is counted for the party of which the candidate is a member.

Congress, Clerk of the House; 1946 and 1950, *Statistics of the Congressional Election*, and 1948 and 1952, *Statistics of the Presidential and Congressional Election*.

No. 422.—VOTE CAST FOR UNITED STATES REPRESENTATIVES, BY POLITICAL PARTIES, BY STATES: 1954 AND 1956

[In thousands. In each State, totals represent the sum of votes cast in each Congressional District, except as follows: In Delaware, Nevada, Vermont, and Wyoming, only 1 Representative is elected from the State at large. In New Mexico and North Dakota, 2 Representatives are elected from the State at large. In Connecticut, Texas, and Washington, Representatives are elected by district, except 1 who is elected at large; these at-large votes are not reflected in this tabulation. In numerous States, one or other of the major parties had no candidate in some districts. In those cases where votes of a party, as such, are cast in endorsement of a candidate of another party, the votes are counted as for the endorsing party. See also notes below]

¹ For New York, included in Republican are 17,954 votes cast for Republican-endorsed Democrat in 18th District; included in "Other" are 171,344 votes cast for Liberal-endorsed Democrats.

² For New York, includes 230,434 votes cast for Democratic-endorsed candidates and 762 for Republican-endorsed.

³ Less than 500.

⁴ In California a person may be candidate of one or more parties for same office, so that party votes for candidates are not segregable. Party vote shown is computed by assigning to a party total votes for candidates who are members of that party.

⁵ Voters entitled to vote for 2 candidates; total ascertained by adding the highest vote received by a single candidate in each political party.

¹ Comprises initial primary elections—excludes run-off primaries.

² Registration not required or no central records maintained.

³ For 1954 primary election; 1954 registration for general election, 561,007.

⁴ Candidates for Governor nominated at party conventions.

⁵ Not available. ⁶ Estimate.

⁷ No Republican primary, as only one candidate filed.

⁸ Democratic primary only; no gubernatorial candidate in Republican primary.

No. 482.—ELECTION CAMPAIGN RECEIPTS AND DIRECT EXPENDITURES, BY TYPE OF COMMITTEE: 1956

[This information has been compiled from reports filed with the Senate Subcommittee on Privileges and Elections and with the Clerk of the House of Representatives. Comprises receipts and direct expenditures during the entire year of all national and statewide campaign committees of which the subcommittee had knowledge. Receipts include funds received by transfer from other organizations; expenditures exclude funds transferred to other groups. See source for procedures followed and limitations of the data]

RECEIPTS AND EXPENDITURES	Total	Republican committees	Democratic committees	Labor committees	Miscel- laneous

FIG. XXII.—THE GOVERNMENT OF THE UNITED STATES
[As of June 30, 1933. Only the more important agencies are shown]

Section 14

Federal Government Finances and Employment

This section presents statistics relating to the financial structure and the civilian employment of the Federal Government. The fiscal data cover the essential apparatus of public financing, namely appropriations, taxes, receipts, expenditures, and debt. The personnel data relate to civil staffing and payrolls for the different public functions and agencies, certain employee characteristics, and civil service and retirement status.

Principal sources of the fiscal data are *The Budget of the United States Government* published annually by the Bureau of the Budget and the Treasury Department's annual *Combined Statement of Receipts, Expenditures and Balances*, an abstract of the Treasury books relating to all of the receipt and appropriation accounts which report disbursements under the appropriations made by the Congress. The *Annual Report of the Secretary of the Treasury* is a convenient summary of yearly data relating to somewhat broader fields.

The day-to-day cash operations of the Federal Government clearing through the accounts of the Treasurer of the United States are reported in the *Daily Statement of the United States Treasury*. In the issue for the last day of the month the *Statement* contains information as to the public debt receipts and expenditures for the month and the outstanding public debt as of that day.

Receipts and expenditures of the Government classified as to budgetary and non-budgetary transactions and showing the budget surplus or deficit appear in the *Monthly Statement of Receipts and Expenditures of the United States Government*. The monthly *Treasury Bulletin* contains analytical material on fiscal operations and related Treasury activities. Another special aspect of Federal finances is presented in the Treasury Department's monthly *Circulation Statement of United States Money*.

Tax data are compiled by the Internal Revenue Service of the Treasury Department. The *Annual Report of the Commissioner of Internal Revenue* gives a detailed account of tax collections by kind of tax and geographic area. The agency's annual report, *Statistics of Income*, Part 1, presents data on individual income tax returns, fiduciary income tax returns, Federal estate tax returns, and gift tax returns. *Statistics of Income*, Part 2, also published annually, presents data from corporation income tax returns, including schedule for corporation excess-profits tax, and, biennially, including schedule for personal holding companies.

Federal employment figures are compiled primarily by the Civil Service Commission. The figures are issued by that agency in its regular *Annual Report* and its *Monthly Report on Employment*. The Commission also publishes an annual report on the pay of Federal employees entitled *Pay Structure of the Federal Civil Service*. Data on Federal employment are also issued by the Bureau of Labor Statistics in its *Monthly Labor Review*.

Treasury receipts and expenditures.—All receipts of the Government, with a few exceptions, are deposited to the credit of the Treasurer of the United States, irrespective of their ultimate disposition or availability for expenditure. The Treasury Department currently uses two bases for the reporting of receipts: (1) Latest available reports of deposits in government depositaries in the general account of the Treasurer of the United States; and (2) collections as reported by government collecting agencies.

Note.—This section presents data for the most recent year or period available on April 2, 1957, when the material was organized and sent to the printer. In some instances more recent data were added later.

Receipts on the first basis are presented in the *Daily Statement of the United States Treasury*, the purpose of which is to report receipts as promptly as possible. Receipts on a collection basis (taxes, customs duties, trust receipts, receipts of certain government corporations and public enterprises) and miscellaneous budget receipts which are on the basis of the latest reports of deposits in government depositories are presented in the *Monthly Statement of Receipts and Expenditures of the United States Government*. The *Monthly Statement* also includes deposits or collections in cash accounts of Government agencies held outside the Treasury as well as those in the general account of the Treasurer of the United States. The final statement issued after the close of the fiscal year is held open until all reports have been received covering deposits or collections for that year.

Under the Constitution, no money may be withdrawn from the Treasury unless appropriated by the Congress. The Treasury Department reports Government expenditures on two bases: (1) Checks paid or withdrawals affecting the account of the Treasurer of the United States; and (2) checks issued and cash payments made by disbursing officers. Transactions of the first type are reported in the *Daily Statement* referred to above; items representing interfund or intragovernmental payments are not included. Expenditures of the second type are presented in the *Monthly Statement*, mentioned above, and in the annual *Combined Statement of Receipts, Expenditures and Balances*, also cited earlier. These monthly and annual reports include payments from cash accounts of Government agencies held outside the Treasury as well as those from the general account of the Treasurer of the United States.

Treasury budget and nonbudget accounts.—All receipts of the Government are recorded by the Treasury in accounts classified generally according to the source and according to whether or not the receipts are earmarked in some degree for expenditure. Disbursements of the Government are similarly classified by accounts reflecting various types of authorizations or conditions under which they may be expended.

Budget accounts include: General fund receipts available for financing the general Government operations to the extent appropriations are made by the Congress (sources of general receipts are income, excise, and employment taxes, customs duties, etc.); special fund receipts (earmarked moneys) received subject to special legal authorizations which may be expended only for the particular purpose specified (examples are the Mineral Leasing Act and the National Forest Fund); expenditure (appropriation) accounts which record the amounts authorized by the Congress and expenditures therefrom, for the general support of the Government; revolving and management fund accounts which record funds authorized by specific provisions of law to finance without further action by the Congress a continuing cycle of operations, with receipts derived from such operations, and to facilitate accounting for and administration of intragovernmental operations.

Nonbudget accounts include: Trust accounts which record the receipt and expenditure of moneys held in trust by the Government for the benefit of individuals or classes of individuals, such moneys being expended only in accordance with the terms of a trust agreement or statute (examples are Civil Service Retirement Fund, Old-Age and Survivors Insurance Trust Fund, the Highway Trust Fund, etc.); deposit fund accounts which record receipts either held in suspense temporarily and later refunded or transferred to another Government account, or held by the Government as banker or agent and paid out at the owners' direction (example is account for the accumulation of taxes withheld from employees' salaries). Funds in nonbudget accounts have no effect on the budget surplus or deficit.

Public and private debt.—These data appear annually in an issue of the monthly *Survey of Current Business* of the Department of Commerce. Net public and private debt outstanding is a comprehensive aggregate of indebtedness of borrowers after elimination of certain duplicating governmental and corporate debt. This measure

of indebtedness provides a more significant indication of trends in debt structure than does gross debt, since effects of nominal changes in financial practices and organization are largely removed. To obtain net figures, gross or total debt is adjusted for specific types of duplications pertaining to the following: (1) Federal Government and its corporations and agencies generally; (2) State and local governments; and (3) within the corporate area, those affiliated but legally distinct corporations which operate under a single management. In the noncorporate private area, data are gross throughout with no adjustments for duplications.

Employment and payrolls.—Employment data are collected from all departments and agencies of the Federal Government by the Civil Service Commission. The Commission does not collect personnel statistics from the District of Columbia Government. Employment figures represent the number of persons who occupied civilian positions on the last day of the calendar month shown and who are paid for personal services rendered for the Federal Government, regardless of the nature of appointment or method of payment. Intermittent workers are counted if they performed any service during the report month. Employment totals exclude persons serving without compensation, persons on leave without pay for scheduled periods longer than 30 days, persons in leave status after reduction-in-force, and persons hired informally "on the spot" without formal appointment procedures to cope with fire, flood, or other extreme emergencies.

Federal payrolls include all payments for personal services rendered during the calendar month and payments for accumulated annual leave of employees who separate from the service. Since most Federal employees are paid on a biweekly basis, the calendar month earnings are partially estimated on the basis of the number of work days in each month where payroll periods overlap consecutive months. Monthly payroll totals fluctuate in amount because the number of work days in each month varies from 20 to 23 days. Holidays may be disregarded since Federal employees are paid for the eight national holidays on which they do not work.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series P 89-98") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

No. 435.—RECEIPTS AND SURPLUS OR DEFICIT OF THE FEDERAL GOVERNMENT: 1789 to 1956

[In thousands of dollars. For years ending June 30, except as noted. On basis of warrants issued through 1915, and on basis of daily Treasury statements for 1916 through 1952; beginning with 1953, on basis of *Monthly Statement of Receipts and Expenditures of the U. S. Government*. General, special, emergency, and trust accounts combined through 1930; thereafter, trust accounts excluded. For explanation of bases and accounts, see text, p. 357. See also *Historical Statistics*, series F 89-98]

¹ Total receipts less refunds of receipts beginning 1931, and less transfers of tax receipts to Federal old-age and survivors insurance trust fund beginning 1937 and to railroad retirement account beginning 1938.

² Figures adjusted beginning 1931 on account of refunds of receipts and capital transfers.

³ Includes tonnage tax prior to 1932. Beginning 1932, tonnage tax is included in Other receipts.

⁴ On basis of warrants issued 1789 through 1930; thereafter, on basis of deposits received.

⁵ Average for period Mar. 4, 1789, through Dec. 31, 1800.

⁶ Averages are for entire period though there were no amounts under these items for certain years.

⁷ Years ending Dec. 31, 1801 to 1842; average for 1841-50 is for period Jan. 1, 1841, through June 30, 1850.

⁸ Average for 1862-65. ⁹ Less than \$500.

¹⁰ Average for 1881 and 1884. ¹¹ 1896 only.

¹² 1910 only. ¹³ Sales of public lands included in Other receipts.

¹ Excludes debt retirements, refunds of receipts and capital transfers beginning 1931, and investments of wholly owned Government corporations in public debt securities beginning 1951.

² Excludes civil expenditures in Washington through 1915. After 1915 includes all expenditures (including rivers and harbors and Panama Canal), and Air Force prior to 1949, irrespective of original source of funds.

³ Excludes civil expenditures in Washington through 1915.

⁴ On basis of warrants issued through 1930; thereafter, on basis of checks issued. Represents expenditures under appropriation "Army and Navy pensions," administered by Veterans Administration.

⁵ Includes civil expenditures under War and Navy Depts. in Washington through 1915, expenditures of Office of Secy. of Defense, unavailable funds charged off under Act of June 3, 1922, expenditures for "Govt. corporations (wholly owned), etc. (net)" beginning 1932; expenditures for veterans pensions beginning 1949, and expenditures of Dept. of Defense not segregated as to respective departments beginning 1952.

⁶ Represents gross debt as of end of each period; e. g., 1800, 1810, etc.

⁷ Years ending Dec. 31 through 1842; average for 1789-1800 begins Mar. 4, 1789; average for 1841-50 is for Jan. 1, 1841-June 30, 1850. See footnote 6 concerning gross debt.

⁸ Included with Army.

⁹ Included in All other.

¹⁰ For comparability with earlier years, all transactions relating to Foreign Economic Cooperation Trust Fund (amounting to \$3,000,000,000) have been consolidated with budget expenditures.

Sources: Treasury Department, *Annual Report of the Secretary*; annual and current data published in *Daily Statement of the U. S. Treasury*.

EXPENDITURES

363

NO. 437.—FEDERAL GOVERNMENT EXPENDITURES, BY ORGANIZATION UNIT: 1950 TO 1957

[In millions of dollars. For years ending June 30. Expenditures reported on a checks-issued basis; prior to 1953, adjusted to the *Daily Treasury Statement* basis, which was partly checks issued and partly checks paid. "Budget" receipts, expenditures, and authorizations, as used in this and following tables, are mainly those of general and special accounts. Excluded from both receipts and expenditures are refunds of receipts and transfers from the general fund to trust funds. Budget expenditures also include net transactions (expenditures minus receipts) of wholly owned Government corporations and enterprises; omitted from both expenditures and receipts are transfers of capital between wholly owned Government corporations and the United States Treasury, and debt transactions of Government enterprises (expenditures from public debt authorizations are included). Figures in early years have not been revised to reflect recent changes in organizational structure]

¹ Deduct. ² Less than \$500,000.

³ Represents civil functions of Dept. of the Army; not entirely comparable with later years.

⁴ Includes transactions of mixed-ownership corporations, which are shown separately in the *Daily Treasury Statement*.

Source: Executive Office of the President, Bureau of the Budget; *Budget of the United States Government*.

No. 438.—RECEIPTS FROM AND PAYMENTS TO THE PUBLIC BY THE FEDERAL GOVERNMENT: 1930 TO 1958

[In billions of dollars. For years ending June 30. Receipts from and payments to public exclude intragovernmental financial transactions but include operations of trust (including deposit) accounts and Government-sponsored enterprises as reflected on the books of the Treasurer of the United States as well as budget accounts of Federal Government. Net cash borrowing or repayment of borrowing from the public excludes borrowing by Treasury from Federal trust accounts and Government-sponsored enterprises, and also excludes certain types of public debt transactions like issuance and redemption of Armed Forces leave bonds. The public is defined to comprise individuals; banks (including Federal Reserve and Postal Savings System); private corporations; businesses; State, local, and foreign governments; and international organizations. For additional explanation, see 1958 *Budget*, pp. 1065-67 and headnote to table 437.]

YEAR	Receipts from the public ¹	Payments to the public	Excess of receipts from (+) or payments to (-) the public	Receipts from exercise of monetary authority ²	Decrease (+) or increase (-) in Government cash balances ³	Decrease (+) or increase (-) in Exchange Stabilization Fund balance	Net cash borrowing(-) or repayment of borrowing (+) from the public

¹ Receipts are net of refunds.

² Consists of the increment resulting from reduction in weight of the gold dollar and the seigniorage on silver.

³ Consists of change in Treasurer's balance through 1953. For years after 1953, also includes change in cash balances held outside the Treasury. Coverage of accounts outside the Treasury is not necessarily complete in 1954 and 1955 as accounting and reporting systems were in process of revision.

⁴ Less than \$50 million.

No. 441.—COMMERCIAL-INDUSTRIAL ACTIVITIES OF THE FEDERAL GOVERNMENT: 1954-55

[Assets in millions of dollars. Represents an inventory of executive agencies of those activities which provided a service or product for the Government's use during fiscal years 1954 or 1955 (determined by availability of data); some activities have been curtailed or terminated since their listing. Covers continental United States, Alaska, and Hawaii. Excludes those activities with capital assets of less than \$5,000 and production valued at less than \$25,000 a year. Also excludes those activities normally considered a part of management of a private enterprise (personnel work, bookkeeping, accounting) and certain public services and utilities. Department of Defense comprises only manufacturing activities of the military functions. Employees are those engaged directly in the activity.]

No. 447.—INDIVIDUAL INCOME AND SELF-EMPLOYMENT TAX AND FIDUCIARY INCOME TAX RETURNS—SUMMARY: 1925 TO 1953

[Includes data for Alaska, District of Columbia, and Hawaii: based on returns as filed, unaudited except to insure proper execution. The filing provisions applicable to individuals (citizens or residents of the U. S.) under the revenue laws have varied, depending upon marital status and net or gross income. Data for non-taxable returns showing no net income or no adjusted gross income are not included in statistics given here. For 1951 and thereafter, an individual return may be filed for income tax purposes and/or self-employment tax purposes. Beginning 1951, data for taxable returns showing no adjusted gross income and adjusted gross income of less than \$600, which are returns with only self-employment tax, are excluded from all tables except tables 448 and 455 and the two items relating to self-employment tax in table 447. Beginning 1951, data for taxable returns with adjusted gross income of \$600 or more with only self-employment tax are classified among nontaxable returns in tables 447, 452, and 453; in the remaining tables, taxable and nontaxable returns are combined. Fiduciaries are required to file returns on same basis as single individuals except that a return is required for every estate or trust of which any beneficiary is a nonresident alien and, beginning 1953, for every trust having net income of \$100 or more. Excludes data for fiduciary returns with no total income. Partnership net profit or net loss is reported on individual returns of copartners according to their shares. See also *Historical Statistics*, series P 144-147.]

Total income.....\$1,000,000.....							1,499	(⁹)

¹ Taxable fiduciary returns included with individual returns through 1940, shown separately thereafter.

² Excludes 72,169 returns for 1951, 71,890 for 1952, and 78,287 for 1953, with \$34,458,000 in aggregate adjusted gross income for 1951, \$34,962,000 for 1952, and \$37,078,000 for 1953, which are returns with only self-employment tax with adjusted gross income of less than \$600; an undetermined number of these would have been filed had there been no self-employment tax.

³ Net income (shown for 1940 and prior years) is total income less statutory deductions, but before deduction of exemption or credits allowable in computing amount subject to tax. Adjusted gross income (shown for 1945-55) is defined as gross income minus allowable trade and business deductions, expenses of travel and lodging in connection with employment, reimbursed expenses in connection with employment, deductions attributable to rents and royalties, certain deductions of life tenants and income beneficiaries of property held in trust, allowable losses from sales of property, and, for taxable years beginning after Oct. 19, 1951, 50 percent of the excess of net long-term capital gain over net short-term capital loss.

⁴ Tax tabulated for 1940 and prior years is before deduction of credits for tax paid at source and tax paid to a foreign country or possession of United States, while tax for 1945-53 is after deduction of such credits. Income tax liability is the combination of normal tax and surtax, including optional tax (after 1940), and 12½ percent tax on capital net gain for 1925 and 1930 or alternative tax for 1940 and thereafter.

⁵ Includes defense tax. ⁶ For individual returns only, 1945 and later years. Joint returns counted twice for computation of percent of population filing.

⁷ For taxable years beginning 1951, self-employment tax is levied on self-employment income and is in addition to income tax. ⁸ Not available.

¹ Unequal numbers of returns for men and women are the result of insufficient information to identify returns of married persons and the use of samples as a basis for compiling statistical data.

² Included in "Separate returns of husbands and wives."

³ Created under the 1951 act and classified for the first time on 1952 returns.

⁴ See footnote 3, table 447.

Number of returns.....	51,302	52,656	54,970	56,035	57,338

¹ See footnote 2, table 447.

² See footnote 3, table 447.

³ Includes annuities, pensions, and retirement pay reported in the schedule for salaries, but excludes wages of not more than \$100 per return from which no tax was withheld, reported on Form 1040A. (See footnote 14.)

⁴ Dividends received exclude amounts received through partnerships and fiduciaries and amounts not exceeding \$100 per return reported on Form 1040A. (See footnote 14.)

⁵ Interest received includes interest on notes, mortgages, bank deposits, corporation bonds, savings accounts, and taxable and partially tax-exempt interest on Government obligations; also includes, when received through partnerships and fiduciaries, partially tax-exempt interest on Government obligations. Excludes amounts not exceeding \$100 per return reported on Form 1040A. (See footnote 14.)

⁶ Rents and royalties net profit is excess of gross rents and gross royalties over taxes, interest, repairs, depreciation, depletion, and other expenses pertaining to the respective income. Conversely, net loss from these sources is excess of expenses over gross receipts. Rents and royalties are not reported separately; net loss from either source offsets net profit of the other.

⁷ Business net profit or loss is the net result of all sole proprietorship operations carried on by the taxpayer. Net loss from one business activity offsets net profit from another. Deductions from total receipts are allowed for business expenses, and net operating loss deduction for 1949 and 1950. Net operating loss deduction for 1951 to 1953 is a separate component of adjusted gross income or deficit.

⁸ Partnership profit or loss excludes partially tax-exempt interest on Government obligations and net gain or loss from sales of capital assets.

⁹ Not available prior to 1951. Amount reported is only that portion of net operating loss from business and partnerships not absorbed by required carrybacks and carryovers prior to current year.

¹⁰ Capital assets consist of all property held by taxpayer other than the kinds of property specified in footnote 13. Net gain or loss is the net gain or allowable loss used in computing adjusted gross income and includes such gain or loss from partnerships. Each is the result of combining net short- and long-term capital gain and loss and allowable capital loss carryover from 5 preceding years not previously deducted. However, deduction for loss is limited to this loss, or to amount of net income (adjusted gross income if tax is determined from tax table) computed without regard to capital gain and loss, or to \$1,000, whichever is smallest. For detailed explanation, see source.

¹¹ Sales of (a) property used in trade or business of a character which is subject to allowance for depreciation, (b) Government obligations issued on a discount basis and payable, without interest, within 1 year from issue, (c) real property used in trade or business, and (d) for 1951 to 1953, certain copyrights and literary, musical, or artistic compositions.

¹² Income from annuities and pensions is only the taxable portion of amounts received. Amounts received to extent of 3 percent of cost are reported annually, until aggregate of amounts received and excluded from income equals cost. Thereafter, entire amounts received are taxable and must be included in income. Annuities, pensions, and retirement pay from which tax is withheld may be reported as salaries and wages.

¹³ Excludes partially tax-exempt interest on Government obligations, which is reported in interest income.

¹⁴ Comprises all taxable income not accounted for elsewhere in this table; also includes wages not subject to withholding, dividends, and interest, not exceeding in total \$100 per return reported on Form 1040A.

¹⁵ See footnote 4, table 447.

¹ See footnote 3, table 447.

² See footnote 4, table 447.

³ See footnote 7, table 447.

⁴ Aggregates in this table differ somewhat from those in other tables for individual returns with adjusted gross income due to (a) the dual system of weighting, one series of weights uniformly applied to all districts for the national distributions and an independent series for each district for the State distributions, (b) use of rounded weighting factors, and (c) data for taxable returns showing adjusted gross income of less than \$600, which are returns with only self-employment tax, included in this table.

⁵ Beginning 1952, not comparable with prior-year data since Puerto Rican returns filed in New York City during last-half of 1953 are included for the first time.

⁶ Beginning 1952, not comparable with prior-year data because (a) Puerto Rican returns filed in Baltimore during first-half of 1953 are included in Maryland data, but such returns filed in New York City during the last-half of 1953 are included in New York data; for prior-year tabulations, Puerto Rican returns were included exclusively in Maryland data; and (b) overseas servicemen's 1952 returns were filed in district directors' offices and are included in data for the various States; for prior-year tabulations, these returns were filed exclusively in Baltimore and were included in Maryland data.

⁷ Includes Alaska.

No. 456.—CORPORATION INCOME TAX RETURNS—SUMMARY: 1925 TO 1953

[Money figures in millions of dollars. Includes data for Alaska, District of Columbia, and Hawaii; based on returns as filed, prior to audit adjustments or other changes made after the returns were filed, as the result of carry-backs, relief granted under section 722 of the Internal Revenue Code, recomputation of amortization of emergency facilities, or renegotiation of war contracts. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, and charitable organizations not operating for profit. Returns of inactive corporations are excluded from these tabulations, except as noted. In comparing data over a period of years, changes in law must be taken into consideration, especially discontinuance for 1934-41 of privilege of filing consolidated returns (except by railroad corporations and their related holding or leasing companies and, in 1940-41, by Pan American trade corporations) and the restoration of this privilege in 1942. Beginning 1951, data are based on a probability sample. See source publications for effect of changes on statistical items. For other corporation data based on income tax returns, see pp. 486-488 and 492. See also *Historical Statistics*, series P 152-164]

Adjusted excess profits net income.....				912	8,368	8,985	8,764	5,483	5,835

¹ Total compiled receipts consist of gross sales (less returns and allowances), gross receipts from operations (where inventories are not an income-determining factor), all interest received on Government obligations (less amortizable bond premium), other interest, rents, royalties, excess of net short-term capital gain over net long-term capital loss, excess of net long-term capital gain over net short-term capital loss, net gain from sale or exchange of property other than capital assets, dividends, and other taxable income. Total compiled receipts exclude nontaxable income other than tax-exempt interest received on certain Government obligations.

² Net income (or deficit), in general, represents taxable income less allowable deductions, except that for 1925 and 1930, and for 1940-53, amount shown is before deduction due to net operating loss of prior years. (For amounts of such deductions, see table 593, p. 487). Beginning 1936, dividends received on stock of domestic corporations are included in taxable income. For 1936 and later years, contributions or gifts are deductible in arriving at net income and are limited to 5 percent of net income before deduction.

³ Includes defense tax.

⁴ Includes returns of inactive corporations, not available separately.

⁵ For tax reported, see above.

¹ A corporation is classified industrially according to the business reported on the return. When diversified activities are reported, the classification is determined by the industry which accounts for the largest percentage of total receipts.

² For changes in classification affecting comparability of data, see *Statistics of Income*, Part 2, for 1938 and 1948.

³ Includes lessors of real property. ⁴ Less than \$500,000.

Source: Treasury Department, Internal Revenue Service; *Statistics of Income*, Part 2.

No. 458.—CORPORATION INCOME TAX RETURNS—NUMBER OF RETURNS, TOTAL BY INDUSTRIAL

[Money figures in thousands of dollars. Data are estimated]

¹ A return is required of every citizen or resident who during the calendar year made gifts (or who is considered as having made gifts) to any one donee of more than \$3,000 in value or made gifts of future interests in property regardless of value. A nonresident alien is required to file a return if gifts consist of property situated in the U. S.

² By consent of both spouses who are citizens or residents, gifts of husband or wife to third party after Apr. 2, 1948, may be considered as made one-half by each.

³ Exclusions are the first \$3,000 of gifts (other than gifts of future interests) made to any one donee during calendar year. In case of consent to divide gifts between husband and wife, each spouse is allowed an exclusion against his half of the gift to a common donee.

⁴ Deduction allowed citizens or residents for gifts made after Apr. 2, 1948, to the donor's spouse.

⁵ The specific exemption of \$30,000 less the sum of amounts allowed in prior years may be taken in one year or spread over a period of years, at option of donor. A nonresident alien donor is not entitled to this exemption.

No. 460.—FEDERAL ESTATE TAX RETURNS—SUMMARY: 1939 to 1954

[An estate tax return is required to be filed (1) for estate of every citizen and resident alien who died (a) in period Aug. 31, 1935, through Oct. 21, 1942, the value of whose gross estate exceeds \$40,000; and (b) on or after Oct. 22, 1942, value of whose gross estate exceeds \$60,000; and (2) for estate of every nonresident alien who died (a) prior to Oct. 22, 1942, any part of whose estate is situated in U. S., at date of death; and (b) on or after Oct. 22, 1942, only if gross estate situated in U. S., at date of death exceeds \$2,000. The estate of an individual who died after 5 p. m., June 6, 1932, is subject to 2 Federal estate taxes—basic and additional. Basic tax is computed at rates provided by Revenue Act of 1926, which rates are embodied in Int. Rev. Code as basic estate tax. Additional tax is excess of tentative tax computed at rates provided by act in force at date of death, over basic tax]

¹ Net taxable estate is net estate for additional tax plus regular net estate for returns filed under the 1926 and prior acts. Tax shown is total net estate tax liability—the sum of net basic tax and net additional tax—and includes defense tax (10 percent of net tax) effective only for estates of individuals who died in period June 26, 1940, through Sept. 20, 1941.

² Excludes returns for estates of nonresident citizens who died prior to May 11, 1934.

³ Includes returns for estates of nonresident citizens who died prior to May 11, 1934.

⁴ No data compiled for 1946.

Source of tables 459 and 460: Treasury Department, Internal Revenue Service; *Statistics of Income*, Part 1.

NO. 461.—ESTATE TAX RETURNS FOR ESTATES OF CITIZENS AND RESIDENT ALIENS, FILED DURING 1954

[Money figures in thousands of dollars. Excludes returns for estates of nonresident citizens who died prior to May 11, 1934. See also headnote, table 400]

¹ Classes are based on the sum of net estate and specific exemption, the net estate and specific exemption for additional tax being used when the estate is subject to both basic and additional tax. (See footnote 3.)

² Net deduction for property previously taxed is that computed for the purpose of the additional tax, except that for returns filed under 1926 and prior acts the deduction is that computed as provided under those acts.

³ The specific exemption tabulated (a) for estates subject to additional tax is \$60,000 under 1942 and subsequent acts; \$40,000 under 1941, 1940, and 1935 acts; \$50,000 under 1934 and 1932 acts; and (b) for estates subject to earlier acts is \$100,000 under 1926 act; and \$50,000 under 1924 and prior acts.

⁴ If the estate is subject to both basic and additional taxes, the amount of property previously taxed and specific exemption included in allowable deductions are those used for purpose of the additional tax.

⁵ Net estate before specific exemption is the excess of gross estate over allowable deductions except specific exemption, the allowable deductions for additional tax being used when the estate is subject to both basic and additional taxes. For nontaxable returns, net estate (or no net estate) before specific exemption is a combination of positive and negative amounts.

⁶ Net estate after deducting specific exemption of \$100,000, except for returns filed under 1924 or prior acts for which specific exemption is \$50,000. Includes the net estate for returns filed under the 1926 and prior acts.

⁷ Gross basic tax includes the tax liability for returns taxed under the 1926 and prior acts.

¹ Based on estimated population for continental U. S. as of July 1 of each year beginning 1850.

² Excludes bonds issued to Pacific railways and Navy pension fund.

³ Less than \$500,000.

⁴ Bank eligible bonds and beginning 1942 also includes bank restricted bonds.

⁵ Comprises postal savings and Panama Canal bonds, and also conversion bonds prior to 1947.

⁶ Comprises depositary bonds, and adjusted service bonds until they matured on June 15, 1945. Also includes Armed Forces leave bonds for 1947-51.

¹ Includes all securities issued or guaranteed by U. S. Government, but excludes guaranteed securities held by the Treasury. ² Includes Postal Savings System.

³ Includes holdings by banks in territories and insular possessions, which amounted to \$300,000,000 (0.5 percent) on June 30, 1936.

⁴ Holdings for 1930 and 1935 are reported book values, and holdings of residual investors therefore deviate from par values in these years.

⁵ Not available separately. Combined totals of these items as follows: 1930, \$9,097,000,000 (56.2 percent); and 1935, \$11,511,000,000 (35.1 percent).

⁶ U. S. savings bonds, Series A-F and J, included at current redemption value.

⁷ Comprises savings and loan associations, dealers and brokers, foreign accounts, corporate pension funds, and nonprofit institutions.

No. 467.—U. S. SAVINGS BONDS—SALES AND REDEMPTIONS (CUMULATIVE), WITH SELECTED CHARACTERISTICS: 1956

[In millions of dollars except as indicated. As of December 31, on basis of *Daily Treasury Statement*. Series A through F and J sales shown at issue price and total redemptions and amounts outstanding at current redemption values. Series G, H, and K shown at face value. Series A to D sold from March 1935 through April 1941 and Series E, F, and G sold beginning May 1941. Beginning May 1, 1952, rate of interest accrual on Series E increased and Series F and G replaced by two new issues, Series J and K. A new current income bond, Series H, sold since June 1, 1952. Interest accrues semiannually until redemption or maturity for Series E, F, and J; is payable semiannually by Treasury check for Series G, H, and K.]

ITEM	Total, series A to K	Series A to D	Series E and H	Series F and G	Series J and K

Section 15

State and Local Government Finances and Employment

Statistics relating to State and local governments, their numbers, finances, and employment, are compiled on a nationwide basis primarily by the Bureau of the Census.

This Bureau issues annually a *Summary of Governmental Finances* which embraces Federal as well as State and local governments. It also issues two separate annual series on State finances (*Summary of State Government Finances* and a more detailed *Compendium of State Government Finances*); city finances (*Summary of City Government Finances* and a more detailed *Compendium of City Government Finances*); and public employment (*State Distribution of Public Employment* and *City Employment*). In addition, the Bureau of the Census occasionally issues special reports such as *Historical Statistics on State and Local Government Finances, 1902-1953*. A descriptive leaflet, *Bureau of the Census Publications on Governments* is issued annually.

Basic information for these publications is obtained mainly by mail canvass from State and local officials; however, financial data for each of the 48 State governments and the 41 cities of over 250,000 are compiled from their official records and reports by Census personnel, and classified into uniform categories for statistical reporting. Financial data collected by mail and presented for individual cities of 25,000 or more cover all such cities. Data for finances of smaller cities, counties, townships, school districts, and special districts are estimated national aggregates based on a sample of local governments.

Statistics regarding particular functions in which State and local governments have an important role are presented in other sections (for example, the sections on Education, Roads and Motor Vehicles, and Social Insurance and Welfare Services).

Governmental units.—The governmental structure of the United States includes, in addition to the Federal Government and the 48 States, a total of more than 100,000 distinct units of local government, created or authorized by the States. A majority of these are local school districts, but there are large numbers also of county and township governments, municipalities, and numerous kinds of "special districts." The figures for governmental units shown in table 480 include all agencies or bodies having an organized existence, governmental character, and substantial autonomy. While most of these governments can impose taxes, many of the special districts—such as independent public housing authorities, the New York Port Authority, and numerous local irrigation, power, and other types of districts—lack this power but are financed from rentals, charges for services, benefit assessments, grants from other governments, and other nontax sources. The data on number of governments exclude semiautonomous agencies through which States, cities, and counties sometimes provide for certain functions—for example, "dependent" school systems, State institutions of higher education, and certain other "authorities" and special agencies which are under the administrative or fiscal control of an established governmental unit.

Finances.—Unless otherwise stated, financial data in this section relate to the fiscal years of the respective governments. Federal and State government figures are for fiscal years ending on June 30, except for a few States with other closing dates within the calendar year named. Local government figures are for fiscal years ending in the calendar year specified, except for a few units which close their fiscal years in the succeeding January. Most school districts have fiscal years ending on June 30, but a majority of other local governments operate on a fiscal year ending December 31.

Note.—This section presents data for the most recent year or period available on April 2, 1957, when the material was organized and sent to the printer. In some instances more recent data were added later.

Nationwide government finance statistics must be classified and presented in terms of uniform concepts and categories, rather than according to the highly diverse terminology, organization, and fund structure of individual governments. Accordingly, financial statistics which appear here for individual States and large cities, although based upon the official records and reports of these governments, will not agree directly with figures appearing in such original sources except where particular segments of the official accounts conform explicitly to standard Census reporting categories.

The framework for Census statistics on governmental finances makes a basic distinction between general government, utilities and liquor stores, and insurance trust activities. These are distinguished as to revenue according to the nature of the source involved, as to expenditure according to the purpose of the spending, and as to debt and related borrowing and debt redemption according to the purpose (general government or utility) for which the debt was incurred.

The general government sector comprises all activities other than those classified as utility or insurance trust in nature. The utility sector includes only water supply, electric light and power, gas supply, and transit systems operated by local governments, and liquor stores operated by 16 States and by a few local governments. The scattering of other kinds of semicommercial activities carried on by some governments are included in the general government category. Insurance trust figures relate to employee retirement, unemployment compensation, and other social insurance systems administered by State and local governments.

Revenue and expenditure reported for each of these sectors and in total, in the basic framework of Census statistics, represent only external transactions, and exclude transfers among agencies and funds of the government concerned. Certain internal transactions are shown separately, however, in related tables.

Some of these classification aspects of Census financial data represent a change from 1950 and earlier years. Therefore, financial data appearing in this section cannot in all respects be directly related to government finance series included in the volume, *Historical Statistics of the United States, 1789-1945*, referred to below.

Employment and payrolls.—Public employment and payrolls data are primarily based upon the recurrent mail canvass survey of the Bureau of the Census covering all State governments and a scientific sample of local governments. Payroll amounts include all salaries, wages, and individual fee payments for the month specified, and employment numbers relate to all persons on governmental payrolls during a pay period of the month covered—including paid officials, temporary help, and (except where otherwise specified) part-time as well as full-time personnel. As in the case of financial data, figures shown for individual governments, such as States, cover major dependent agencies such as institutions of higher education, as well as the ordinary central departments and agencies of the government.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series P 189-190") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

No. 480.—GOVERNMENTAL UNITS, BY TYPE OF GOVERNMENT, BY STATES: 1957

[For 1952, limited to governments actually in existence. Excludes, therefore, a few counties and numerous townships and "incorporated places" which exist as areas for which statistics can be presented as to population and other subjects, but which lack any separate organized county, township, or municipal government.]

¹ Subject to sampling variation.

² To avoid duplication in summarizing data, excludes all transactions between types of government described in column heading; consequently, this figure is less than sum of components listed in columns at the right.

³ Excludes interschool-district payments of tuition, transportation, and other services.

⁴ Figures for "hospitals" include direct expenditure for public hospitals only; grants and subsidies for private hospitals included in expenditure for "health."

⁵ Less than \$500,000.

⁶ Not computed.

Section 16

Banking and Finance

MONEY AND BANKING

Banking and monetary system.—Banks in this country are organized under the laws of both the States and the Federal government. "National" banks organized under Federal law, passed in 1863, are supervised by the Comptroller of the Currency, and State-chartered banks are supervised by officials of the respective States. The Federal Reserve System was established in 1914 to exercise central banking functions, some of which are shared with the United States Treasury. The Reserve System includes national banks and such State banks as voluntarily join the System. The Federal Deposit Insurance Corporation, established on January 1, 1934, insures each deposit account up to \$10,000 in banks which are members of the Federal Reserve System and in such nonmember banks as join the insurance fund.

Condition of banks.—The Comptroller of the Currency, who has charge of the supervision of national banks, has collected condition reports since 1863 from these banks and since 1897 has tabulated and published summaries of their reports in detail in the *Abstract of Reports of National Banks* (now usually four times a year). The call report data are also summarized in the annual reports of the Comptroller.

After the Federal Reserve System was established in 1914, State bank members of the Federal Reserve System began to submit their statements of condition at the same time and in substantially the same form as national banks. These are consolidated by the Board of Governors of the Federal Reserve System with data for national banks collected by the Comptroller of the Currency into totals for all member banks of the Federal Reserve System, and published in the *Member Bank Call Report* (usually four times a year) and in summary form in the *Federal Reserve Bulletin*. *Banking and Monetary Statistics*, which was published in 1943 by the Board of Governors of the Federal Reserve System, makes available in one volume and on a uniform basis statistics of banking, monetary, and other financial developments.

Beginning with June 30, 1947, an all-bank series has been tabulated twice a year by the Federal Deposit Insurance Corporation. Data for noninsured banks are obtained largely through the cooperation of State banking officials. A monthly series, based in part on the all-bank series, is prepared and published by the Board of Governors of the Federal Reserve System.

General statistics of the Postal Savings Systems are published annually in the *Report of Operations of the Postal Savings System*.

Currency.—Currency, including coin and paper money, represents a relatively small part of the total media of exchange in the United States, as most money payments are made by check. All currency is now issued by the Federal Reserve Banks and the Treasury.

"Currency in circulation" or "money in circulation" (official *Treasury Circulation Statement*) refers to all coin and paper money outside the Treasury and Federal Reserve Banks, with the exception of gold and silver coin known to have been exported and, beginning with January 31, 1934, all gold coin. It includes all coin and paper money held by the public in the United States whether in current active use or held

Note.—This section presents data for the most recent year or period available on April 15, 1957, when the material was organized and sent to the printer. In some instances, more recent data were added later.

idle—also some currency which, strictly speaking, is not a part of the money supply in the hands of the public, that is, cash in vaults of commercial and savings banks, currency lost or destroyed, and currency carried abroad by travelers. The Federal Reserve Board derives a monthly figure for "currency outside banks" by subtracting from the Treasury "circulation" figure an amount representing vault cash held by commercial and mutual savings banks, and this figure more nearly approximates true circulation. Historical data on the stock of money and money in circulation may be found in the *Annual Report of the Secretary of the Treasury*.

Government credit agencies.—Government corporations and credit agencies, operating under mandates and powers given them by the Congress, make available credit of specified types or to specified groups of private borrowers, either by lending directly or by insuring or guaranteeing loans made by private lending institutions. Some of these agencies were created to meet financial problems precipitated by the depression of the thirties; others are geared to meeting certain broad social problems, particularly in the form of foreign aid and aid to housing.

Foreign loans of Government credit agencies include those of the Export-Import Bank and the International Cooperation Administration. Credit for agricultural purposes is provided by the Rural Electrification Administration; the Commodity Credit Corporation, which makes price support loans on certain farm products; the Farmers Home Administration; and several groups of banks and cooperative credit agencies operating under the supervision of the Farm Credit Administration. (See table 532.) Loans for housing purposes represent largely purchases of insured and guaranteed home mortgages by the Federal National Mortgage Association from private lenders, but also include loans of the Federal Home Loan Banks to member institutions and the loans of the Public Housing Administration to local housing authorities to aid in the construction of low-cost housing. Most of the loans guaranteed or insured by Federal credit agencies reflect activities of the Veterans Administration and the Federal Housing Administration.

Statistics on the assets and liabilities of Government credit agencies are published quarterly in the *Treasury Bulletin*. Statistics relating to the operations of Government credit agencies are also available in reports of the individual agencies.

Private credit agencies other than banks.—In addition to commercial banks, savings banks, and Government credit agencies, there are a considerable number of other types of credit agencies in the United States. The most important of these are savings and loan associations, insurance companies, finance companies dealing primarily in installment sales financing, credit unions, and personal loan companies. Statistics of savings and loan associations are collected by the Home Loan Bank Board. Statistics on loans, investments, cash, etc., of life insurance companies are collected and published principally by the Spectator Company, which also publishes data on other types of insurance. Federal credit unions are under the supervision of the Bureau of Federal Credit Unions of the Department of Health, Education, and Welfare. Consumer credit data are published currently in the *Federal Reserve Bulletin*.

SAVINGS AND LIQUID ASSETS

Individuals' savings.—The Securities and Exchange Commission issues detailed estimates of individuals' savings showing the increase in liquid assets held by individuals less the increase in their debt, exclusive of gains or losses from revaluation of assets. A continuous series starting with 1942 is published quarterly in a special release and in the Commission's *Statistical Bulletin*. (See table 546.) Annual estimates back to 1933 appear in *National Income, 1954 Edition*, issued by the Office of Business Economics. The Federal Home Loan Bank Board compiles statistics on changes in selected types of individual long-term savings. (See table 545.) The Board of Governors of the Federal Reserve System also issues annual data covering the distribution

of liquid assets and on several occasions has published data covering positive, negative, and net savings of families, by income groups.

Liquid asset holdings of individuals and businesses.—The Board of Governors of the Federal Reserve System prepares annual estimates of the amount of currency, demand deposits, time deposits, shares in savings and loan associations, and U. S. Government securities held by individuals and businesses. This series has been discontinued but annual data are available from 1939 to 1954 in the *Federal Reserve Bulletin*.

SECURITIES MARKETS

New issues and retirement of securities.—Statistical information on new security issues has been provided for many years by the *Journal of Commerce* (since 1906) and the *Commercial and Financial Chronicle* (since 1919). (See table 566.) The statistics of the *Commercial and Financial Chronicle*, include, in addition to domestic and foreign corporate issues and State and local government securities, the issues of independent agencies of the United States Government, and of foreign governments and their subdivisions.

A more comprehensive series of new issues with detailed information on the intended uses of net and gross proceeds has been compiled by the Securities and Exchange Commission on a monthly basis since 1934. The data cover substantially all new issues offered for cash sale in the United States in amounts over \$100,000 and with terms to maturity of more than one year. (See tables 564 and 567.) This series is published monthly in the *Statistical Bulletin* of the Securities and Exchange Commission, the *Federal Reserve Bulletin*, and the *Survey of Current Business*.

In addition, the Commission has been compiling statistics since 1933 on changes in security holdings of institutional groups and individuals, and net change in outstanding corporate securities through cash transactions. The latter data are published in the Commission's *Statistical Bulletin* and also in the *Federal Reserve Bulletin*. The Commission also publishes data from time to time on cost of flotation of securities registered under the Securities Act of 1933 and privately placed issues.

Trading in securities.—(See tables 555, 557, 559.) Monthly figures on the total value and volume of securities sold on each of the national securities exchanges have been published since October 1934 by the Securities and Exchange Commission. These figures include all sales effected on exchanges except, since March 1944, United States Government issues. They cover odd lots as well as round lots. The Commission also publishes figures on the total daily round-lot volume of trading in stocks on the New York Stock Exchange and the American Stock Exchange, showing short sales and several categories of member and nonmember purchases and sales. Daily odd-lot purchases and sales are reported separately.

Prior to 1934, the only available statistical data on the volume of trading in securities were the daily figures on the number of shares and the principal amount of bonds reported sold on the New York Stock Exchange and on most of the other securities exchanges. "Reported" volume of stock sales on the New York Stock Exchange represents sales in round lots reported on the ticker and does not include certain types of round-lot transactions such as stopped sales, private sales, split openings, cross transactions, and errors of omission, which ordinarily approximate from five to ten percent of total round-lot sales on the Exchange.

Security price averages.—Among the most widely known indexes of security prices are the Dow-Jones averages, which provide a continuous series of common stock prices on a daily basis since 1897. This series is now based on 65 common stocks divided

into 30 industrial, 20 railroad, and 15 public utility stocks. Indexes of the Standard and Poor's Corporation, available since 1918, are now based on the Wednesday closing prices of nearly 500 stocks. (See table 561.) The Securities and Exchange Commission compiles an index of weekly closing prices of 265 stocks listed on the New York Stock Exchange, comprising 37 industry groups. These indexes are published in the Commission's *Statistical Bulletin*, the Council of Economic Advisers' *Economic Indicators*, and the *Federal Reserve Bulletin*.

INSURANCE

Insurance statistics.—There are a number of sources for statistics on insurance of various classes—life, health, fire, marine, and casualty. Individual States collect statistics on insurers operating within their respective jurisdictions; organizations representing certain classes of insurers, or of insurance, collect statistics for those classes; insurance publishers also gather statistics for various classes of insurance. The regulation of insurance is in the hands of the various States, Territories, and the District of Columbia and these bodies collect a great deal of primary information on insurance. The Federal Government does not collect comprehensive statistics on insurance on a national basis. Basic theories and practice are parallel throughout insurance but application of theory and details of practice, including vocabulary, differ enormously by class of insurance and by class of insurer. Sound combination or comparison of figures is often difficult or impossible.

Types of insurance.—Insurance is traditionally classified as life, fire and marine, and casualty. With some overlapping between classes, an insurer is authorized to write insurance falling into one of these three classes, though the States now permit insurers, other than life, to write all kinds of insurance except life. *Life insurance* and *marine insurance* are each fairly homogeneous, the one having to do with life contingencies, and the other with losses connected with transportation. *Fire insurance*, as such, offers protection against loss by fire, but insurers in that business write several allied classes of insurance, principally against loss by windstorm, by damage to motor vehicles, by damage to aircraft, by sprinkler leakage, by earthquake, and by riot. *Casualty insurance* is a miscellaneous class, the principal subclasses of which are liability insurance (protecting against loss due to claims for damages) and workmen's compensation insurance (protecting an employer against loss due to his obligations under a workmen's compensation law). (See section 10, Social Insurance and Welfare Services.)

Types of insurer.—The principal classes of insurer are stock companies and mutual companies or associations. Of less importance are fraternal insurers, reciprocal exchanges, Lloyds, State funds, and savings banks. *Stock companies* are corporations owned and controlled by stockholders, usually for the purpose of making profits. *Mutuals* are owned and controlled by insured members for the purpose of meeting their insurance needs at cost. *Fraternal insurers* emphasize social purposes as well as insurance; *reciprocal exchanges* are organizations of individual insureds operating through an attorney-in-fact; *Lloyds* are groups of individuals writing insurance in syndicates; *State funds* are insurers operated by individual States and are almost entirely devoted to writing workmen's compensation insurance; *savings banks* write life insurance in three States.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series N 172-178") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

¹ Totals involve duplication to extent that United States notes and Federal Reserve notes, included in full, are in part secured by gold, also included in full. Gold certificates, silver certificates, and Treasury notes of 1890 excluded, since they are complete duplications of equal amounts of gold or silver held as security therefor and included in totals.

² By proclamation of the President dated Jan. 31, 1934, weight of gold dollar reduced from 25.8 to 154 $\frac{1}{2}$ grains of gold, 0.9 fine. Hence, value of gold based on \$35 per fine ounce beginning June 1934; theretofore, based on \$20.67 per fine ounce.

³ Includes paper currency held outside continental United States.

⁴ Gold Reserve Act of 1934, which was culmination of gold actions of 1933, vested in United States title to all gold coin and gold bullion. Gold coin was withdrawn from circulation and formed into bars. Gold coin (\$287,000,000) shown on Treasury records as being then outstanding was dropped from monthly circulation statement as of Jan. 31, 1934.

No. 514.—ALL ACTIVE BANKS—PRINCIPAL ASSETS AND LIABILITIES, BY CLASS OF BANKS: 1834 TO 1955

[Money figures in millions of dollars. As of June 30 to 1940; Dec. 31, thereafter. Includes banks in Alaska, Hawaii, Puerto Rico, Philippine Islands (through 1941), and beginning with 1935, those in Virgin Islands and with 1938, those in Canal Zone, Guam (except 1942-44), and American Samoa. Data for banks other than national for earlier years are not as of June 30 and are incomplete, especially through 1885. Figures for mutual savings banks include some stock savings banks for years prior to 1910 and also a few in several more recent years. Private banks are not included prior to 1887; statistics for private banks, except for 1935, cover only banks under State supervision and those voluntarily reporting; for 1935 they include also private banks which submitted reports to the Comptroller of the Currency under provisions of the Banking Act of 1933. See also *Historical Statistics*, series N 19-34, and N 43-48]

¹ Reciprocal interbank demand balances with banks in U. S. are reported net, beginning 1942.² Acceptances of other banks and bills of exchange or drafts sold with endorsements are excluded for national and State banks beginning with 1920 and for other banks beginning with 1929.³ Securities borrowed excluded for national banks beginning with 1903 and for other banks beginning with 1929. Not reported separately for prior years.⁴ Includes lawful reserve and exchanges for clearing house. Beginning 1936, excludes cash items not in process of collection.⁵ Beginning 1934, includes capital notes and debentures in banks other than national.⁶ Interest, taxes, and other expenses accrued and unpaid are excluded for national banks beginning with 1920 and for other banks beginning with 1929. Beginning 1951, includes book value of capital notes and debentures.⁷ Figures for national banks represent national bank circulation only; comparatively small amounts of State bank notes outstanding for 1870 to 1910, for which national banks converted from State banks or merged with State banks assumed liability, are not included in the figures for national banks or for all banks.⁸ Capital only.⁹ U. S. Government securities only.¹⁰ Includes State bank circulation outstanding.¹¹ Includes loan and trust companies, and with some exceptions (see headnote), stock savings banks.¹² Figures given under capital for 1935 include capital stock of one stock savings bank (see headnote).Source: Treasury Department, Comptroller of the Currency; *Annual Report*.

¹ Both direct and guaranteed obligations.

² Prior to Dec. 31, 1935, excludes balances with private banks to extent that such balances were reported in "Other assets." Prior to Dec. 31, 1933, excludes time balances with domestic banks which then amounted to \$62,000,000 and which, prior to that time, were reported in "Other assets." Beginning June 30, 1942, excludes reciprocal bank balances which on Dec. 31, 1942, aggregated \$613,000,000.

³ Beginning with 1940, includes U. S. Treasurer's time deposits, open account.

⁴ Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection and, prior to Dec. 31, 1935, less cash items reported on hand but not in process of collection.

⁵ Central reserve city banks only.

1956	2	1	1	15,130	11,280	4,702	6,578	3,595	3,057	538

¹ Adjusted to December 31, 1956.

² Includes principal disbursements in all cases; in deposit payoff cases also includes field payoff expenses and other insurance expenses; in deposit assumption cases includes advances for asset protection, liquidation expenses, and other insurance expense; excludes \$17,000 of expenses which could not be allocated to individual cases.

³ Disbursement totals for each year relate to cases occurring during that year and may thus contain some amounts disbursed in subsequent years for such cases.

¹ Assets are shown on a net basis, i. e., after reserve for losses. Figures for trust revolving funds include inter-agency items. ² Comprises cash, inventories, and all other assets.

³ Changes in coverage over period for which data are shown are as follows: Exclusion of Home Owners' Loan Corporation after June 1951, when U. S. Government interest was repaid; and inclusion of Mutual Security Agency (superseded by Foreign Operations Administration and later by the International Cooperation Administration) beginning June 1952, and of Federal Maritime Board and Maritime Administration beginning June 1953. Beginning 1956, reflects expanded coverage and new classification of agencies.

⁴ Includes investment of the Agricultural Marketing Act revolving fund in the banks for cooperatives; Treasury compilations prior to 1956 classified this item as an interagency asset. ⁵ Less than \$500,000.

⁶ Includes \$1,000 million due under the agreement with Germany signed Feb. 27, 1953, and lend-lease and surplus property balances due the United States in the principal amount of \$2,204 million.

⁷ Represents largely the Office of Alien Property.

¹ All operating banks. Includes loans guaranteed by Commodity Credit Corporation and certificates of interest in pool of CCC loans excepting certificates based on pooled loans to cooperatives.

² Excludes loans to production credit associations.

³ Includes renewals.

⁴ Includes loans guaranteed by Commodity Credit Corporation.

⁵ Includes all loans made by banks for cooperatives whether or not discounted with FICB.

⁶ Excludes loans guaranteed by Commodity Credit Corporation. Beginning 1947, excludes loans of associations in liquidation.

⁷ Includes loans to cooperatives.

⁸ June 30.

⁹ Electrification loans and, beginning 1950, telephone loans.

¹⁰ Net advances after deducting unused loan funds.

¹¹ Cumulative net advances minus principal repayments.

¹² Comprises loans made by Commodity Credit Corporation, and guaranteed loans purchased from banks and other lending agencies. Includes loans to farmers for storage facilities and equipment.

¹ Excludes insured loans.

² Amount obligated for tenant purchase, farm enlargement, farm development, building-improvement loans, and loans for refinancing purposes.

³ Includes project liquidation loans. ⁴ Loans made during year totaled \$2,175,000.

⁵ Includes rural rehabilitation, construction, and wartime adjustment loans.

⁶ Production emergency, economic emergency, special emergency, and fur loans.

⁷ Production emergency, economic emergency, special emergency, fur, orchard, flood damage, flood and wind-storm restoration loans, and Regional Agricultural Credit Corporation loans, the latter having been made by Farm Credit Administration prior to transfer of funds to Farmers Home Administration on April 16, 1949.

⁸ Less than \$500.

Source: Department of Agriculture, Farmers Home Administration.

No. 541.—ALL SAVINGS AND LOAN ASSOCIATIONS—TOTAL NUMBER AND SELECTED FINANCIAL ITEMS: 1920 TO 1956

[Money figures in millions of dollars. Major balance sheet items for all operating and insured associations beginning year-end 1950 are not in agreement with summarized State data, primarily because some State-chartered associations submit their reports on dates other than December 31. Includes Alaska, Guam, Hawaii, and Puerto Rico. See also *Historical Statistics*, series H 114 and H 128-132]

¹ Less than \$50,000,000.

² Includes shares and deposits in credit unions and Postal Savings System.

³ After deducting change in bank loans made for the purpose of purchasing or carrying securities.

⁴ Includes Social Security funds and State and local retirement systems.

⁵ Mortgage debt to institutions on one- to four-family nonfarm dwellings.

⁶ Consumer debt owed to corporations, largely attributable to purchases of automobiles and other durable consumers goods, although including some debt arising from purchases of consumption goods. The other segments of individuals' debt have been allocated to the assets to which they pertain, viz., saving in insurance and securities.

⁷ Construction of one- to four-family nonfarm dwellings less net acquisitions of properties by nonindividuals. Source: Securities and Exchange Commission; data are published quarterly in *Volume and Composition of Individuals' Saving*, and in the *Statistical Bulletin*.

No. 554.—MARGIN REQUIREMENTS ON SECURITIES CREDIT: 1934 TO 1957

[Prescribed by Board of Governors of the Federal Reserve System in accordance with Securities Exchange Act of 1934. Regulations limit the amount of credit that may be extended on a security by prescribing a maximum loan value, which is a specified percentage of its market value at the time of the extension; the margin requirement is the difference between the market value (100 percent) and the maximum loan value. Data shown here are for regular accounts]

EFFECTIVE DATE	MARGIN REQUIRED (percent of market value)			EFFECTIVE DATE	MARGIN REQUIRED (percent of market value)		
	For credit by brokers and dealers on listed securities	For short sales	For loans by banks on stocks		For credit by brokers and dealers on listed securities	For short sales	For loans by banks on stocks
Oct. 1, 1934.....	1 25-45	(²)	-----	Feb. 1, 1947.....	75	75	75
Feb. 1, 1936.....	1 25-55	(²)	-----	Mar. 30, 1949.....	50	50	50
Apr. 1, 1936.....	55	(²)	55	Jan. 17, 1951.....	75	75	75
Nov. 1, 1937.....	40	50	40	Feb. 20, 1953 ⁴	50	50	50
Feb. 5, 1945.....	50	50	50	Jan. 4, 1955 ⁴	60	60	60
July 5, 1945.....	75	75	75	Apr. 23, 1955.....	70	70	70
Jan. 21, 1946.....	100	100	100	In effect Mar. 1, 1957.....	70	70	70

¹ Exact requirement on each security determined by relation of its current market price to its lowest price since July 1, 1933.

² Requirement prior to Nov. 1, 1937, was margin "customarily required" by broker.

³ Effective May 1, 1936. ⁴ Effective after the close of business.

¹ Straight average of market prices of all taxable marketable bonds due or callable in 15 years and over for data roughly 1950, in 12 years and over for 1954 through September 1955, and in 10 to 20 years beginning October 1955.

² Prices derived from average yields on basis of a 4 percent 20-year bond based on Wednesday closing prices.

³ Based on composite of data (including industrial, utility, and railroad) and are a conversion of yield indexes, based on yield to maturity of each bond and assuming a 4-percent coupon with 20 years to maturity. From April 1937 to date, prices are averages of weekly data for 17 A1+ bonds; from January 1929 to March 1937, data based on a varying group of A1+ bonds, one price monthly (first of month) being used.

⁴ Prices derived from averages of median yields on noncallable high-grade stocks on basis of a \$7 annual dividend, data from Board of Governors, Federal Reserve System.

⁵ Based on Wednesday's closing prices, or last preceding sale price; indexes weighted by number of shares of each stock outstanding in base period. Number of stocks represents number currently used; continuity of series not affected by change in number.

⁶ Averages of daily closing figures. Changes have been made in stocks used at various times. However, the number of stocks has remained constant except for public utilities (see footnote 7).

⁷ For 20 stocks prior to June 2, 1938.

⁸ Based on prices end of month. 200 stocks used represent for the most part, an identical list, except in public utility group, which is a continuous series composed of 24 electric utilities (representing combined holding and operating electric companies prior to 1942 and operating electric companies thereafter). Data for A. T. & T. Co., included in figures for 200 stocks; excluded from utilities in order to show more clearly the trend for electric operating companies.

⁹ Includes also 15 banks and 10 insurance stocks and 1 additional public utility stock (see footnote 8).

¹⁰ Averages of weekly closing prices. Number of stocks represents number currently used.

¹ Through 1950, average yields on taxable bonds due or callable after 15 years; 1954 through September 1955, on those due or callable after 12 years; beginning October 1955, on those due or callable in 10 to 20 years.

² Number of issues as of Dec. 1, 1956; number varies for earlier years.

³ Estimated yields prevailing on highest grade issues in first quarter of each year prior to 1951 and in February only beginning 1951. Data from National Bureau of Economic Research.

⁴ More than usually liable to error.

⁵ Represents bonds of 40 years to maturity beginning 1945.

⁶ Based currently on 14 stocks (15 in earlier years). Yield currently determined from average of 8 median yields (9 median in earlier years). Issues converted to a price equivalent to \$100 par and a 7 percent annual dividend before averaging.

⁷ Average of monthly figures computed by dividing the aggregate annual dividends being paid as of the end of each month by the market value of all outstanding shares of the companies as of the same date.

⁸ Includes also 15 bank and 10 insurance stocks, and 1 additional public utility (see footnote 8, table 561).

¹ Includes the less than 1 percent of spending units for which stock ownership was not ascertained.

² No cases reported or less than one-half of 1 percent.

³ Education of head of spending unit; does not necessarily denote graduation.

⁴ Metropolitan areas include the 12 largest cities and the immediately adjacent areas; other cities include all other cities of 2,500 inhabitants or more; and small towns and open country include towns of less than 2,500 inhabitants and open country areas.

No. 582.—FIRE LOSSES, TOTAL AND PER CAPITA: 1876 TO 1956

[Amounts, except per capita, in thousands of dollars. Continental United States only. Prior to 1916 figures are as compiled by the New York Journal of Commerce and include losses of \$10,000 or over in the principal cities of the United States, adding 15 percent for small and unreported losses. These figures are not comparable with those shown for later years (the 1916 Journal of Commerce figure being \$214,531,000 as against \$258,378,000) which cover all fires reported to the Actuarial Bureau Committee, adding 25 percent for unreported and uninsured losses prior to 1935 and 30 percent thereafter. Estimated fire losses are based on paid losses through 1953, on incurred losses thereafter]

Section 17

Business Enterprise

Statistics in this section relate in general to the place and behavior of the business firm and business initiative in the American economy. The data include measures of and changes in the numbers of businesses; assets and liabilities of corporations; types of business income and expenditures; business sales and inventories; research and development expenditures; and patents and designs registered.

The principal sources of these data are the *Survey of Current Business* and its *National Income Supplement* published by the Office of Business Economics, Department of Commerce; the *Federal Reserve Bulletin* issued by the Board of Governors of the Federal Reserve System; and *Dun's Statistical Review* published by Dun and Bradstreet. Other sources are publications of the Securities and Exchange Commission, the Internal Revenue Service, and the United States Patent Office.

Firms in operation, entering, and leaving.—The number of firms in existence and the number of new, discontinued, and transferred businesses are estimated by the Office of Business Economics on the basis of data from the Internal Revenue Service and the Bureau of Old-Age and Survivors Insurance.

A business firm is defined by the Office of Business Economics as a business organization under a single management and may include one or more plants or outlets; a firm doing business in more than one industry is classified by industry according to the major activity of the firm as a whole. A self-employed person is considered a firm only if he has either one or more employees or has an established place of business. This count of firms differs from that of the Bureau of the Census which ordinarily represents a count of establishments, e. g., manufacturing plants or retail stores, larger than a minimum specified size.

New businesses include firms which are newly established; discontinued businesses refer only to liquidations. Business transfers represent purchases of going businesses, acquisitions of businesses through inheritance, transfers of businesses to a trustee or executor, as well as changes in the form of business organization.

Industrial and commercial failures.—These data are collected by Dun and Bradstreet, and are available by years since 1857 and by months since 1900. The number of failures includes concerns involved in court proceedings or voluntary actions likely to end in loss to creditors; discontinuances with outside obligations paid in full are not included. Data cover manufacturers, wholesalers, retailers, building contractors, and certain types of commercial service, but do not encompass all business enterprises. Specific types of business not listed are: Finance, insurance, and real estate companies; railroads and steamship lines; amusement enterprises. Failures data are published monthly in summary form in *Dun's Review & Modern Industry* and in detailed tabulations in *Dun's Statistical Review*.

Corporate assets and liabilities.—Data on corporate assets and liabilities are from the Internal Revenue Service and the Securities and Exchange Commission. In its annual report, *Statistics of Income*, Part 2, the Internal Revenue Service presents abbreviated balance sheet and income account data for all United States corporations. In a quarterly release entitled *Net Working Capital of U. S. Corporations*, the Securities and Exchange Commission publishes data on the net working capital position of all United States corporations, exclusive of banks and insurance companies, showing the principal components of current assets and liabilities.

Note.—This section presents data for the most recent year or period available on April 15, 1957, when the material was organized and sent to the printer. In some instances, more recent data were added later.

Corporate income, profits, dividends and taxes.—Several agencies (the Internal Revenue Service, the Office of Business Economics, and the Federal Reserve Board) compile corporate income account data. These data, however, are not comparable because of differing methods of compilation.

The Internal Revenue Service publishes corporate data based on income tax returns in its annual *Statistics of Income*, Part 2.

The corporate data issued by the Office of Business Economics are a part of its national income and product accounts and are defined as required for purposes of national income estimation. The primary sources of data for the Office of Business Economics estimates of profits, taxes, dividends, and undistributed profits are the original corporate tax returns submitted to the Internal Revenue Service, and summarized in the annual report on *Statistics of Income*, Part 2. Various adjustments of the *Statistics of Income* data have been required by the national income treatment, particularly with respect to depletion, capital gain or loss, and intercorporate dividends, and because the original corporate income statements do not represent the final stage of information.

Federal Reserve Board data relating to profits and dividends apply to particular industrial segments only, such as large manufacturing corporations and public utility corporations.

Sources and uses of corporate funds.—These data indicate capital requirements of corporations and the manner in which they are financed. Sources of funds are equal to their uses. Certain discrepancies, however, apart from errors in estimation, interfere with this equality. These discrepancies are not particularly significant and are due to omission of such factors as (1) money accruing to corporations from an excess of sales over purchases of used plant and equipment, (2) transactions in securities held as permanent investments except public offerings, and (3) the fact that net new issues omit entrepreneurial capital for new corporations where no offering or sales of securities are made to the public or to institutions. Neither is liquidation of such corporations reflected.

Business sales and inventories.—Business sales and inventories are defined as the sum of data for manufacturing, wholesale, and retail trade. Sales are estimated aggregate values and inventories are book values at the end of the year. Sales signifies sales or shipments for retail and wholesale trade and billings or shipments for manufacturing. Trade inventories are valued at cost of merchandise on hand, while manufacturer's inventories are valued at the cost price or market price, whichever is lower. The data on sales and inventories for manufactures are based on annual data through 1953, published by the Internal Revenue Service in *Statistics of Income*, Part 2, with an adjustment for unincorporated manufacturing concerns.

Net change in business inventories.—To ascertain net physical change in nonfarm inventories, book values of beginning and ending inventories of each year are expressed in terms of constant base year prices by means of selected Bureau of Labor Statistics wholesale price indexes appropriate to each industry. Net increment in deflated book value figures is then converted to a current price basis by index ratios of current prices to base year prices. No inventory valuation adjustment is shown for farm inventories because change in farm inventories is estimated (by the Department of Agriculture) from physical quantity data.

Plant and equipment expenditures of U. S. business.—A joint survey by the Securities and Exchange Commission and the Department of Commerce presents quarterly data on actual expenditures of U. S. business, other than agriculture, and anticipated expenditure for the next two quarters. In addition, a survey is made at the beginning of each year of plans of business as regards capital expenditures during that year. The data are based on reports submitted by corporations registered with the Securities and Exchange Commission and by a large sample of nonregistered companies, unincorporated as well as corporate, reporting to the Department of Commerce.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics*, series P 176-187") provide cross-references, where applicable, to *Historical Statistics of the United States, 1789-1945*. See preface.

¹ Net sales for fiscal years ending January 2 for industrials, and March 3 for merchandising firms. Some companies report "gross operating income," "gross operating revenues," etc., rather than sales. In tobacco and distilling companies, excise taxes have been deducted from sales. Includes sales of consolidated subsidiaries.

² Total assets employed in the business. (Some firms report fixed assets on an un depreciated basis.)

³ As reported. In some cases, average employment for year; in some companies, year end.

Capital stock: ⁸							
Preferred	19,117	19,533	17,138	14,764	14,906	15,831	15,815
Common	87,067	82,733	72,292	64,747	79,310	85,365	89,121
Surplus and undivided profits ⁹	61,832	48,828	61,633	83,685	137,361	159,935	168,991
Deficit ¹⁰	6,734	12,163	12,676	8,571	7,968	7,125	7,655
Net surplus	55,098	36,665	48,957	75,014	129,393	152,810	161,246

¹ Excludes returns with fragmentary balance sheet data.² Adjustments are made in tabulating data as follows: (a) Reserves for depreciation, depletion, amortization, and bad debts, when reported under liabilities are used to reduce corresponding asset account, and "Total assets" and "Total liabilities" are decreased by amount of such reserves; and (b) a deficit in surplus, reported under assets, is transferred to liabilities, and "Total assets" and "Total liabilities" are decreased by amount of deficit.³ Less reserve for bad debts. Includes loans and discounts of banks.⁴ Comprises obligations of United States or any agency or instrumentality thereof; obligations of States, Territories, and political subdivisions thereof. District of Columbia, and United States possessions.⁵ Less depreciation and depletion reserves. Includes land.⁶ Beginning 1940, includes bonds, notes, and mortgages payable, with original maturity of less than 1 year.⁷ Beginning 1940, represents "Bonded debt and mortgages" with original maturity of 1 year or more.⁸ For balance sheets in which common and preferred stock are not reported separately, combined amount is tabulated as "Common stock."⁹ Comprises sum of positive amounts of "Paid-in or capital surplus," "Earned surplus and undivided profits," and "Surplus reserves."¹⁰ Comprises negative amounts for "Earned surplus and undivided profits."Source: Treasury Department, Internal Revenue Service; *Statistics of Income*, Part 2.

No. 592.—CURRENT ASSETS AND LIABILITIES OF U. S. CORPORATIONS: 1945 TO 1956

[In billions of dollars. As of December 31. Covers all U. S. corporations excluding banks and insurance companies. 1945-1953 based on Bureau of Internal Revenue *Statistics of Income*, covering virtually all corporations in United States; for 1954-56 estimated (subject to revision), based on data compiled from many different sources, including data on corporations registered with Securities and Exchange Commission]

ASSETS AND LIABILITIES	1945	1947	1948	1949	1950	1951	1952	1953	1954	1955	1956

¹ Receivables from and payables to U. S. Government exclude amounts offsetting each other on corporation's books or amounts arising from subcontracting not directly due from or to U. S. Government. Wherever possible, adjustments have been made to include U. S. Government advances offsetting inventories on corporation's books.² Includes marketable securities other than U. S. Government.Source: Securities and Exchange Commission; Statistical Series, *Net Working Capital of U. S. Corporations*. Data are published quarterly.

No. 593.—CORPORATION RECEIPTS, DEDUCTIONS, PROFITS, AND TAX: 1925 TO 1953

[In millions of dollars. Includes data for Alaska, District of Columbia, and Hawaii; based on income tax returns as filed, prior to audit adjustments or other changes made after the returns were filed, as the result of carry-backs, relief granted under section 722 of the Internal Revenue Code, recomputation of amortization of emergency facilities, or renegotiation of war contracts. All corporations are required to file returns except those specifically exempt, such as mutual, fraternal, civic, and charitable organizations not operating for profit. Returns of inactive corporations are excluded from these tabulations. In comparing data over a period of years, changes in law must be taken into consideration, especially discontinuance for 1934-41 of privilege of filing consolidated returns (except by railroad corporations and their related holding or leasing companies and, in 1940-41, by Pan American trade-corporations) and the restoration of this privilege in 1942. See source publications for effect of changes on statistical items. Data represent combined totals for returns reporting net income and those reporting no net income. For number of returns, see table 456, p. 378.]

Dividends paid:								
Cash	5,190	8,184	5,941	6,089	6,081	11,553	11,263	11,601
Stock	544	414	136	140	334	1,292	1,364	1,110

¹ Comprises gross sales (less returns and allowances), gross receipts from operations (where inventories are not an income-determining factor), all interest received on Government obligations (less amortizable bond premium), other interest, rents, royalties, excess of net short-term capital gain over net long-term capital loss, excess of net long-term capital gain over net short-term capital loss, net gain from sale or exchange of property other than capital assets, dividends, and other taxable income. Excludes nontaxable income other than tax-exempt interest received on certain Government obligations.

² Not available.

³ Beginning 1936, "Dividends from domestic corporations" are taxable income, tabulated with "Other receipts."
⁴ Beginning 1934, includes in addition to the wholly tax-exempt interest, that which is partially tax-exempt. Interest on Treasury notes issued on or after Dec. 1, 1940, and obligations issued on or after Mar. 1, 1941, by the United States or any agency or instrumentality thereof, is wholly taxable and is included in "Other receipts" for 1941-53.

⁵ Beginning 1936, includes contributions or gifts (limited to 5 percent of net income before this deduction).

⁶ Excludes (a) Federal income tax and Federal excess-profits taxes; (b) estate, inheritance, legacy, succession, and gift taxes; (c) income taxes paid to a foreign country or possession of United States, if any portion is claimed as a tax credit; (d) taxes assessed against local benefits; (e) Federal taxes paid on tax-free covenant bonds; and (f) taxes reported in "Cost of goods sold" and "Cost of operations." Beginning 1951, identifiable amounts of taxes included in "Cost of goods sold" and "Cost of operations" are transferred to "Taxes paid."

⁷ Tabulated with "Other deductions."

⁸ Beginning 1940, includes amortization of emergency facilities.

⁹ Compiled receipts less compiled deductions.

¹⁰ Net income (or deficit), in general, represents taxable income less allowable deductions, except that for 1925 and 1930, and for 1940-53, amount shown is before deduction due to net operating loss of prior years.

¹¹ Deducted by corporations reporting net income.

¹² In addition to income tax, includes: Declared value excess-profits tax, 1933-45; defense tax, 1940; and excess profits tax under (a) provisions of Second Revenue Act of 1940, 1940-46, and (b) Excess Profits Tax Act of 1950, beginning July 1, 1950.

3.—CORPORATE INCOME BEFORE FEDERAL AND STATE INCOME AND EXCESS PROFITS TAXES, BY INDUSTRY: 1940 TO 1955

in dollars. Data represent earnings of corporations organized for profit which accrue to residents of the United States, measured before Federal and State profit taxes, without deduction of depletion charges and losses. Profits accruing to residents are measured by eliminating intercorporate income from capital gains and losses. Profits accruing to residents are measured by adding the net receipts of dividends and branch profits to the net receipts of domestic corporations and by adding the net receipts of dividends and branch profits to the net receipts of foreign corporations. In other major respects, the definition of income is in accordance with Federal income tax regulations. [The inclusion of depletion charges has an important effect on data for mining industries]

No. 597.—CORPORATE PROFITS, TAXES AND DIVIDENDS: 1940 TO 1956

[In billions of dollars. Data for 1954 to 1956 subject to revision; see July issue of *Survey of Current Business*. See headnote, table 596. Taxes refer to Federal and State taxes on corporate earnings. Disbursements of tax refunds have been deducted from tax liability in year in which tax liability was incurred. Dividends represent amount of cash dividends disbursed to residents of the Nation, and therefore are measured after elimination of intercorporate dividends. Undistributed profits comprise difference between corporate profits after taxes and net dividend payments. Quarterly data are seasonally adjusted at annual rates]

O.—INDUSTRIAL AND COMMERCIAL FAILURES—NUMBER AND LIABILITIES: 1857 TO 1956

all railroad failures. Series revised beginning 1933 to exclude real estate and financial companies. These bring "Failures" more nearly in accordance with type of concerns covered by "Total concerns in business" which no changes were made. Beginning 1939, new series includes voluntary discontinuances with creditors and small concerns forced out of business with insufficient assets to cover all claims, in addition to failures included in former series. See also headnote, table 611.]

7-70 based on census of business by Mercantile Agency in 1857 and 1880; thereafter represents number listed in July issue of *Dun & Bradstreet Reference Book*. See table 614 for class of industries covered. Note regarding revisions. Figures in italics are comparable with preceding years.

Dun & Bradstreet, Inc., New York, N. Y. Monthly data published currently in *Dun's Statistical*

No. 611.—INDUSTRIAL AND COMMERCIAL FAILURES—NUMBER, LIABILITIES, AND RATE, BY MONTHS: 1950 TO 1956

[Liabilities in thousands of dollars. Current liabilities represent primarily current indebtedness, including not only all accounts and notes payable, but also all obligations, whether in a secured form or not, known to be held by bank officers, affiliated companies, supplying companies, or the Government. They exclude long-term publicly held obligations. Offsetting assets are not taken into account.]

22.—PATENT APPLICATIONS AND PATENTS AND CERTIFICATES OF REGISTRATION: 1901 TO 1956

comprise patents issued to citizens of United States and residents of foreign countries. On July 1, 1940, edition of prints and labels was transferred to the Copyright Office, Library of Congress, and data concerning them are compiled by that organization. For information on copyrights, see table 653, p. 524. See *Historical Statistics*, series P 176-187.

FIG. XXIX.—NUMBER OF RADIO AND TV STATIONS: 1945 TO 1955

[Excludes FM (independents). See table 646]

FIG. XXX.—BROADCAST REVENUES OF RADIO AND TV STATIONS: 1945 TO 1955

[Excludes FM (independents). See table 646]

Source of figs. XXIX and XXX: Charts prepared by Department of Commerce, Bureau of the Census. Data are from Federal Communications Commission.

Section 18

Communications

This section presents statistics relating to the usage, finances, and operations of the various communications and related media. Included are data concerning postal service, telephone, telegraph, radio, television, motion pictures, newspapers, and books. The principal sources of wire and wireless data are the Federal Communications Commission's annual *Statistics of the Communications Industry in the United States*, and *Annual Report*. Data concerning the postal service are included in the *Annual Report of the Postmaster General*. Statistics as to revenues, volume of mail, and the distribution of expenditures by classes of mail and services are presented in the Post Office Department's annual *Cost Ascertainment Report*.

Since the establishment of the Federal Communications Commission in 1934, statistical coverage of wire and wireless communications has been concentrated in that agency. According to the Communications Act of 1934, as amended, only carriers engaged in interstate, or foreign, communications service by means of their own facilities (or through the facilities of another carrier under direct or indirect common control) are subject to the full jurisdiction of the Commission. The Commission requires the filing of annual and monthly reports by these carriers except from the smallest carriers. The companies controlling any but the smallest of these carriers are also required to file annual reports.

Postal Service.—The postal statistics, unless otherwise noted, include data for outlying Territories, possessions, etc., except the Canal Zone.

"Cost ascertainment" is the term applied in the Post Office Department to describe its plan or system, partly accounting and partly statistical, for developing through the medium of a sampling procedure, data on the revenues, expenses, volumes, and average hauls fairly attributable to each of the several classes of mail handled by the Postal Service (first, second, third, fourth, foreign, penalty, franked, free for the blind, and air mail) and similar revenue, expense, and volume data for each of its special services (special delivery, money order, insurance, collect-on-delivery, registry, certified, and postal savings). Some of these types of information are also required for items classified as "unassignable" and for the several nonpostal services.

Telephone and telegraph systems.—Practically all of the wire-telegraph, ocean-cable, and radiotelegraph carriers are subject to the full jurisdiction of the Federal Communications Commission. A large number of telephone carriers engaged in interstate or foreign service only by connection with the facilities of another unaffiliated carrier are not subject to the full jurisdiction of the Commission. However, it is estimated that the gross operating revenues of the telephone carriers reporting annually cover over 90 percent of the revenues of all telephone carriers in the United States.

The term "system" is used, in general, for aggregations of lines operated by the larger companies. "Bell System" as referred to here, consists of the American Telephone & Telegraph Co. and its principal telephone subsidiaries.

Broadcasting.—The number of broadcast stations refers to the number licensed or holding construction permits. Total broadcast revenues are defined as total time sales of all networks and stations, less commissions to agencies and plus incidental

Note.—This section presents data for the most recent year or period available on April 15, 1957, when the material was organized and sent to the printer.

revenues, such as sale of talent, program material, etc. Reports filed with the Federal Communications Commission by broadcast stations and networks cover substantially all units in the industry which operate in the United States and its Territories, possessions, etc.

Historical statistics.—Tabular headnotes (as “See also *Historical Statistics*, series P 165–167”) provide cross-references, where applicable, to *Historical Statistics of the United States, 1789–1945*. See preface.
